Business Performance Measurement and Management Paolo Taticchi,2010-01-22 Measuring and managing the performance of a business is one of the most genuine desires of management. Balanced scorecard, the performance prism and activity-based management are the most popular frameworks in this setting. Based on the findings of R.G. Eccles' acclaimed Performance Measurement Manifesto (1991) this book introduces new contexts and themes of application and presents emerging research areas related to business performance measurement and management, e.g. SMEs and sustainability. As a result of the 1st International Summer School Piero Lunghi on Perspectives of Business Performance Management this book is written both for students and academics, as well as for practitioners looking for new, yet proven ways to measure and manage business performance.

The 93 full papers presented in these proceedings were carefully reviewed and selected from 478 submissions. They were organized in topical sections as follows: Part I: Crypto. Part II: Network, web and internet; privacy; and remote. Part III: Attacks; blockchain; and miscellaneous. Part IV: Machine learning; software and systems security.

Resilience and Hybrid Threats I. Linkov,L. Roslycky,B.D. Trump,2019-12-19 Hybrid threats represent one of the rising challenges to the safe and effective management of digital systems worldwide. The deliberate misuse or disruption of digital technologies has wide-ranging implications for fields as diverse as medicine, social media, and homeland security. Despite growing concern about cyber threats within many government agencies and international organizations, few strategies for the effective avoidance and management of threats or the prevention of the disruption they can cause have so far emerged. This book presents multiple perspectives based upon a NATO Science for Peace and Security Programme Advanced Research Workshop on 'Resilience and Hybrid Threats' held in Pärnu, Estonia from 26-29 August 2018, and includes a mixture of workshop summary papers and invited perspectives from world experts. Topics include the development of strategies for the protection and recovery of systems affected by hybrid threats, and the benefits of those strategies under different disruption scenarios. The role of risk and resilience assessment pertaining to the information domain is a common focus across all perspectives. Offering an overview of resilience-based decision making through an approach that integrates the threats and dependencies related to infrastructural, informational, and social considerations, the book will be of interest to all those whose work involves the security of digital systems.

<u>Military Strategy and Tactics</u> Reiner Huber,2013-11-11 This volume brings forth a set of selected papers from the Conference on Modeling Land Sattle Systems for Military Planning. Sponsored by the Special Programme Panel on Systems Science of the NATO Science Committee, the conference took place in Ottobrunn, Germany, at the War Gaming Centre of Industrieanlagen-Betriebsgesellschaft. The idea to organize a conference on land battle systemmodelswas first suggested to me in 1g72 by Andreas Mortensen, then a member of the Norwegian Defence Research Establishment and presently at the SHAPE Technical Centre, when we discussed the apparent inconsistencies of various evaluations of force capability within NATO. Frequently, decision makers are confronted by contradictory results of different studies addressing essentially the same problern leaving them with the impression that the tools of systems analysis and operations research may not be very objective guides. However, experienced systems researchers know that a detailed comparison of models, their assumptions and inputs, would generally show that results are not really contradictory. But not only seem the decision processes in large national and international organizations tobe suchthat a comparison can hardly ever be accomplished, also the docu mentation available is rarely sufficient to really camprehend the differences in results. For these reasons, we felt that an effort to review the state of the art of model ing in support of force capabil ity assessments was overdue.

Paying for Performance: An International Comparison Michelle Brown,John S. Heywood,2019-07-23 Although performance pay is used in many industrialized nations, the structure and success of this pay system vary widely depending on the institutions, regulatory framework, and legal settings of each country. This book makes the details and effects of these local variations clear for the first time. World-renowned experts on the programs in their respective countries provide in-depth analyses of performance pay in the United States, Canada, France, the United Kingdom, Germany, Australia, Japan, and Brazil. They draw out common themes across the countries, as well as country-specific determinants of the use of performance pay and its level of success.

Proven Solutions for Improving Health and Lowering Health Care Costs C. Carl Pegels,2003-04-01 The purpose of this book is to convince administrators and providers of health care that scientific research has produced numerous tools, techniques, and approaches for managing health services that are most effective and most efficient. Convincing the managers and administrators of this fact is accomplished by presenting numerous easy-to-understand summaries of the research reported in the scientific research journals available at University and main city libraries.
