### **Sustainable Urban Transport in an Asian Context**

Hitoshi Ieda, 2010-02-18 Systems of transportation long ago developed out of the profound human need to connect and communicate. Transport today is still the only means for the physical movement of goods and people. Alongside the evolution of transportation and communication technologies, the astounding phenomenon of urbanization has taken place. Cities have grown faster and larger, absorbing vast influxes of dwellers who seek convenient and comfortable lifestyles with the required fast, cheap, and safe systems of

transport. Of the world's megacities, with populations of more than ten million, over half are in Asia. While enjoying large-scale economic power, Asian megacities also face serious challenges. They suffer from too-rapid urbanization, with the resulting congestion, pollution, and destruction of traditional local cultures and industries. Written by experts from Asian academic institutes, this book addresses the urgent question of how to achieve sustainability in the still-growing cities of Asia. The chapters comprise the latest research and the application of promising measures, some already realized in Asia, that include urban transport system design and management, land-use control, city planning, and sustainability. Of vast import, this volume was written for students and researchers, planners and engineers, and all who are interested in sustainable urban environments. Following is the structure and rough sketch of the contents of this book: Part I, The First Step: An Overview deals with Asian characteristics from natural, cultural, and economic viewpoints, and then describes how we should grasp the concept of urban sustainability in urban transport in Asia. Readers will understand various aspects of Asia as introductory and preparatory knowledge. Part II, Best Practices from Asia with Wisdom: Keys to Success and Facing Limitations will introduce actual comparatively successful and promising measures tried and realized in Asia. This part covers various cases from passenger transport to freight transport, from transport system design to system management, from engineering measures to people's

participation, from traffic control to land-use control and site development. Readers will find an abundance of information and examples in this main part of the book. Part III, Future of Urban Transport in Asia: Rising Asia Proposes to the World discusses key issues and hot topics of study on sustainable city and transport for the future: development and management, travel demand management, growth management, site development strategies, and financial and institutional measures.

### **The Flaming Womb** Barbara Watson

Andaya, 2006-07-31 The Princess of the Flaming Womb, the Javanese legend that introduces this pioneering study, symbolizes the many ambiguities attached to femaleness in Southeast Asian societies. Yet despite these ambiguities, the relatively egalitarian nature of male-female relations in Southeast Asia is central to arguments claiming a coherent identity for the region. This challenging work by senior scholar Barbara Watson Andaya considers such

contradictions while offering a thought-provoking view of Southeast Asian history that focuses on women's roles and perceptions. Andaya explores the broad themes of the early modern era (1500–1800)—the introduction of new religions, major economic shifts, changing patterns of state control, the impact of elite lifestyles and behaviors—drawing on an extraordinary range of sources and citing numerous examples from Thai, Vietnamese, Burmese, Philippine, and Malay societies. In the process, she provides a timely and innovative model for putting women back into world history. Andaya approaches the problematic issue of Southeast Asia by considering ways in which topography helped describe a geo-cultural zone and contributed to regional distinctiveness in gender construction. She examines the degree to which world religions have been instrumental in (re)constructing conceptions of gender—an issue especially pertinent to Southeast Asian societies because of the leading role so often played by women in indigenous ritual. She also considers the effects of the expansion of long-distance trade, the incorporation of the region into a global trading network, the beginnings of cash-cropping and wage labor, and the increase in slavery on the position of women. Erudite, nuanced, and accessible, *The Flaming Womb* makes a major contribution to a Southeast Asia history that is both regional and global in content and perspective.

**Vietnam Joins the World** James Morley, Masashi

Nishihara, 2016-09-16 Ten American and Japanese specialists offer a comprehensive analysis of one of the most dramatic developments in Asia today: the re-emergence of Vietnam - not as the belligerent champion of a militant ideology and socialist cause, but as an open, friendly country seeking a respected place in the world community. Basing their observations on five years of study, visits to Vietnam, and numerous interviews with

knowledgeable officials, scholars and businessmen there and in the United States and Japan, the authors evaluate the political, economic, social and foreign policy changes that have been taking place in Vietnam over the past decade, trace the responses of the United States and Japan and offer a policy prescription for responding to the challenges of the future.
