Assisted Dying Sheila McLean, 2007-11-27 Assisted Dying explores the law relating to euthanasia and assisted suicide, tracing its development from prohibition through to the laissez faire attitude adopted in a number of countries in the 21st Century. This book provides an in-depth critique of the arguments surrounding legislative control of such practices and particularly looks into the regulatory role of the state. In the classical tradition of libertarianism, the state is generally presumed to have a remit to intervene where an individual's actions threaten another, rather than harm the individuals themselves. This arguably leaves a question mark over the state's determined intervention, in the UK and elsewhere, into the private and highly personal choices of individuals to die rather than live. The perceived role of the state in safeguarding the moral values of the community and the need for third party involvement in assisted suicide and euthanasia could be thought to raise these practices to a different level. These considerations may be in direct conflict with the so called right to die espoused by some individuals and groups within the community. However this book will argue that the state's interests are and should be second to the interests that the people themselves have in choosing their own death. Assisted Dying is winner of the The Minty Prize of the Society of Authors, and winner of the Royal Society of Medicine Book Awards, 2008

The B-29 Superfortress Robert A. Mann, 2015-07-11 The B-29 Superfortress was for many years a cornerstone of American military aviation. Best known as a bomber, it also served in reconnaissance, as a tanker, and as a rescue plane. It was a crucial tool for American and Allied forces during World War II, Korea and beyond. This operational history of the B-29 gives in-depth information on the career of each plane. A list of the names and serial numbers of the planes, each plane's history from delivery date to removal from service, a description of the B-29's physical characteristics and performance parameters, and a description of the five B-29 variants are provided. Sections of the book give complete mission data for the B-29's World War II service in the China-Burma-India theater of operations, operations over Japan, aerial mining missions and test atomic bombing runs.
