The 21 full research papers, 4 industry papers, and 11 short papers presented were carefully reviewed and selected from 92 submissions. The scientific program was completed with 7 workshops, 6 demonstrations and posters. The papers cover a wide spectrum of topics, such as, among others: web mining and knowledge extraction, semantic and linked data management, crawling and web research, model-driven web engineering, component-based web engineering, Rich Internet Applications (RIAs) and client-side programming, web services, and end-user development.

Object Thinking David West,2004-02-11 In OBJECT THINKING, esteemed object technologist David West contends that the mindset makes the programmer—not the tools and techniques. Delving into the history, philosophy, and even politics of object-oriented programming, West reveals how the best programmers rely on analysis and conceptualization—on thinking—rather than formal process and methods. Both provocative and pragmatic, this book gives form to what’s primarily been an oral tradition among the field’s revolutionary thinkers—and it illustrates specific object-behavior practices that you can adopt for true object design and superior results. Gain an in-depth understanding of: Prerequisites and principles of object thinking. Object knowledge implicit in eXtreme Programming (XP) and Agile software development. Object conceptualization and modeling. Metaphors, vocabulary, and design for object development. Learn viable techniques for: Decomposing complex domains in terms of objects. Identifying object relationships, interactions, and constraints. Relating object behavior to internal structure and implementation design. Incorporating object thinking into XP and Agile practice.

After the Trade Is Made, Revised Ed. David M. Weiss,2006-08-17 The fully updated classic guide to the mechanics of securities processing—a must for professional investors This third edition of After the Trade Is Made reflects the changes that have taken place in recent years as a result of new products, technological breakthroughs, and the globalization of the securities industry. Comprehensive and easy to understand, it provides brokers, operations personnel, and individual investors with definitive and up-to-the-minute explanations of each step in the trading process—from the moment a customer decides to buy or sell a security through the final requirements of record keeping. Written for both securities professionals and individual investors, whether domestic or in other countries, this new edition clearly explains the core of underwritings, new and established trading markets, transaction processing, margin, and more—while providing critical insights into the most recent wave of industry changes. David M. Weiss, a veteran securities professional, traces the entire process of buying or selling a security, from order management to transaction processing to the final posting on the firm’s books and records. He covers the specialized attributes of each function in a typical brokerage firm, as well as their relationships with commercial banks, transfer agents, clearing corporations, and depositories. After the Trade Is Made is the definitive resource for anyone eager to understand and confidently navigate the vast and often surprising world of securities.

An essential companion for any student seeking a career in the world of retail, the text focuses on the strategies that retailers both large and small are employing to thrive in this challenging economic climate, and in a marketplace where globalization, multi-channel retailing, and issues of sustainability are dominant factors.

Designing Your Website to Use Less Energy: Green Energy Websites Dale Stubbart, *Designing Your Website to Use Less Energy* explores simple changes you can make to your website that will cause it to use less energy. We don't often think about the amount of power being used to surf the Internet, but it's quite a lot. If all websites were designed to use less energy, we could save a lot of energy. One of the most important considerations when designing a website to use less energy is to make it load quickly. Part of that depends on where your website sits - your web host. Part of that depends on your images. Part depends on ads. Part depends on how simply your website is coded. In fact, Google will downgrade your web page in its search algorithm if your web page doesn't load quickly. *Designing Your Website to Use Less Energy* covers choosing a web host, performance, plug-ins and services, making your own plug-in, energy-saving colors, and printing. Performance covers lessening the impact of images, Javascript, CSS, photo frameworks, and database queries, plus other tricks you can use to make your page load faster. If you're a big corporation, there are tools from Google, Facebook, and Twitter you can use. If you're not a large corporation and don't have a lot of time, this audiobook will help you get your website loading faster and will help you save energy. The more users you have who browse your website, the more energy you'll save. Listening ease: medium. Listening level: eighth grade. Maturity: general audience.
