Rewind, Play, Fast Forward Henry Keazor,Thorsten Wübbena,2015-07-31 Due to shifts in the contexts of the production and presentation of the music video, more and more people start to talk about a possible end of this genre. At the same time disciplines such as visual-, film- and media-studies, art- and music-history begin to realize that despite the fact that the music video obviously has come of age, they still lack a well defined and matching methodical approach for analyzing and

discussing videoclips. For the first time this volume brings together different disciplines as well as journalists, museum curators and gallery owners in order to take a discussion of the past and present of the music video as an opportunity to reflect upon suited methodological approaches to this genre and to allow a glimpse into its future.

**Unlimited Replays** William Gibbons,2018-04-02 Classical music is everywhere in video games. Works by composers like Bach and Mozart fill the soundtracks of games ranging from arcade classics, to indie titles, to major franchises like BioShock, Civilization, and Fallout. Children can learn about classical works and their histories from interactive iPad games. World-renowned classical orchestras frequently perform concerts of game music to sold-out audiences. But what do such combinations of art and entertainment reveal about the cultural value we place on these media? Can classical music ever be video game music, and can game music ever be classical? Delving into the shifting and often contradictory cultural definitions that emerge when classical music meets video games, Unlimited Replays offers a new perspective on the possibilities and challenges of trying to distinguish between art and pop culture in contemporary society.

Expressiveness in music performance Dorottya Fabian, Renee Timmers, Emery Schubert, 2014-07-03 What does it mean to be expressive in music performance across diverse historical and cultural domains? What are the means at the disposal of a performer in various time periods and musical practice conventions? What are the conceptualisations of expression and the roles of performers that shape expressive performance? This book brings together research from a range of disciplines that use diverse methodologies to provide new perspectives and formulate answers to these questions about the meaning, means, and contextualisation of expressive performance in music. The contributors to this book explore expressiveness in music performance in four interlinked parts. Starting with the philosophical and historical underpinnings crucially relevant for Western classical musical performance it then reaches out to cross-cultural issues and finally focuses the attention on various specific problems, including the teaching of expressive music performance skills. The overviews provide a focussed and comprehensive account of the current state of research as well as new developments and a prospective of future directions. This is a valuable new book for those in the fields of music, music psychology, and music education.

The Bloomsbury Handbook of Popular Music, Space and Place Geoff Stahl, J. Mark Percival, 2022-01-13 Popular music scholars have long been interested in the connection between place and music. This collection brings together a number of key scholars in order to introduce

readers to concepts and theories used to explore the relationships between place and music. An interdisciplinary volume, drawing from sociology, geography, ethnomusicology, media, cultural, and communication studies, this book covers a wide-range of topics germane to the production and consumption of place in popular music. Through considerations of changes in technology and the mediascape that have shaped the experience of popular music (vinyl, iPods, social media), the role of social difference and how it shapes sociomusical encounters (queer spaces, gendered and racialised spaces), as well as the construction and representations of place (musical tourism, city branding, urban mythologies), this is an up-to-the-moment overview of central discussions about place and music. The contributors explore a range of contexts, moving from the studio to the stage, the city to the suburb, the bedroom to festival, from nightclub to museum, with each entry highlighting the diverse and complex ways in which music and place are mutually constitutive.

**Electronic Music School** Will Kuhn, Ethan Hein, 2021-06-18 *Electronic Music School: A Contemporary Approach to Teaching Musical Creativity* is a practical blueprint for teachers wanting to begin teaching music technology to secondary age students. Will Kuhn and Ethan Hein inspire classroom music teachers to expand beyond traditional ensemble-based music education offerings to create a culture of unique creativity and inclusivity at their schools. Part One offers an overview of the philosophical and institutional aspects of starting a music technology program, with a particular focus on the culture of electronic music surrounding digital music creation tools. Part Two dives deep into curricula for music lab classes, including several lesson examples and techniques. This section also includes abbreviated project plans for teachers who have fewer contact hours with their students. Part Three discusses how music technology courses can grow into a larger media creation program, how such a program can contribute to the broader school culture, and how project-based music learning effectively prepares students for careers in media. *Electronic Music School* also includes narratives from music technology students themselves, who often have an intuitive understanding of the future directions music technology programs can take.

**Shock and Awe** Simon Reynolds, 2016-10-11 NPR Great Read of 2016 From the acclaimed author of *Rip It Up and Start Again* and *Retromania*—"the foremost popular music critic of this era (*Times Literary Supplement*)"—comes the definitive cultural history of glam and glitter rock, celebrating its outlandish fashion and outrageous stars, including David Bowie and Alice Cooper, and tracking its vibrant legacy in contemporary pop. Spearheaded by David Bowie, Alice Cooper, T. Rex, and Roxy Music, glam rock reveled in artifice and spectacle. Reacting against the hairy, denim-clad rock bands of the late Sixties, glam was the first true teenage rampage of the new decade. In *Shock and Awe*,

Simon Reynolds takes you on a wild cultural tour through the early Seventies, a period packed with glitzy costumes and alien make-up, thrilling music and larger-than-life personas. *Shock and Awe* offers a fresh, in-depth look at the glam and glitter phenomenon, placing it in the wider Seventies context of social upheaval and political disillusion. It explores how artists like Lou Reed, New York Dolls, and Queen broke with the hippie generation, celebrating illusion and artifice over truth and authenticity. Probing the genre's major themes—stardom, androgyny, image, decadence, fandom, apocalypse—Reynolds tracks glam's legacy as it unfolded in subsequent decades, from Eighties art-pop icons like Kate Bush through to twenty-first century idols of outrage such as Lady Gaga. *Shock and Awe* shows how the original glam artists' obsessions with fame, extreme fashion, and theatrical excess continue to reverberate through contemporary pop culture.

**The Oxford Handbook of Sound and Image in Digital Media** Carol Vernallis, Amy Herzog, John Richardson, 2015-08 The Oxford Handbook of Sound and Image in Digital Media surveys the contemporary landscape of audiovisual media. Contributors to the volume look not only to changes brought by digital innovations, but to the complex social and technological past that informs, and is transformed by, new media. This collection is conceived as a series of dialogues and inquiries by leading scholars from both image- and sound-based disciplines. Chapters explore the history and the future of moving-image media across a range of formats including blockbuster films, video games, music videos, social media, digital visualization technologies, experimental film, documentaries, video art, pornography, immersive theater, and electronic music. Sound, music, and noise emerge within these studies as integral forces within shifting networks of representation. The essays in this collection span a range of disciplinary approaches (film studies, musicology, philosophy, cultural studies, the digital humanities) and subjects of study (Iranian documentaries, the Twilight franchise,

military combat footage, and Lady Gaga videos). Thematic sections and direct exchanges among authors facilitate further engagement with the debates invoked by the text.
