Media and Terrorism in the 21st Century Ismayil, Elnur, Karadogan Ismayil, Ebru, 2022-04-22 Media plays a specific role within modern society. It has been and continues to be a tool for spreading terrorist messages. However, it can just as easily be used as a tool for countering terrorism. During these challenging times where both international and domestic terrorism continue to threaten the livelihoods of citizens, it is imperative that studies are undertaken to examine the media's role in the spread of terrorism, as well as to explore strategies and protocols that can be put in place to mitigate the spread. Media and Terrorism in the 21st Century presents the emerging ideas and insights from experts, academicians, and professionals on the role media and new media plays in terrorist propaganda from a critical international perspective. It examines the historical relation between media and terror and analyzes the difficulties and obstacles presented by the relation in the 21st century. Covering topics such as AI-based dataveillance, media development trends, and virtual terrorism, this book is an indispensable resource for government officials, communications experts, politicians, security professionals, sociologists, students and educators of higher education, researchers, and academicians.

Social and Cultural Diversity in a Sporting World Chris Hallinan, Steven J. Jackson, 2008-10-01 Examines a range of cultural issues related to: nationalism, gender, race, ethnicity, indigenous culture, sexuality, (dis)ability and even religiosity. This volume explores the dimensions of cultural diversity that relate to many of the aforementioned dimensions as they are located within the context of sport.

The Climate Threat. Crisis for Democracy? Jon Naustdalslid, 2023-08-21 A key point in the book is the need to focus more seriously at the energy problem as the real problem behind global warming. The failure of global climate policies to reduce CO2 emissions and halt climate change has led an increasing number of scientist and activists to lose confidence in democracy's ability to handle climate change and led them to look to more authoritarian measures to meet the problem. The book documents these trends, also from a historical perspective, criticize them and sketches more democratic alternatives.

The Dynamics of a Terrorist Targeting Process Cato Hemmingby, Tore Bjørge, 2015-10-22 This book provides an in-depth analysis of probably the most horrific solo terrorist operation the world has ever seen. On 22 July 2011 Anders Behring Breivik killed 77 people when he bombed the Government District in Oslo, before he conducted a shooting attack against a political youth camp at Utøya. The main focus of the book is on the operational aspects of the events, particularly the target selection and decision-making process. Why did Breivik choose the targets he finally attacked, what influenced his decision-making and how did he do it? Using unique source material, providing details never published before, the authors accurately explain how even this ruthless terrorist acted under a number of constraints in a profoundly dynamic process. This momentous work is a must read for scholars, students and practitioners within law enforcement, intelligence, security and terrorism studies.

Surrender Bruce Bawer, 2010-05-04 WITH A NEW AFTERWORD In his controversial and critically acclaimed *While Europe Slept*, Bruce Bawer outlined the danger that Islamic immigration posed to traditional European values. In this provocative follow-up, he takes up the West's recent trend of silence and appeasement in the face of cultural intimidation by radical Islam. From an examination of coverage of the shocking murder of Dutch filmmaker Theo Van Gogh to the widespread denunciation of the Danish editors who published editorial cartoons mocking Mohammed, Bawer shows how radical Islam has cowed Western media, politicians, intellectuals, and religious leaders into believing that we must give up the right of free expression to peacefully coexist with the Muslim world. Fearless and excoriating, *Surrender* is an unapologetic and uncompromising defense of free speech that will stir conservatives and liberals alike.

Selvordsparadigmet Ole Jørgen Anfindsen, 2013-08-17 Forfatterens tese er at den vestlige sivilisasjon er i ferd med å begå selvmord, og at det som ødelegger bærekraften i våre samfunn, er en serie med forhold som for en stor del har sine røtter i et intellektuelt paradigme som nekter å snakke sant om menneskets natur, og som derfor fører oss inn i skjønnmalende utopier på det ene området etter det andre. Satt på spissen kan man si at vi som samfunn primært er opptatt av hvilken politisk virkning ulike utsagn har, og i mindre grad opptatt av om utsagnene stemmer med virkeligheten. Ole Jørgen Anfindsen (født 1958) er dr. scient. fra Institutt for informatikk ved Universitet i Oslo.

Volume 12, Tome II: Kierkegaard's Influence on Literature, Criticism and Art Jon Stewart, 2016-12-05 While Kierkegaard is primarily known as a philosopher or religious thinker, his writings have also been used extensively by literary writers, critics and artists worldwide who have been attracted to his creative mixing of genres, his complex use of pseudonyms, his rhetoric and literary style, and his rich images, parables, and allegories. The goal of the present volume is to document this influence in different language groups and traditions. Tome II is dedicated to the use of Kierkegaard by later Danish writers. Almost from the beginning Kierkegaard's works were standard reading for these authors. Danish novelists and critics from the Modern Breakthrough movement in the 1870s were among the first to make extensive use of his writings. These included the theoretical leader of the movement, the critic Georg Brandes, who wrote an entire book on Kierkegaard, and the novelists Jens Peter Jacobsen and Henrik Pontoppidan. The next generation of writers from the turn of the century and through the First World War also saw in Kierkegaard important points of inspiration. These included Ernesto Dalgas and Harald Kidde, who used elements of Kierkegaard's thought in their novels. Modern Danish writers such as Karen Blixen, Martin A. Hansen, and Villy Sørensen have continued to incorporate Kierkegaard into their works. There can be no doubt that Kierkegaard has indelibly stamped his name on Danish literature.

Private Policing of Economic Crime Petter Gottschalk, 2021-02-15 This book discusses private policing conducted by fraud examiners and financial crime specialists when there is suspicion of white-collar crime. The theory of convenience applies to the suspected crime, while the maturity model applies to the conducted investigation. Private policing of economic crime by fraud examiners in internal investigations is a topic of increasing concern as there is a growing business for law firms and auditing firms to conduct inquiries and reviews when there is suspicion of misconduct, wrongdoing, and crime by white-collar offenders. The key features of this book are the application of a structural model for convenience theory and the application of a maturity model for fraud examinations. The structural model assesses convenience themes for motive, opportunity, and willingness in each case study, while the maturity model assesses the level of private policing maturity in fraud examinations. For the first time, two emerging frameworks to study white-collar offenses and private policing maturity are introduced and applied to a number of cases from Denmark, Iceland, Moldova, the Netherlands, Norway, Sweden, and Switzerland. This book will be essential to those studying law, business, and criminology, as well as practicing fraud examiners.

Bodies, Symbols and Organizational Practice Agnes Bolsø, Stine Helena Bang Svendsen, Siri Øyslebø Sørensen, 2017-10-06 Despite all the efforts to promote change, power and authority still seem to be permanently associated with the white, the straight and the masculine, both symbolically and in the everyday world of organizations. As the intricate relationship between the symbolic and the everyday remains under-researched, this anthology proposes a transdisciplinary feminist perspective drawing on the humanities in order to explore the complex nature of the gendered politics of organizations. Indeed, analyzing how images, narratives, symbols and bodies are all part of how power and gender are constructed in organizations through a broad and international range of empirical studies, *Bodies, Symbols and Organizational Practice* explores issues at the interstices of the humanities and social sciences, combining theoretical and analytical perspectives from both areas. Providing a radical analysis of the gendered dynamics of power as well as petitioning for radical intervention into those dynamics, this timely volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as: Organization and Management Studies, Gender studies, Feminist theory and Sociology of Work & Industry.

Beyond Memory Alexandre Dessingué, Jay M. Winter, 2015-08-14 *Beyond Memory: Silence and the Aesthetics of Remembrance* analyses the intricate connections between silence, acts of remembrance and acts of forgetting, and relates the topic of silence to the international research field of Cultural Memory Studies. It engages with the most recent work in the field by viewing silence as a remedy to the traditionally binary approach to our understanding of remembering and forgetting. The international team of contributors examine case studies from colonialism, war, politics and slavery from across the globe, as well as drawing examples from literature, philosophy and sites of memory to draw three main conclusions. Firstly, that the relationship between remembering and forgetting is relational rather than 'hermetic', and the space between the two is often occupied by silence. Secondly, silence is a force in itself, capable of stimulating more or less remembrance. Finally, that silence is a necessary and key element in the interaction between the human mind and the 'outer world', and enables people to challenge their understanding of art, music, literature, history and memory. With an introduction by the editors discussing Memory Studies, and concluding remarks by Astrid Erll, this collection demonstrates that acceptance and consideration of silence as having both a performative and aesthetic dimension is an essential component of history and memory studies.

Magnús Eiríksson Gerhard Schreiber, Jon Stewart, 2017-03-06 The present volume is the first anthology devoted to the Icelandic theologian and religious author Magnús Eiríksson (1806-81), a forgotten contemporary of Søren Kierkegaard in Golden Age Denmark. With his remarkably modern views, thoughts and ideas of society, politics, and religion, Eiríksson has taken on the role of a widely unknown pioneer in various contexts. As early as in his debut book, *On Baptists and Infant Baptism* (1844), Eiríksson made a name for himself as a devoted advocate of tolerance and freedom of thought and conscience in matters of religion. Although Eiríksson's numerous and multifaceted writings provoked a wide spectrum of reactions by members of the Danish society, the central figures at that time constantly took care to avoid engaging Eiríksson or his ideas in public debate and

instead met him with lofty silence. The present volume aims to end this silence, which has continued after Eiríksson's death, and it marks the beginning of a serious discussion of Eiríksson's works and ideas. The articles featured in this anthology are written by international scholars from different fields. With its strategic organization the collection covers the key topics of Eiríksson's writings and provides insights into his historical-cultural background. Understanding Eiríksson's polemics with his Copenhagen contemporaries - such as Hans Lassen Martensen, Henrik Nicolai Clausen, N.F.S. Grundtvig and Søren Kierkegaard - on some of the main theological issues of the day sheds light on the period as a whole and provides a new perspective on the complex and diverse discussions concerning religion in the Golden Age.

Western Europe 2003 Europa Publications,2002-11-30 This edition brings together analyses, statistics and directory data on the countries and territories of Western Europe.

Anders Breivik and the Rise of Islamophobia Sindre Bangstad,2014-06-12 In late July 2011, Norway was struck by the worst terror attacks in its history. In a fertilizer-bomb attack on Government Headquarters in Oslo and a one-hour-long shooting spree at the Labour Party Youth Camp at Utøya, seventy-seven people, mostly teenagers, were killed by Anders Behring Breivik. By targeting young future social democratic leaders, his actions were meant to lead to the downfall of Europe's purportedly multiculturalist elites, thus removing an obstacle to his plans for an ethnic cleansing of Muslims from Europe. In this highly original work, leading Norwegian social anthropologist Sindre Bangstad reveals how Breivik's beliefs were not simply the result of a deranged mind, but rather they are the result of the political mainstreaming of pernicious racist and Islamophobic discourses. These ideas, currently gaining common currency, threaten equal rights to dignity, citizenship and democratic participation for minorities throughout contemporary Europe. An authoritative account of the Norwegian terror attacks and the neo-racist discourse that motivated them.

New Challenges and Solutions for Renewable Energy Paul Midford,Espen Moe,2021-02-12 This book identifies second stage challenges and opportunities for expanding renewable energy into a mainstay of electricity generation that can replace fossil fuels and nuclear power, comparing Japan with several countries in East Asia and Northern Europe. Environmentally sustainable renewable energy technologies have now overtaken fossil fuel and nuclear technologies in terms of total global investment, and the costs of these technologies and related ones (e.g. storage batteries) are rapidly falling. Yet renewable energy use varies greatly from country to country. Major second stage obstacles to replacing fossil and nuclear-fueled electricity generation include the lack of electricity grid capacity and storage assets. Opportunities and solutions include expanding grids regionally and internationally, building flexible smart grids that offer better demand management, and policies that promote the expansion of storage assets, especially grid batteries and hydrogen. In addition, two key factors – electricity market restructuring through unbundling transmission from electricity generating companies; and electricity market liberalization, especially for retail customers – allow consumers to choose power companies based not only on price, but also on method of generation, especially fossil or nuclear generation versus renewable energy.

Searching for a 'Principle of Humanity' in International Humanitarian Law Kjetil Mujezinović Larsen,Camilla Guldahl Cooper,Gro Nystuen,2012-11-08 The legal norms of International Humanitarian Law are the product of a compromise between humanitarian considerations and the demands of military necessity. In *Searching for a 'Principle of Humanity' in International Humanitarian Law*, international legal scholars consider whether humanitarian considerations have an independent legal impact on IHL beyond the formation of these norms. They ask whether a 'principle of humanity' can be said to have legal force in its own right. Moreover, the book investigates whether regional or national differences are emerging regarding the import and emphasis placed on humanitarian considerations. For instance, do states which are not directly affected by armed conflict attach a greater weight to humanitarian considerations when interpreting and applying IHL than those states which are more directly involved in armed conflicts? Specifically, this book examines whether a particular 'Nordic perspective' can be identified, owing to those states' involvement in armed conflicts outside their own territories in the post-Second World War era.

Public Brainpower Indra Overland,2017-10-26 This book discusses how civil society, public debate and freedom of speech affect the management of natural resources. Drawing on the work of Robert Dahl, Jürgen Habermas and Robert Putnam, the book introduces the concept of public brainpower. Good governance of natural resources requires fertile public debate – to conceive new institutions, to provide checks and balances on existing institutions and to ensure their continuous dynamic evolution as the needs of society change. The book explores the strengths and weaknesses of these ideas through case studies of 18 oil and gas-producing countries: Algeria, Angola, Azerbaijan, Canada, Colombia, Egypt, Iraq, Kazakhstan, Libya, the Netherlands, Nigeria, Norway, Qatar, Russia, Saudi Arabia, the UAE, the UK and Venezuela. The concluding chapter presents 10 tenets on how states can maximize their public brainpower, as well as a ranking of how well 33 resource-rich countries have succeeded in doing so. Four of the chapters – 'Introduction', 'Norway', 'Kazakhstan' and 'Russia' – are available under a CC BY 4.0 Open Access license at link.springer.com.

Political Communication and COVID-19 Darren Lilleker,Ioana A. Coman,Miloš Gregor,Edoardo Novelli,2021-03-19 This edited collection compares and analyses the most prominent political communicative responses to the outbreak and global spread of the COVID-19 strain of coronavirus within 27 nations across five continents and two supranational organisations: the EU and the WHO. The book encompasses the various governments'

communication of the crisis, the role played by opposition and the vibrancy of the information environment within each nation. The chapters analyse the communication drawing on theoretical perspectives drawn from the fields of crisis communication, political communication and political psychology. In doing so the book develops a framework to assess the extent to which state communication followed the key indicators of effective communication encapsulated in the principles of: being first; being right; being credible; expressing empathy; promoting action; and showing respect. The book also examines how communication circulated within the mass and social media environments and what impact differences in spokespersons, messages and the broader context has on the success of implementing measures likely to reduce the spread of the virus. Cumulatively, the authors develop a global analysis of the responses and how these are shaped by their specific contexts and by the flow of information, while offering lessons for future political crisis communication. This book will be of great interest to students and researchers of politics, communication and public relations, specifically on courses and modules relating to current affairs, crisis communication and strategic communication, as well as practitioners working in the field of health crisis communication.

Museums, the Media and Refugees Katherine Goodnow,Jack Lohman,Philip Marfleet,2008-03-01 Across countries and time, asylum-seekers and refugees have been represented in a variety of ways. In some representations they appear negatively, as dangers threatening to ‘over-run’ a country or a region with ‘floods’ of incompatible strangers. In others, the same people are portrayed positively, with compassion, and pictured as desperately in need of assistance. How these competing perceptions are received has significant consequences for determining public policy, human rights, international agreements, and the realization of cultural diversity, and so it is imperative to understand how these images are perpetuated. To this end, this volume reflects on museum practice and the contexts, stories, and images of asylum seekers and refugees prevalent in our mass media. Based on case studies from Australia, New Zealand, and the United Kingdom, the overall findings are illustrative of narratives and images common to museums and the media throughout the world. They aim to challenge political rhetoric and populist media imagery and consider what forms of dissent are likely to be sustained and what narratives ultimately break through and can lead to empathy and positive political change.
