This book covers various topics relating to Raman fiber laser research, including power scaling, cladding and diode pumping, cascade Raman shifting, single frequency operation and power amplification, mid-infrared laser generation, specialty optical fibers, and random distributed feedback Raman fiber lasers. **Unions and Economic Crisis** Peter Gourevitch,Andrew Martin,George Ross,Stephen Bornstein,Andrei Markovits,Christopher Allen,2016-04-06 First published in 1984. This book represents a major study of union responses to the economic crisis of the 1970s and 1980s. Abjuring governmental or managerial outlooks, it argues that unions, as representatives of essential producer groups, would be central to the renegotiation of the economic world. The work also stresses the importance of situating union responses to the crisis within the socio-historical evolution of their political economies during the rise and decline of the post-war economic boom. The Social Democratic affiliation of unions in Britain, West Germany and Sweden make them particularly comparable. This title will be of interest to students of politics and economics.
