Financing Healthcare in China Sabrina Ching Yuen Luk, 2016-07-22 China's current social medical insurance system has nominally covered more than 95 per cent of 1.4 billion population in China and is moving towards the ambitious goal of universal health insurance coverage. Challenges posed by a rapidly ageing population, an inherently discriminatory design of the health insurance system, the disorder of drug distribution system and an immature legal system constrain the Chinese government from realizing its goal of universal health insurance coverage in the long run. This book uses a refined version of historical institutionalism to critically examine China's pathway to universal health insurance coverage since the mid-1980s. It pays crucial attention to the processes of transforming China's healthcare financing system into the basic social medical insurance system alongside rapid socio-economic changes. Financing Healthcare in China will interest researchers and government and think-tank officials interested in the state of healthcare reforms in China. Healthcare specialists outside of East Asia may also be interested in its general study of healthcare in developing countries. Scholars and students interested in the healthcare field will also find this useful.

China-Focused Cases CEIBS Case Center, 2019-03-01 This book is the first anthology compiled in English by the CEIBS Case Center to promote China-focused cases worldwide. Included are ten of twenty six award-winning cases from the Global Contest for the Best China-Focused Cases during 2015 to 2017: these works exemplify the quality of effective business cases and share stories of China to the world. Each of the ten cases has a defining feature. Some cases, with a focus on user demand, analyze how companies build their core competence (e.g., Haidilao Hot-Pot and OnePlus Mobile Phone), while others present an array of business innovations in the era of new retail, e-commerce, and the sharing economy (e.g., SF Express, Jinhubao, ofo, FamilyMart, and Handu Apparel). Some describe Chinese companies' operations in the overseas market (e.g., Huawei and TECNO), and others depict how foreign companies adapt to the Chinese market in a unique way (e.g., Starbucks). These cases were drawn from Chinese and overseas business schools. The book helps bridge the gap between the world management community's interest in China and the limited availability of China-focused management cases. We hope this collection of select cases will prove valuable and informative for our readers.

Engineering Communist China You-Li Sun, Dan Ling, 2003 Dan Ling, a patriotic young engineer eager to help build a new China, falls afoul of the authorities and spends 17 years as a political prisoner. Rehabilitated after Deng Xiaoping came to power, Dan returns to work with unflagging determination to help provide a good life for himself and his people after enduring prison, work camps and work farms, and the primitive life of the social outcast breaking new ground on the frozen northern frontier. Lings personal story is interwoven with glimpses of rural and urban life from the 1950s to the 1970s as China fought to make the wrenching leap from a feudalistic to a modern society. Ancient practices alternate with breath-taking and misguided experimentation as the common man is called upon to stride boldly into the unknown but no doubt glorious future. Scenes of naivety, brutality, generosity and pettiness, personal bonds and vendettas, illustrate how peasants, workers and intellectuals survived in the evolving Communist system. This is an expose written without rancor, and a heartening story of faith in man's ability to progress.

Ethnicity and Religion in Southwest China He Ming, David C. Lewis, 2020-12-23 As China strengthens its links with its neighbours through its Belt and Road initiative, there is growing interest in the indigenous peoples of China's western and southwestern borderlands. This book, based on extensive original research, considers the indigenous peoples of Yunnan province, which is a major gateway between China and the countries of south and south-east Asia. Unlike many books on China's indigenous peoples which are written by foreigners who have lived for a while in China, this book is comprised of the work of Chinese scholars, many of them members of ethnic minorities themselves, and considers the issues from a Chinese perspective.

Law and Practice of Crowdfunding and Peer-to-Peer Lending in Australia, China and Japan Pelma Rajapakse, Yinxu Huang, Hatsuru Morita, 2022-08-03 The revolution in financial technology (FinTech) has created many advancements in the lending and investment space across the world. Law and Practice of Crowdfunding and Peer-to-Peer Lending in Australia, China, and Japan is a timely publication as FinTech grows up and moved into the mainstream of finance in the last decade. Financial services is a highly regulated industry as it is the lifeblood of a modern economy. Pelma Rajapakse, Hatsuru Morita, and Yinxu Huang have done very solid work blazing a new trail in what is a new industry and how to regulate it properly instead of stifling innovation. They have carried out a deep exploration and a thorough compilation of research that will bring everyone up to date on what Australia, China, and Japan are planning and doing in the field of crowdfunding and peer-to-peer lending. In addition to peer-to-peer lending, the book focuses on laws and practices related to Central Bank digital currencies, cryptocurrency, Bitcoin, and Initial Coin Offerings (ICOs) which is very meaningful and forward-looking. The authors presented their thoughts in such clarity that, even those who lack familiarity with Asia-Pacific, will see how FinTech was growing in various ways driven by different factors. For example, peer-to-peer lending in Japan is mostly for small and medium enterprises. It was popular in China but cracked down by the authorities for a few years. It provides an alternative fundraising channel for the capital market in Australia. We also see a set of regulatory approaches among jurisdictions. Some countries draft new regulations, while others amend existing laws. The mechanism of the regulatory sandbox was introduced. As we know, one size does not fit all. What kind of best practices or lessons learned can we apply to our own jurisdiction? This book covers all available answers to date. This volume speaks highly of the quality and foresight of Pelma Rajapakse and her co-authors.

Government Performance Management in China Bin Wu, 2019-07-30 This book explains the basic concepts of the performance management, including the achievement of government goals, management capacity, administrative efficiency and policy effects. Taking Hangzhou, one of the largest cities in China, as an example, the book offers readers a new dimension through which the government can be understood and reformed—performance. Performance management has become an important component of public administration in China, and its use is beneficial in evaluating performance and social benefit. It also incentivizes civil servants to become more motivated and innovative, prevents the development of a bureaucratic atmosphere and facilitates communication between the public sector and the people. The book first introduces the concept of the performance management, providing a detailed description of its history, basic theories and its development. It then discusses the evolution of the system (from objective-based responsibility system evaluation to “vote for excellence”), its three basic areas

(performance management on the national, local and municipal levels) and its key components: openness, democracy, accountability and performance. This book allows readers to gain a deeper understanding of the importance of government performance management in China and its contribution to the modernization of state governance and political legitimacy.
