White Fragility Dr. Robin DiAngelo, 2018-06-26 The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

The Anthropology of Resource Extraction Lorenzo D'Angelo, Robert Jan Pijpers, 2022-01-13 This book offers an overview of the key debates in the burgeoning anthropological literature on resource extraction. Resources play a crucial role in the contemporary economy and society, are required in the production of a vast range of consumer products and are at the core of geopolitical strategies and environmental concerns for the future of humanity. Scholars have widely debated the economic and sociological aspects of resource management in our societies, offering interesting and useful abstractions. However, anthropologists offer different and fresh perspectives – sometimes complementary and at other times alternative to these abstractions – based on field researches conducted in close contact with those actors (individuals as well as groups and institutions) that manipulate, anticipate, fight for, or resist the extractive processes in many creative ways. Thus, while addressing questions such as: What characterizes the anthropology of resource extraction?, What topics in the context of resource extraction have anthropologists studied?, and What approaches and insights have emerged from this?, this book synthesizes and analyses a range of anthropological debates about the ways in which different actors extract, use, manage, and think about resources. This comprehensive volume will serve as a key reading for scholars and students within the social sciences working on resource extraction and those with an interest in natural resources, environment, capitalism, and globalization. It will also be a useful resource for practitioners within mining and development.

Scanning the Pharaohs Zahi A. Hawass, Sahar Saleem, 2016 The royal mummies in the Cairo Museum are an important source of information about the lives of the ancient Egyptians. The remains of these pharaohs and queens can inform us about their age at death and medical conditions from which they may have suffered, as well as the mummification process and objects placed within the wrappings. Using the latest technology, including Multi-Detector Computed Tomography and DNA analysis, the authors present the results of the examination of the royal mummies. New imaging techniques not only reveal a wealth of information about each mummy, but render amazingly lifelike and detailed images of the remains.

Composition in the Classical Tradition Frank J. D'Angelo, 1999 *Composition in the Classical Tradition* borrows from late antiquity a series of composition exercises called the progymnasmata to teach the art of persuasion. The exercises apply an understanding of the invention and composition of arguments from ancient rhetoric to a writer's own forms of persuasive communication. This book is structured to provide an effectively graded sequence of exercises, manageable at each step, from the simple to the more difficult and from the concrete to the abstract, within an explicit rhetorical framework. Learn how to compose an essay or a speech by first becoming proficient at its parts *Composition in the Classical Tradition* features a variety of ancient forms myths, historical episodes, descriptions,

fables, proverbs, anecdotes, and speeches for readers to enjoy while learning how to write and speak persuasively. For anyone interested in composition and classical rhetoric.

Forum Shopping Despite Unification of Law Franco Ferrari,2021-08-16 According to some commentators, forum shopping is an “evil” that must be eradicated. It has been suggested that the unification of substantive law through international conventions constitutes one way to achieve this outcome. This book shows that the drafting of uniform substantive law convention cannot prevent forum shopping. The reasons are classified into two main categories: convention-extrinsic and convention-intrinsic reasons. The former category comprises those reasons upon which uniform substantive law conventions do not have an impact at all. These reasons range from the costs of access to justice to the bias of potential adjudicators to the enforceability of judgments. The convention-intrinsic reasons, on the other hand, are reasons that relate to the nature and design of uniform substantive law conventions, and include their limited substantive and international spheres of application as well as their limited scope of application, the need to provide for reservations, etc. This book also focuses on another reason why forum shopping cannot be overcome: the impossibility of ensuring uniform applications and interpretations of the various uniform substantive law conventions.

Nice Racism Dr. Robin DiAngelo,2021-06-29 NEW YORK TIMES BESTSELLER Building on the groundwork laid in the New York Times bestseller *White Fragility*, Robin DiAngelo explores how a culture of niceness inadvertently promotes racism. In *White Fragility*, Robin DiAngelo explained how racism is a system into which all white people are socialized and challenged the belief that racism is a simple matter of good people versus bad. DiAngelo also made a provocative claim: white progressives cause the most daily harm to people of color. In *Nice Racism*, her follow-up work, she explains how they do so. Drawing on her background as a sociologist and over 25 years working as an anti-racist educator, she picks up where *White Fragility* left off and moves the conversation forward. Writing directly to white people as a white person, DiAngelo identifies many common white racial patterns and breaks down how well-intentioned white people unknowingly perpetuate racial harm. These patterns include: -rushing to prove that we are “not racist”; -downplaying white advantage; -romanticizing Black, Indigenous and other peoples of color (BIPOC); -pretending white segregation “just happens”; -

expecting BIPOC people to teach us about racism; -carefulness; -and feeling immobilized by shame. DiAngelo explains how spiritual white progressives seeking community by co-opting Indigenous and other groups' rituals create separation, not connection. She challenges the ideology of individualism and explains why it is OK to generalize about white people, and she demonstrates how white people who experience other oppressions still benefit from systemic racism. Writing candidly about her own missteps and struggles, she models a path forward, encouraging white readers to continually face their complicity and embrace courage, lifelong commitment, and accountability. *Nice Racism* is an essential work for any white person who recognizes the existence of systemic racism and white supremacy and wants to take steps to align their values with their actual practice. BIPOC readers may also find the "insiders" perspective useful for navigating whiteness. Includes a study guide.

Procedural Due Process Rhonda Wasserman,2004-10-30 This book gathers, synthesizes and analyzes case law in a variety of substantive contexts, including public employment, prison administration, and government benefits. It places current case law into historical context, serving as a reference guide for students, practitioners, judges and scholars interested in procedural due process. The author addresses the central requirements of notice and the opportunity to be heard as well as the day in court ideal. It also examines the protection due process affords against litigation in a distant forum with which the defendant has no connection.

Transforming Talk into Text—Argument Writing, Inquiry, and Discussion, Grades 6-12 Thomas M. McCann,2014-05-23 Author Thomas McCann invites readers to rethink their approach to teaching writing by capitalizing on students' instinctive desire to talk. Drawing on extensive classroom research, he shows teachers how to craft class discussions that build students' skills of analysis, problem-solving, and argumentation as a means of improving student writing. McCann demonstrates how authentic discussions immerse learners in practices that become important when they write. Chapters feature portraits of teachers at work, including transcripts that reveal patterns of talk across a set of lessons. Interviews with the teachers and samples of student writing afford readers a deeper understanding of process. Students also report on how classroom discussions supported their effort to produce persuasive, argument-driven essays. Book Features: A focus on "the thinking behind the practice," as opposed to a collection of lesson ideas. Connections to important elements from the Common Core State Standards, especially arguments writing. Examples of students at work with examples of the writing that emerges from their discussions. Portraits of skilled teachers as they promote inquiry and sequence and facilitate discussions. Appendices with problem-based scenarios, interview questions for students and teachers, samples of debatable cases in the news, and more. "In this important book, Tom McCann has given us not only the admonition to change, but the details about what effective change must be and what it looks like, evidence that it works effectively, and details about how to bring it to pass." —From the Foreword by George Hillocks, Jr., Professor Emeritus, Department of English, University of Chicago. "For a professional book to have an impact on the field, it needs to address a perceived need. Writing arguments for Common Core performance assessments is a HUGE need right now that this book helps address." —Carol Jago, associate director, California Reading and Literature Project, UCLA.
