**Space Team** BARRY J. HUTCHISON, 2018-11-04 After Earth is all-but wiped out by alien invaders, petty criminal, Cal Carver, finds himself abducted and thrown into a team of intergalactic criminals in this bestselling sci-fi comedy from award-winning author, Barry J. Hutchison.

Burt Rutan's Race to Space Dan Linehan, 2011-07-17 Years ago, Burt Rutan told a reporter for Popular Mechanics, "If we make a courageous decision like the goal and program we kicked off for Apollo in 1961, we will see our children or grandchildren in outposts on other planets." Legendary science-fiction writer Arthur C. Clark would later recall Rutan's quote in a piece he wrote about SpaceShipOne and comment, "Fortunately, we need not rely solely on governments for expanding humanity's presence beyond the Earth." Burt Rutan's Race to Space showcases Rutan's herculean efforts to do just that. Smithsonian's Air and Space Museum displays his most celebrated achievements, including SpaceShipOne, which won the coveted \$10 million Ansari X Prize for private spaceflight; Voyager, which hangs with SpaceShipOne in the Milestones of Flight gallery; the Virgin Atlantic GlobalFlyer; and the VariEze. His many aerospace innovations preceding his most recently conceived designs, SpaceShipTwo and WhiteKnightTwo, chronicle a progressive, step-by-step attempt to break barriers with engineering know-how and a wondrous imagination, all the while remaining on the forefront of the burgeoning private spaceflight industry. Rutan's X Prize triumph and subsequent spacecraft designs are not a beginning, nor an end, but are steps in Burt Rutan's

continuing adventure to expand humanity's presence beyond the Earth and into space.

*Mapping the Limits of Space* Alistair Robinson, 2018-03-09 Mapping the Limits of Space surveys English artist Dan Holdsworth's 20-year career. Since 1996 Holdsworth has explored the extreme territories that characterise humans' changing relationship to the 'natural' world in the Anthropocene. The volume also reveals Holdsworth's (\*1974) most recent body of work. Since 2012 the artist has worked with academic geologists to map the exact contours of Alpine glaciers, using drones, lasers, photography, and high-end software used by the military and academy. We encounter millions of points in space, each millimetre-perfect, that plot the outline of a changing landscape. Produced in collaboration with the Northern Gallery for Contemporary Art, the publication offers new insights into Holdsworth's innovative practice. Exhibition: 16.12.2017-17.3.2018, Graves Gallery, Sheffield, 1.6.-30.8.2018 Northern Gallery for Contemporary Art, Sunderland

*Noncommutative Geometry and Physics 3* Giuseppe Dito, Motoko Kotani, Yoshiaki Maeda, Hitoshi Moriyoshi, Toshikazu Natsume, Satoshi Watamura, 2013-01-11 Noncommutative differential geometry is a novel approach to geometry, aimed in part at applications in physics. It was founded in the early eighties by the 1982 Fields Medalist Alain Connes on the basis of his fundamental works in operator algebras. It is now a very active branch of mathematics with actual and potential applications to a variety of domains in physics ranging from solid state to quantization of gravity. The strategy is to formulate usual differential geometry in a somewhat unusual manner, using in particular operator algebras and related concepts, so as to be able to plug in noncommutativity in a natural way. Algebraic tools such as K-theory and cyclic cohomology and homology play an important role in this field. It is an important topic both for mathematics and physics. Contents: K-Theory and D-Branes, Shonan: The Local Index Formula in Noncommutative Geometry Revisited (Alan L Carey, John Phillips, Adam Rennie and Fedor A Sukochev) Semi-Finite Noncommutative Geometry and Some Applications (Alan L Carey, John Phillips and Adam Rennie) Generalized Geometries in String Compactification Scenarios (Tetsuji Kimura) What Happen to Gauge Theories under Noncommutative Deformation? (Akifumi Sako) D-Branes and Bivariant K-Theory (Richard J Szabo) Two-Sided Bar Constructions for Partial Monoids and Applications to K-Homology Theory (Dai Tamaki) Twisting

**Culturally Sustainable Social Robotics** M. Nørskov, J. Seibt, O.S. Quick, 2021-01-04 The subject of social robotics has enormous projected economic significance. However, social robots not only present us with novel opportunities but also with novel risks that go far beyond safety issues. It is a potentially highly disruptive technology which could negatively affect the most valuable parts of the fabric of human social interactions in irreparable ways. Since engineering educations do not yet offer the necessary competences to analyze, holistically assess, and constructively mitigate these risks, new alliances must be established between engineering and SSH disciplines, with special emphasis on the humanities (i.e. disciplines specializing in the analysis of socio-cultural interactions and human experience). The Robophilosophy Conference Series was established in 2014 with the purpose of creating a new forum and catalyzing the research discussion in this important area of applied humanities research, with focus on robophilosophy. Robophilosophy conferences have been the world's largest venues for humanities research in and on social robotics. The book at hand presents the proceedings of Robophilosophy Conference 2020: Culturally Sustainable Social Robotics, the fourth event in the international, biennial Robophilosophy Conference Series, which brought together close to 400 participants from 29 countries. The speakers of the conference, whose contributions are collected in this volume, were invited to offer concrete proposals for how the Humanities can help to shape a future where social robotics is guided by the goals of enhancing socio-cultural values rather than by utility alone. The book is divided into 3 parts; Abstracts of Plenaries, which contains 6 plenary sessions; Session Papers, with 44 papers under 8 thematic categories; and Workshops, containing 25 items on 5 selected topics. Providing concrete proposals from philosophers and other SSH researchers for new models and methods, this book will be of

interest to all those involved in developing artificial 'social' agents in a culturally sustainable way that is also – a fortiori – ethically responsible.

*Storms of My Grandchildren* James Hansen, 2011-01-04 \_\_\_\_\_ 'When the history of the climate crisis is written, Hansen will be seen as the scientist with the most powerful and consistent voice calling for intelligent action to preserve our planet's environment' - Al Gore 'Few people know more about climate change than James Hansen ... This unnerving and fluently written book is the definitive one to read' - BBC Wildlife 'Anyone concerned about the world our children and grandchildren must inherit owes it to themselves to read this book' - Irish Times \_\_\_\_\_ An urgent and provocative call to action from the world's leading climate scientist Dr James Hansen, the world's leading scientist on climate issues, speaks out with the full truth about global warming: the planet is hurtling to a climatic point of no return. Hansen - whose climate predictions have come to pass again and again, beginning in the 1980s when he first warned US Congress about global warming - is the single most credible voice on the subject worldwide. He paints a devastating but all-too-realistic picture of what will happen if we continue to follow the course we're on. But he is also a hard-headed optimist, and shows that there is still time to take the urgent, strong action needed to save humanity. \_\_\_\_\_ 'James Hansen gives us the opportunity to watch a scientist who is sick of silence and compromise; a scientist at the breaking point - the point at which he is willing to sacrifice his credibility to make a stand to avert disaster' - LA Times
