Genealogy 101 Barbara Renick, 2003-04-23 A recent Maritz Poll reported that 60% of Americans are interested in their family history. And with good reason. Through genealogy, you can go back into history to meet people who have had more influence on your life than any others -- your ancestors. And the better you get to know your ancestors, the better you will get to know yourself: the who's and what's and why's of you. Barbara Renick, a nationally-known lecturer on genealogy, tells the uninitiated researcher the steps needed to find out who their ancestors really were, and brings together for even the more experienced genealogical researchers the important principles and practices. She covers such topics as the importance of staying organized and how to go about it; where and how to look for information in libraries, historical societies, and on the internet; recognizing that just because something is in print doesn't mean it's right; and how to prepare to visit the home where your ancestors lived. Genealogy 101 is the first book to read when you want to discover who your ancestors were, where they lived, and what they did.

Questioning the Millennium Stephen Jay Gould, 2012-01-04 In this new edition of Questioning the Millennium, best-selling author Stephen Jay Gould applies his wit and erudition to one of today's most pressing subjects: the significance of the millennium. In 1950 at age eight, prompted by an issue of Life magazine marking the century's midpoint, Stephen Jay Gould started thinking about the approaching turn of the millennium. In this beautiful inquiry into time and its milestones, he shares his interest and insights with his readers. Refreshingly reasoned and absorbing, the book asks and answers the three major questions that define the approaching calendrical event. First, what exactly is this concept of a millennium and how has its meaning shifted? How did the name for a future thousand-year reign of Jesus Christ on earth get transferred to the passage of a secular period of a thousand years in current human history? When does the new millennium really begin: January 1, 2000, or January 1, 2001? (Although

seemingly trivial, the debate over this issue tells an intriguing story about the cultural history of the twentieth century.) And why must our calendars be so complex, leading to our search for arbitrary regularity, including a fascination with millennia? This revised edition begins with a new and extensive preface on a key subject not treated in the original version. As always, Gould brings into his essays a wide range of compelling historical and scientific fact, including a brief history of millennial fevers, calendrical traditions, and idiosyncrasies from around the world; the story of a sixth-century monk whose errors in chronology plague us even today; and the heroism of a young autistic man who has developed the extraordinary ability to calculate dates deep into the past and the future. Ranging over a wide terrain of phenomena--from the arbitrary regularities of human calendars to the unpredictability of nature, from the vagaries of pop culture to the birth of Christ--Stephen Jay Gould holds up the mirror to our millennial passions to reveal our foibles, absurdities, and uniqueness--in other words, our humanity.

The Greatest Lie on Earth (Expanded Edition) Edward Hendrie, 2018-09-12 This book reveals the mother of all conspiracies. It sets forth biblical proof and irrefutable evidence that will cause the scales to fall from your eyes and reveal that the world you thought existed is a myth. The most universally accepted scientific belief today is that the earth is a globe, spinning on its axis at a speed of approximately 1,000 miles per hour at the equator, while at the same time it is orbiting the sun at approximately 66,600 miles per hour. All of this is happening as the sun, in turn, is supposed to be hurtling through the Milky Way galaxy at approximately 500,000 miles per hour. The Milky Way galaxy, itself, is alleged to be racing through space at a speed ranging from 300,000 to 1,340,000 miles per hour. What most people are not told is that the purported spinning, orbiting, and speeding through space has never been proven. In fact, every scientific experiment that has ever been performed to determine the motion of the earth has proven that the earth is stationary. Yet, textbooks ignore the scientific proof that contradicts the myth of a spinning and orbiting globe. Christian schools have been hoodwinked into teaching heliocentrism, despite the clear teaching in the bible that the earth is not a sphere and does not move. This book reveals the evil forces behind the heliocentric deception, and why scientists and the Christian churches have gone along with it.
