Current Issues in Stuttering Research and Practice Nan Bernstein Ratner, John A. Tetnowski, 2014-04-04 This state-of-the art volume is a follow-up to the 1999 publication, *Stuttering Research and Practice: Bridging the Gap*, edited by Nan Ratner and E. Charles Healey. Like its predecessor, the current book is an edited collection of the presentations from the American Speech-Language-Hearing Association's Annual Leadership Conference in Fluency and Fluency Disorders. Among the topics covered are evidence-based practice, impact of the self-help and support groups, meta-analyses of selected assessment and intervention programs, current theories of stuttering, and the predicted path of stuttering intervention in the future. The authoritative representation of contributors offers the reader the most up to date presentation of fluency issues, with a special emphasis placed on the practical clinical implications of fluency assessment, treatment, and evolving theories of the disorder. The book is written for fluency specialists and graduate students in programs of fluency disorders. It will also be valuable for the clinicians who wish to upgrade their skills in treating fluency disorders.

The Illustrated Guide to Assistive Technology and Devices Suzanne Robitaille, 2010 This book is an illustrated guide to assistive technologies and devices (AT/AD). It chronicles the use of AT/AD – technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. In general, AT can include mobility devices such as walkers and wheelchairs, as well as hardware, software, and peripherals that assist people with disabilities in accessing computers or other information technologies. Advanced AT has coincided with the advent of personal electronic devices that could be customized for use, such as computers and smart phones. For people with disabilities, AT includes simple gadgets for the home and office, electronic gadgets and complex computer systems for the workplace, mobility aids and accessible vans for getting around and modified equipment for lifestyle needs, such as talking ATMs and strobe light alarm systems. This book empowers people with disabilities to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.

Fish Marketing and Credit in Viet Nam Audun Lem, Food and Agriculture Organization of the United Nations, 2004 Recent studies show that local consumer demand for fish will continue to increase in Viet Nam. At the same time, the export-oriented fish processing industry will see a growing need

for raw materials. These substantial future demands for safe and high-quality fish products can only be met if efficient marketing arrangements are established. This paper identifies a number of constraints in the current domestic fish market, which form the basis for recommendations to improve the present marketing arrangements in Viet Nam. The paper also explores how credit is widely used for financing marine capture fisheries, particularly offshore fishing and export-oriented fish culture, processing and marketing in Viet Nam. State-owned financial institutions play a major role in financing capital expenditure while working capital requirements are mainly met by informal sources of credit. However, future investment requirements and credit needs are greater than currently available.

Abbreviations Dictionary Dean A. Stahl, Karen Landen, 2018-10-08 Published in 2001: Abbreviations, nicknames, jargon, and other short forms save time, space, and effort - provided they are understood. Thousands of new and potentially confusing terms become part of the international vocabulary each year, while our communications are relayed to one another with increasing speed. PDAs link to PCs. The Net has grown into data central, shopping mall, and grocery store all rolled into one. E-mail is faster than snail mail, cell phones are faster yet - and it is all done 24/7. Longtime and widespread use of certain abbreviations, such as R.S.V.P., has made them better understood standing alone than spelled out. Certainly we are more comfortable saying DNA than deoxyribonucleic acid - but how many people today really remember what the initials stand for? The Abbreviations Dictionary, Tenth Edition gives you this and other information from Airlines of the World to the Zodiacal Signs.

Final Sale in Berlin Christoph Kreutzmüller,2015-08-01 Before the Nazis took power, Jewish businesspeople in Berlin thrived alongside their non-Jewish neighbors. But Nazi racism changed that, gradually destroying Jewish

businesses before murdering the Jews themselves. Reconstructing the fate of more than 8,000 companies, this book offers the first comprehensive analysis of Jewish economic activity and its obliteration. Rather than just examining the steps taken by the persecutors, it also tells the stories of Jewish strategies in countering the effects of persecution. In doing so, this book exposes a fascinating paradox where Berlin, serving as the administrative heart of the Third Reich, was also the site of a dense network for Jewish self-help and assertion.

Coming Home to the Third Reich Grant W. Grams,2021-09-07 During the 1930s, Germany's industrialization, rearmament and economic plans taxed the existing manpower, forcing the country to explore new ways of acquiring Aryan-German labor. Eventually, the Third Reich implemented a return migration program which used various recruitment strategies to entice Germans from Canada and the United States to migrate home. It initially used the Atlantic Ocean to transport German-speakers, but after the outbreak of World War II, German civilians were brought from the Americas to East Asia and then to Germany via the Trans-Siberian Railway through the Soviet Union. Germany's attack on the Soviet Union in June 1941 ended this overland route, but some Germans were moved on Nazi ships from East Asia to the Third Reich until the end of 1942. This book investigates why Germans who had already established themselves in overseas countries chose to migrate back to an oppressive and authoritarian country. It sheds light on some aspects of the Third Reich's administration,

goals and achievements associated with return migration while also telling the individual stories of returnees.
