Art from a Fractured Past Cynthia E. Milton, 2014-01-27 Peru's Truth and Reconciliation Commission not only documented the political violence of the 1980s and 1990s but also gave Peruvians a unique opportunity to examine the causes and nature of that violence. In *Art from a Fractured Past*, scholars and artists expand on the commission's work, arguing for broadening the definition of the testimonial to include various forms of artistic production as documentary evidence. Their innovative focus on representation offers new and compelling perspectives on how Peruvians experienced those years and how they have attempted to come to terms with the memories and legacies of violence. Their findings about Peru offer insight into questions of art, memory, and truth that resonate throughout Latin America in the wake of dirty wars of the last half century. Exploring diverse works of art, including memorials, drawings, theater, film, songs, painted wooden retablos (three-dimensional boxes), and fiction, including an acclaimed graphic novel, the contributors show that art, not constrained by literal truth, can generate new opportunities for empathetic understanding and solidarity. Contributors. Ricardo Caro Cárdenas, Jesús Cossio, Ponciano del Pino, Cynthia M. Garza, Edilberto Jiménez Quispe, Cynthia E. Milton, Jonathan Ritter, Luis Rossell, Steve J. Tap Dancing to Work Carol J. Loomis, 2012-11-21 Warren Buffett built Berkshire Hathaway into something remarkable— and Fortune journalist Carol Loomis had a front-row seat for it all. When Carol Loomis first mentioned a little-known Omaha hedge fund manager in a 1966 Fortune article, she didn't dream that Warren Buffett would one day be considered the world's greatest investor—nor that she and Buffett would quickly become close personal friends. As Buffett's fortune and reputation grew over time, Loomis used her unique insight into Buffett's thinking to chronicle his work for Fortune, writing and proposing scores of stories that tracked his many accomplishments—and also his occasional mistakes. Now Loomis has collected and updated the best Buffett articles Fortune published between 1966 and 2012, including thirteen cover stories and a dozen pieces authored by Buffett himself. Loomis has provided commentary about each major article that supplies context and her own informed point of view. Readers will gain fresh insights into Buffett's investment strategies and his thinking on management, philanthropy, public policy, and even parenting. Some of the highlights include: The 1966 A. W. Jones story in which Fortune first mentioned Buffett. The first piece Buffett wrote for the magazine, 1977's "How Inflation Swindles the Equity Investor." Andrew Tobias's 1983 article "Letters from Chairman Buffett," the first review of his Berkshire Hathaway shareholder letters. Buffett's stunningly prescient 2003 piece about derivatives, "Avoiding a Mega-Catastrophe." His unconventional thoughts on inheritance and philanthropy, including his intention to leave his kids "enough money so they would feel they could do anything, but not so much that they could do nothing." Bill Gates's 1996 article describing his early impressions of Buffett as they struck up their close friendship. Scores of Buffett books have been written, but none can claim this work's combination of trust between two friends, the writer's deep understanding of Buffett's world, and a very long-term perspective.

Health Policy and European Union Enlargement McKee, 2004-04-01 While there may be consensus on the broader issues of the core objectives of the health care system, expectations differ between EU countries, and European national policy-makers. This book seeks firstly to assess the impact of the enlargement process and then to analyse the challenges that lie ahead in the field of health and health policy.

The Last Harvest Kim Liggett, 2017-01-10 Kim Liggett draws on her childhood during the Satanic Panic for a chilling tale of magic in *The Last Harvest*, winner of the 2017 Bram Stoker Award. I plead the blood. Those were the last words seventeen-year-old golden boy quarterback Clay Tate heard rattling from his dad's throat when he discovered him dying on the barn floor of the Neely cattle ranch, clutching a crucifix to his chest. Now, on the first anniversary of the Midland, Oklahoma, slaughter, the whole town's looking at Clay like he might be next to go over the edge. Clay wants to forget the past, but the sons and daughters of the Preservation Society—a group of prominent farmers his dad accused of devil worship—won't leave him alone. Including Ali, his longtime crush, who suddenly wants to reignite their romance after a year of silence, and hated rival Tyler Neely, who's behaving like they're old friends. Even as Clay tries to reassure himself, creepy glances turn to sinister stares and strange coincidences build to gruesome rituals, but when he can never prove that any of it happened, Clay worries he might be following his dad down the path to insanity...or that something far more terrifying lies in wait around the corner.

Beyond War Douglas P. Fry, 2009-04-10 A profoundly heartening view of human nature, *Beyond War* offers a hopeful prognosis for a future without war. Douglas P. Fry convincingly argues that our ancient ancestors were not innately warlike—and neither are we. He points out that, for perhaps ninety-nine percent of our history, for well over a million years, humans lived in nomadic hunter-and-gatherer groups, egalitarian bands where warfare was a rarity. Drawing on archaeology and fascinating recent fieldwork on hunter-gatherer bands from around the world, Fry debunks the idea that war is ancient and inevitable. For instance, among Aboriginal Australians, warfare was an extreme anomaly. Fry also points out that even today, when war seems ever present, the vast majority of us live peaceful, nonviolent lives. We are not as warlike as we think, and if we can learn from our ancestors, we may be able to move beyond war to provide real justice and security for the world.

The Blue Hour Alonso Cueto, 2012-06-07 Adrián Ormache, a high-flying lawyer with a beautiful wife and two daughters, leads a privileged and glamorous life in one of Lima's wealthiest neighbourhoods. But when his mother dies, he discovers a letter amongst her possessions making shocking claims about her now long-dead husband, Adrián's father – a commander in the army during the Peruvian Civil War of the 1980s. As well as being linked to atrocities committed against the 'Shining Path' guerrillas, it appears that he also kidnapped and kept a local girl, whose family now seeks retribution. Shocked out of his comfortable existence, Adrián becomes obsessed with finding the girl at the heart of the mystery, and sets out to face the harrowing realities of Peru's recent past, and uncover the truth about his father.

Auraria E. Merton Coulter, 2009-09-01 The first gold rush in American history occurred in north Georgia; it preceded the mining booms in the West by almost two decades. Published in 1956, *Auraria* tells the story of the mining town at the center of Georgia's gold frenzy. *Auraria*, which reached its zenith in the 1830s, eventually faded into a ghost town by the twentieth century. E. Merton Coulter gives readers more than a local study by placing *Auraria*'s fascinating story in the context of larger regional and national developments.

Acta Medicinæ Legalis. Volume XLIV. 1994 Patrice Mangin, Bertrand Ludes, 1995-04-21 Professor Patrice MANGIN President of the XVIth Congress of the International Academy of Legal Medicine and Social Medicine The International Academy of Legal Medicine and Social Medicine was founded in 1938 in Bonn. The motive for founding the Academy was to promote associating and confronting on an international background the scientific research work produced in the various domains dealing with the Legal and Social Medicine. As first president of the International Academy of Legal Medicine and Social Medicine, Professor Knud Sand from Copenhagen, assisted by colleagues of the Praesidium appointed as national representatives, succeeded in gathering together nearly the whole academic people involved in Legal and Social Medicine. Thus one year later, in 1939, The Academy became a worldwide institution of 450 members from thirty nations. After the war, what had been before of considerable

interest for the progress of the knowledge and techniques in Legal Medicine remained again a pressing necessity leading to the second meeting of the Academy in 1947 in Brussels under the presidency of Professor De Laet. Since then the meetings of the Academy followed one another every three years. At this point, I would like to thank all the past presidents of the Academy and in particular Professor Roche and Professor Andre for their contribution without which the Academy would not be what it is presently.

The Complete Poems of John Milton John Milton,1909

Managing Acquisitions Philippe C. Haspeslagh,David B. Jemison,1991 How can acquisitions help improve a firm's competitive position and lead to value creation? * Why do many acquisitions fail to live up to expectations? * Why do many managers think that integration means make the other firms like us, rather than build on the complementary elements that were the original justification for the acquisition? * How can a management team improve its success with acquisitions? * How and what can firms learn from their acquisition experience? These persistent questions are addressed in this important book by Philippe Haspeslagh and David Jemison. Though much has been written about hostile takeovers, megamergers, and corporate restructuring, little attention has been paid to strategic acquisitions that firms throughout the world are using to accelerate the renewal of their business. After eight years of research in 20 companies in the United States, Europe, and Japan, Haspeslagh and Jemison offer a welcome antidote to an overly financial view of acquisitions. Real value, they show, is created only after the agreement is signed -- through managerial actions, not financial engineering. Against their innovative theory of how acquisitions create value, the authors examine the reality of acquisition decision making in most firms. Ironically, they point out, less effective acquisition decision making does not stem from a lack of analysis, but from problems in the acquisition process itself. The importance of their message manage the acquisition process -- becomes more vivid when Haspeslagh and Jemison address integration, identifying common problems and challenges. In addition, they offer a powerful framework for managers to think through their integration approach.

Japanese Shoichi Iwasaki,2013-01-23 Japanese ranks as the ninth most widely spoken language of the world with more than 127 million speakers in the island state of Japan. Its genetic relation has been a topic of heated discussion, but Altaic and Austronesian languages appear to have contributed to the early formation of this language. Japanese has a long written tradition, which goes back to texts from the eighth century CE. The modern writing system employs a mixture of Chinese characters and two sets of syllabary indigenously developed based on the Chinese characters. This book consists of sixteen chapters covering the phonology, morphology, writing system, tense and aspect systems, basic argument structure, grammatical constructions, and discourse and pragmatic phenomena of Japanese. It provides researchers with a useful typological reference and students of Japanese with a theory-neutral introduction to current linguistic research issues.

Data Selves Deborah Lupton,2019-11-25 As people use self-tracking devices and other digital technologies, they generate increasing quantities of personal information online. These data have many benefits, but they can also be accessed and exploited by third parties. In Data Selves, Deborah Lupton develops a fresh and intriguing perspective on how people make sense of and use their personal data, and what they know about others who use this information. Drawing on feminist new materialism theory and the anthropology of material culture, she acknowledges the importance of paying attention to practices, affects, sensory and other embodied experiences, as well as discourses, imaginaries and ideas in identifying the ways in which people make and enact data, and data make and enact people. Arguing that personal data are more-than-human phenomena, invested with diverse forms of vitalities, Lupton reveals significant implications for data futures, politics and ethics. Using rich examples from popular culture and empirical research, this book illustrates the power of data imaginaries, materializations and affects. Lupton's novel approach to understanding personal data will be of interest to students and scholars in media and cultural studies, sociology, anthropology, surveillance studies, and science and technology studies.
