Dark Horse Kel Carpenter, Aurelia Jane, 2021-02-04 My husband killed me. Instead of spending my immortal Afterlife pissed off and angry, I moved on. I became someone. Sure, that someone was a demon with the highest track record of reform, AKA punishment, in Hell. But who's bragging? I'm right on my way to retirement behind the pearly gates. Everything was going fine . . . until the Risk Witches saw a terrible vision. Three men. Each scarred in their own way, born with powers that haven't been seen in eons. Upper Management sent the best to correct their path. Angels. Poltergeists. Nothing worked. These men were too stubborn. Too bad. Too untamed... So they sent me. Roman. Ezra. Dorian. Combined, they have enough power to end the world- and they will. Unless I find a way to stop them first. Breaking people is my job. But this time... my job might break me.

When she confronts the local muscle about bad business debts, she begins to realize he might be the only one she can rely on. Maria Henderson finds herself straightening out bad loans in rural Australia. Assuming her city-smarts will win the day, Maria is sure she'll be back in Sydney within a year. But when she uncovers an avaricious ring of corruption, Maria must decide how far she will go to advance her career. Tony Carpenter is back in town and trouble has followed him. Dark Ecology Timothy Morton, 2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in *Blade Runner* (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.
