9/11 and the Design of Counterterrorism Institutions Michael Karlsson,2016-03-16 How did the North European states react to the terrorist attacks in the United States on September 11, 2001? Michael Karlsson argues that 9/11 led to a considerable pressure to strengthen rules and practices for counterterrorism and security, but that this pressure was mediated by several other conditions. The reforms were also affected by, among other things, how the threat of global terrorism was perceived, pressure from international institutions such as the UN, EU, and NATO, the domestic political context, and pre-existing rules and practices. His analysis uses the new institutionalism framework, tested through case studies of Denmark, Sweden, Finland, Estonia, Latvia, and Lithuania. The book offers a unique lens on the study of counterterrorism from a new theoretical and regional perspective.

Hundra fristående kolumner i Dagens Nyheter P. C. Jersild,2017-04-03 PC Jersild är en av Sveriges främsta opinionsbildare; både som romanförfattare och debattör har han väckt diskussion ända sedan sextiotalet. Under åren 1987-2001 har han publicerat närmare tre hundra kolumner på Dagens Nyheters ledarsida. I denna bok har han samlat hundra av dessa kolumner, i vilka han med omisskännlig skärpa fördjupar och intensifierar diskussionen, prövar och omprövar idéer och tankar. Ämnesvalet är varierat och ändå konsekvent - såväl inrikespolitik som världsfrågor, såväl religion som genteknik, såväl rätten till ett värdigt liv som rätten till en värdig död. Med ständigt överraskande infallsvinklar och respektlös humor ställer PC Jersild samtidens viktiga frågor i blixtbelysning. Urvalet är osystematiskt, skriver PC Jersild i förordet. Jag har i första hand tagit med de texter som jag tycker bäst om, oberoende av ämne. Jag har sedan försökt hitta någon sorts indelningsprincip - och misslyckats. Tanken var att inordna texterna under rubriker som Inrikespolitik, Utrikespolitik, Sjukvård, Etik och Diverse. Men vid närmare granskning visar det sig svårt att upprätthålla dessa skiljelinjer, det ena går i det andra. Jag har därför valt en rent kronologisk ordning, de äldsta texterna först, de yngsta sist. För den som inte har lust att läsa alla kolumner finns dock ett ämnesregister längst bak i boken. Kolumnerna publiceras i originalskick, enstaka stav- och korrekturfel är dock rättade.

Enter Culture, Exit Arts? Semi Purhonen,Riie Heikkilä,Irmak Karademir Hazir,Tina Lauronen,Carlos J. Fernández Rodríguez,Jukka Gronow,2018-09-26 Key debates of contemporary cultural sociology – the rise of the ‘cultural omnivore’, the fate of classical ‘highbrow’ culture, the popularization, commercialization and globalization of culture – deal with temporal changes. Yet, systematic research about these processes is scarce due to the lack of suitable longitudinal data. This book explores these questions through the lens of a crucial institution of cultural mediation – the culture sections in quality European newspapers – from 1960 to 2010. Starting from the framework of cultural stratification and employing systematic content analysis both quantitative and qualitative of more than 13,000 newspaper articles, Enter Culture, Exit Arts? presents a synthetic yet empirically rich and detailed account of cultural transformation in Europe over the last five decades. It shows how classifications and hierarchies of culture have changed in course of the process towards increased cultural heterogeneity. Furthermore, it conceptualizes the key trends of rising popular culture and declining highbrow arts as two simultaneous processes: the one of legitimization of popular culture and the other of popularization of traditional legitimate culture, both important for the loosening of the boundary between ‘highbrow’ and ‘popular’. Through careful comparative analysis and illustrative snapshots into the specific socio-historical contexts in which the newspapers and their representations of culture are embedded – in Finland, France, Spain, Sweden, Turkey and the UK – the book reveals the key patterns and diversity of European variations in the transformation of cultural hierarchies since the 1960s. The book is a collective endeavour of a large-scale international research project active between 2013 and 2018.

Foreign News Ulf Hannerz,2012-04-26 Foreign News gives us a fascinating, behind-the-scenes look into the practices of the global tribe we call foreign correspondents. Exploring how they work, Ulf Hannerz also compares the ways correspondents and anthropologists report from one part of the world to another. Hannerz draws on extensive interviews with correspondents in cities as diverse as Jerusalem, Tokyo, and Johannesburg. He shows not only how different story lines evolve in different correspondent beats, but also how the correspondents' home country and personal interests influence the stories they write. Reporting can go well beyond coverage of a specific event, using the news instead to reveal deeper insights into a country or a people to link them to long-term trends or structures of global significance. Ultimately, Hannerz argues that both anthropologists and foreign correspondents can learn from each other in their efforts to educate a public about events and peoples far beyond our homelands. The result of nearly a decade's worth of work, Foreign News is a provocative study that will appeal to both general readers and those concerned with globalization.

UFOs and Government Michael Swords,Robert Powell,2012 Governments around the world have had to deal with the UFO phenomenon for a good part of a century. How and why they did so is the subject of UFOs and Government, a history that for the first time tells the story from the perspective of the governments themselves. It's a perspective that reveals a great deal about what we citizens have seen, and puzzled over, from the outside for so many years. The story, which is unmasked by the governments' own documents, explains much that is new, or at least not commonly known, about the seriousness with which the military and intelligence communities approached the UFO problem internally. Those approaches were not taken lightly. In fact, they were considered matters of national security. At the same time, the story reveals how a subject with such apparent depth of experience and interest became treated as if it were a triviality. And it explains why one government, the

United States government, deemed it wise, and perhaps even necessary, to treat it so. Though the book focuses primarily on the U. S. government's response to the UFO phenomenon, also included is the treatment of the subject by the governments of Sweden, Australia, France, Spain, and other countries. This large-format, fully illustrated book is the result of a team effort that called itself The UFO History Group, a collection of veteran UFO historians and researchers who spent more than four years researching, consulting, writing, and editing to present a work of historical scholarship on government response to the UFO phenomenon. Michael Swords was the primary author of the United States chapters. The work was coordinated and edited by Robert Powell. Clas Svahn, Vicente-Juan Ballester Olmos, Bill Chalker, and Robert Powell contributed country chapters. Jan Aldrich was the primary content consultant, with additional content consultation and writing coming from Barry Greenwood and Richard Thieme. Steve Purcell was the primary photo illustration editor. From the foreword by Jerome Clark: While UFOs and Government revisits an often unhappy history, the reading of it is far from an unhappy experience. The authors, eloquent, intelligent, sophisticated, and conscientious, provide us with the first credible, comprehensive overview of official UFO history in many years... Most of the current volume deals with U.S. military and intelligence responses to the UFO phenomenon, but it also features richly informative chapters that expand the story across the international arena. If you're looking for an example of a nation that dealt productively with the UFO reports that came its official way, you will take heart in the chapter on the French projects... From here on, every responsible treatment of UFOs and government will have to cite UFOs and Government prominently among its sources... this is the real story as accurately as it can be reconstructed in the second decade of the new century. I expect to keep my copy close at hand and to return to it often. While it cannot be said of many books, UFO-themed or otherwise, this is among the essential ones. Stray from it at your peril.

Sex Work, Mobility & Health Sophie Day, Helen Ward, 2014-06-03 First published in 2004. Major changes have taken place in the sex industry in Europe. Over the past decade we have seen increasing migration and diversification, along with major shifts in policy towards the industry. There is very little published on sex work in Europe, but the demand is growing for information and analyses of the situation today from people working on health, policy, gender and employment. The authors of this book examine sex work in terms of economic and social restructuring, concerns about infection and recent policy developments on prostitution.

Swedish Economists in the 1930s Debate on Economic Planning Benny Carlson, 2018-12-06 The 1930s, characterised by repercussions from World War I and the Great Depression, was an era of populism, nationalism, protectionism, government intervention and attempts to create planned economies. The perceived need for economic planning emerged in Sweden in part due to the increasing political strength of the Social Democrats and their evolution from a party hampered by Marxist fatalism to a pragmatic mass movement. The Swedish debate continued beyond World War II and is still relevant to today's economic crises, which have resulted in a demand for action coming from below (populism) and above (elitism). Carlson surveys the arguments for and against economic planning as they were put forward by leading Swedish economists in the 1930s, with a focus on the thoughts of Gustav Cassel, Eli Heckscher, Gösta Bagge, Gunnar Myrdal and Bertil Ohlin, among others. In so doing he provides a timely exploration of the debate on the necessary and desirable extent of state intervention in market economies.

MANAGING CRISES Uriel Rosenthal, Arjen Boin, Louise K. Comfort, 2001-01-01 In this book, the editors, with 25 notable contributors, expand the knowledge of crisis management, focusing on case studies of high-profile events that have occurred in recent history. Part One of the text aims at theoretical development through empirical case studies and also postulates a crisis typology and charts specific theoretical and administrative challenges. The 'case bank,' which comprises the bulk of the book, is presented in four additional sections. The first deals with the development of crises and compares the infamous Watts riots with the 1992 L.A. riots. It also analyzes the fragmented and complex international environment that allowed the 'safe area' in Bosnia to be overrun by Bosnian Serbs in 1995. The final chapter chronicles the incredible human costs of mismanaged crisis in the Rwanda massacres in 1994. The second section explores the many decisional dilemmas that confront crisis managers. Cases include the fire at the Piper Alpha oil rig; the 1999 Turkish earthquakes; the Eindhoven, Holland plane crash; and crisis management of the Mad Cow epidemic disease in the U.K. The third section explores the long-term dimensions of crises and crisis management and particularly the development of national traumas such as the assassination of Sweden's Prime Minister Olaf Palme in 1986, the 1992 Amsterdam air crash, and the TWA flight 800 disaster in 1996. The final section shifts focus to future scenarios such as speculative information technology disasters, potentially devastating viral epidemics, deteriorating environmental and societal conditions in Russia, the southwest U.S. coming water shortage, and the outlook for Japan, one of the world's most disaster-prone countries. Summarizing the research findings of the past decade, the authors describe patterns in the paths toward crises, the dilemmas and coping mechanisms that emerge during the thick of crisis, and, very importantly, the pathways that lead away from crisis.

Twelve Figures in Swedish Economics Mats Lundahl, 2022-04-01 This book explores the development of economic thought in Sweden through some of the people who shaped it. The book highlights both some of the well-known contributions and some overlooked areas of research. It begins with the origins of the pioneer neoclassical Heckscher-Ohlin theorem and Gunnar Myrdal's circular, cumulative approach to economic development. Secondly, it focuses on a number of economists related to the Industrial Institute of Economic and Social Research: Ingvar Svennilson, Axel Iveroth, Jan Wallander, Erik Höök, Villy Bergström and Rolf Henriksson. Finally, it offers portraits of three economists from Lund University: Bo Södersten, Ingemar Ståhl and Göte Hansson. The work of all of them is placed within the context of the contemporary academic and public economic debate. This book aims at providing a perspective on the legacy of the Swedish tradition in economics and will be relevant to students and academics interested in the history of economic thought.

Changing News Use Irene Costera Meijer, Tim Groot Kormelink, 2020-11-09 Changing News Use pulls from empirical research to introduce and describe how changing news user patterns and journalism practices have been mutually disruptive, exploring what journalists and the news media can learn from these changes. Based on 15 years of audience research, the authors provide an in-depth description of what people do with news and how this has diversified over time, from reading, watching, and

listening to a broader spectrum of user practices including checking, scrolling, tagging, and avoiding. By emphasizing people’s own experience of journalism, this book also investigates what two prominent audience measurements – clicking and spending time – mean from a user perspective. The book outlines ways to overcome the dilemma of providing what people apparently want (attentiongrabbing news features) and delivering what people apparently need (what journalists see as important information), suggesting alternative ways to investigate and become sensitive to the practices, preferences, and pleasures of audiences and discussing what these research findings might mean for everyday journalism practice. The book is a valuable and timely resource for academics and researchers interested in the fields of journalism studies, sociology, digital media, and communication.

Recognising European Modernities Allan Pred,2014-02-25 For over a century, Europe has been characterised by a plurality of capitalist modernities. At any moment, each country possesses its own distinctly modern qualities which are partly shaped through interrelationships with other countries. Each European commodity society has experienced successive, but different overlapping, periods of industrial modernity (large scale factories and urban growth), high modernity (social modernization promoted by social engineering) and hypermodernity (the acceleration of modernity, yielding new circumstances and sensibilities). Interrogating contemporary hypermodern Europe thus requires an exploration of industrial and high modern Europe. Recognising European Modernities explores a century of civilisation through a critical examination of the extreme case of Sweden. Using montage - relayering multiple pasts and on-going present - the book challenges the contemporary obsession with postmodernity, demanding a deeper, more connective understanding of the pleasures and dangers of the European present. The author visits three spectacular spaces: the Stockholm Exhibition of 1897, the Stockholm Exhibition of 1930 and the Globe, a contemporary multi-purpose arena. Analysis of these pivotal spaces reveals the on-going process of modernization as new forms of consumption are repeatedly entangled in changing discourses of power to be reworked and translated into cultural politics.
