Scripted Unscripted Kristina Miranda, 2019-05-14 Ellie Quinn has spent most of her sixteen years behind the scenes, helping her father manage a crew of four-legged movie stars. Although she longs to be acknowledged as an animal trainer in her own right, she often gets stuck babysitting actors' personal pets and is known around the studio as "the dog sitter for the stars." When teen megastar Kate Montgomery's sidekick gets fired while filming a pilot, Ellie is forced to temporarily fill-in. The producers seem to be enamored with Ellie—and so do Kate's two love interests on the show, "it boy" Logan Canfield and brand-new actor Cam Alvarez—causing trouble on and off the set. Now Ellie must decide between living the drama in front of the camera or behind it. If she quits and the pilot fails, she and her father will have to close their failing business and move to her grandfather's lettuce farm. But if she stays on the road to stardom, it could mean losing the boy she's fallen for—and herself—in the process. Can she save the TV show and her father's business without losing everything else?

Chaney, 2019-08-27 Robertson and Chaney examine how the early antecedents of police brutality like plantation overseers, the lynching of African American males, early race riots, the Rodney King incident, and the Los Angeles Rampart Scandal have directly impacted the current relationship between communities of color and police.

The Routledge Handbook of Technology, Crime and Justice M. R. McGuire, Thomas J. Holt, 2017-02-24 Technology has become increasingly important to both the function and our understanding of the justice process. Many forms of criminal behaviour are highly dependent upon technology, and crime control has become a predominantly technologically driven process – one where 'traditional' technological aids such as fingerprinting or blood sample analysis are supplemented by a dizzying array of tools and techniques including surveillance devices and DNA profiling. This book offers the first comprehensive and holistic overview of global research on technology, crime and justice. It is divided into five parts, each corresponding with the key stages of the offending and justice process: Part I addresses the current conceptual understanding of technology within academia and the criminal justice system; Part II gives a comprehensive overview of the current relations between technology and criminal behaviour; Part III explores the current technologies within crime control and the ways in which technology underpins contemporary formal and informal social control; Part IV sets out some of the fundamental impacts technology is now having upon the judicial process; Part V reveals the emerging technologies for crime, control and justice and considers the extent to which new technology can be effectively regulated. This landmark collection will be essential reading for academics, students and theorists within criminology, sociology, law, engineering and technology, and computer science, as well as practitioners and professionals working within and around the criminal justice system.

Police Power and the Video Revolution Mary D. Fan, 2019-05-09 This is the first book on the policy questions raised by two revolutions in recording the police - copwatching and police-worn body cameras. The Bliss House Jim Bartley, 2023-09-05 Two young men bringing up a small child in the middle of nowhere. Everything could be fine, but strangers start to meddle. For near a century the reclusive Bliss clan farmed the same land. Now it's 1963 and everyone's gone except teenage Cam, his older cousin Wes, and little Dorie. They buried Gran over a year ago. But Gramp is still with them, wrapped tight as a mummy in an old tarp in the cold room off the kitchen. Life's better now without the old man's rants and terrors. There are problems with the land lease and the meddlesome, moralizing neighbours, and rumours are spreading in town that there's something not quite right about Cam and Wes, but they're taking care of it all as best they can. Then the local Children's Aid drops by to say Dorie needs schooling and proper parents, and it's clear they can't hide their secrets any longer. They're on the road, heading north, with a body in the trunk. Wes knows a place, a cabin deep in the woods ... No matter what they do, gruesome

casualties seem to follow them. It could be funny if it wasn't so nightmarish. And through it all, a tender secret love thrives, as they try to hold on to the family they've built together. A RARE MACHINES BOOK

Swarm Scott Westerfeld, Margo Lanagan, Deborah Biancotti, 2016-09-27 X-Men meets Marissa Meyer's Renegades when New York Times bestselling author of the Uglies series Scott Westerfeld teams up with award-winning authors Margo Lanagan and Deborah Biancotti in the second book of an explosive new trilogy about six teens with unique abilities. They thought they'd already faced their toughest fight. But there's no relaxing for the reunited Zeroes. These six teens with unique abilities have taken on bank robbers, drug dealers, and mobsters. Now they're trying to lay low so they can get their new illegal nightclub off the ground. But the quiet doesn't last long when two strangers come to town, bringing with them a whole different kind of crowd-based chaos. And hot on their tails is a crowd-power even more dangerous and sinister. Up against these new enemies, every Zero is under threat. Mob is crippled by the killing-crowd buzz—is she really evil at her core? Flicker is forced to watch the worst things a crowd can do. Crash's conscience—and her heart—get a workout. Anon and Scam must both put family loyalties on the line for the sake of survival. And Bellwether's glorious-leader mojo deserts him. Who's left to lead the Zeroes into battle against a new, murderous army?

The Varieties of Historical Experience Stephan Palmié, Charles Stewart, 2019-03-21 This book considers how history is not just objectively lived but subjectively experienced by people in the process of orienting their present toward the past. It analyses affectivity in historical experience, examines the digital mediation of history, and assesses the current politics of competing historical genres. The contributors explore the diverse ways in which the past may be activated and felt in the here and now, juxtaposing the practices of professional historiography with popular modes of engaging the past, from reenactments, filmmaking/viewing and historical fiction to museum collections and visits to historical sites. By examining the divergent forms of historical experience that flourish in the shadow of historicism in the West, this volume demonstrates how, and how widely (socially), the understanding of the past exceeds the expectations and frameworks of professional historicism. It makes the case that historians and the discipline of History could benefit from an ethnographic approach in order to assess the social reception of their practice now, and into a near future increasingly conditioned by digital media and demands for experiential immediacy.

The Confederate Flag Anne Cunningham, 2017-12-15 Is it a symbol of pride in one's heritage or an ugly reminder of slavery and the fruits of racism? The issue of whether the Confederate flag belongs in front of government buildings, or even on Southern pride paraphernalia, has been a hot

button for more than a century, long after the Civil War was fought and won. This book takes a close look at the flag's origins, its controversial history, what meaning it has for Americans living today, and the ongoing debate on its use and display.

This book addresses the need to recognize the psychiatric component of criminological issues and the methodology of dealing with it on a practical as well as academic basis. It provides a roadmap for training in rapid assessment built on evidence-based emergency psychiatry protocols.

Facebook Nation Newton Lee, 2022-02-02 This book explores total information awareness empowered by social media. At the FBI Citizens Academy in February 2021, I asked the FBI about the January 6 Capitol riot organized on social media that led to the unprecedented ban of a sitting U.S. President by all major social networks. In March 2021, Facebook CEO Mark Zuckerberg, Google CEO Sundar Pichai, and Twitter CEO Jack Dorsey appeared before Congress to face criticism about their handling of misinformation and online extremism that culminated in the storming of Capitol Hill. With more than three billion monthly active users, Facebook family of apps is by far the world's largest social network. Facebook as a nation is bigger than the top three most populous countries in the world: China, India, and the United States. Social media has enabled its users to inform and misinform the public, to appease and disrupt Wall Street, to mitigate and exacerbate the COVID-19 pandemic, and to unite and divide a country. Mark Zuckerberg once said, We exist at the intersection of technology and social issues. He should have heeded his own words. In October 2021, former Facebook manager-turned-whistleblower Frances Haugen testified at the U.S. Senate that Facebook's products harm children, stoke division, and weaken our democracy. This book offers discourse and practical advice on information and misinformation, cybersecurity and privacy issues, cryptocurrency and business intelligence, social media marketing and caveats, e-government and e-activism, as well as the pros and cons of total information awareness including the Edward Snowden leaks. Highly recommended. - T. D. Richardson, Choice Magazine A great book for social media experts. - Will M., AdWeek Parents in particular would be well advised to make this book compulsory reading for their teenage children... - David B. Henderson, ACM Computing Reviews

Meanwhile, in Russia... Eliot Borenstein, 2022-01-27 The Russian internet is a hotbed for memes and viral videos: the political, satirical and simply absurd compete for attention in Russia while the West turns to it for an endless reserve of humorous content. But how did this powerful cyber community grow out of the repressive media environment of the Soviet Union? What does this viral content reveal about the country, its politics and its culture? And why are the memes and videos of today's Russia so popular, spreading so rapidly across the globe? Award-winning author Eliot Borenstein

explores the explosive online movement and unpicks, for the first time, the role of mimetic content and digital activism in modern Russian history up to the present day.

Closed Circuits Garrett Stewart,2015-01-30 Long before the 2013 NSA scandal about electronic surveillance, narrative cinema had become a weathervane of social phobias in regard to national security, drawing on a long history of surveillance both as theme and as audiovisual machination that saw its first heyday with the Weimar cinema of Fritz Lang. This book's analytical return to apparatus theory, and especially to suture theory's contrapuntal logic of seeing unseen, contributes to a new view of digital optics in this regard: one of contemporary cinema's most urgent cultural as well as technological flashpoints.

The Learning and Teaching of Cantonese as a Second Language Siu-lun Lee,2023-07-12 The Learning and Teaching of Cantonese as a Second Language brings together contributions on such issues as Cantonese textbooks, linguistic description, literacy and tone acquisition, supplemented by case studies from the Netherlands and Japan. The learning and teaching of Cantonese as a second language is a subject of considerable interest in the international academic community, and the first international symposium on teaching Cantonese as a second language, held at the Chinese University of Hong Kong in October 2019, brought together leading researchers in this field. This conference provided the inspiration for the current volume, *The Learning and Teaching of Cantonese as a Second Language*. In the Hong Kong context, historically, the term 'Cantonese' refers to the language varieties of immigrants who came to the territory from various areas in Guangdong province, including Macau, Panyu, Taishan, Xinhui and Zhongshan. From the late nineteenth century onwards, their speech coalesced into the contemporary variety of Cantonese used in Hong Kong today. The term 'Cantonese' is also used to refer to the entire Yue subgroup of Chinese, which includes varieties of Cantonese spoken in southern China, Hong Kong, Macau, Malaysia, Singapore and among overseas Chinese in Australia, Europe and North America. In all, it is estimated that there are about 70 million Cantonese speakers in the world. This volume is of direct relevance to educators, language teachers, linguists and all those concerned with the learning of Cantonese as a second language.

It spans the range all the way from optical physics to technical optics. Based on ray- and wave-optical approaches complemented by principles of Fourier optics, the book discusses the process of imaging from the beginning until image capture where, in particular, the different topics are well integrated with each other. Different imaging systems and sensors are reviewed as well as lenses and aberrations, image intensification and processing. The second and enlarged edition has been updated by actual developments and complemented by the topic of smart phone camera photography. The latter plays an important role today in the field of optical imaging and represents a fully integrated optical system with potential for further new developments. For physicists, natural scientists, engineers, photographers and microscopists on one side and students of physics, natural sciences or engineering in general on the other side, the books provides an introduction into the complex field of optical imaging. For all of them with practical experience the book conveys a deeper insight into the intricacies and quality assessment of their daily used devices.

The Reinvention of Policing William R. Kelly,Daniel P. Mears,2023-07-15 Contemporary policing is in crisis, a situation that has led to persistent calls to reform it. Unfortunately, many proposed solutions focus on piecemeal changes that ignore a fundamental problem--policing relies on a largely reactive approach that does not in any systematic or comprehensive way focus on crime prevention. Most of what the police do, such as responding to

911 calls for service and employing directed patrols or hot spots policing, fails to address the causes of crime. Compounding this problem is the absence of any institution or agency charged with prioritizing the prevention of crime and for ensuring that police efforts support this goal. Kelly and Mears argue that a better strategy exists, one that places responsibility on the police and other governmental and non-governmental agencies and organizations for truly preventing crime. Why, historically, did crime prevention not take hold and infuse policing? One reason is a design flaw--the vision of policing centered too much on surveillance and too little on efforts that target the diverse causes of crime. The end result? Contemporary policing lacks any institutionalized commitment or systematic approach to crime prevention. It is designed to fail. The Reinvention of Policing diagnoses this problem, along with many others, in American policing. Then the authors turn to solutions. First, they call for a great many reforms to existing practices. Second, they call for a reinvention of the design and focus of policing and, concomitantly, the way that states, cities, and towns approach public safety. This change presents special challenges, but it is the only way to create an appreciable impact in reducing crime and improving justice.

Unfair Adam Benforado, 2015 A legal scholar exposes the psychological forces that undermine the American criminal justice system, arguing that unless hidden biases are addressed, social inequality will widen, and proposes reforms to prevent injustice and help achieve true equality before the law.
