Drug Interactions Agnes I. Revesz, 1975 Drug Interactions, Volume III - An Annotated Bibliography with Selected Excerpts, 1967-1971 is the third in a series of specialized bibliographies prepared by Paul de Haen. Inc. Each volume has been prepared to provide professionals in pharmacy, medicine, and other health-related fields with quick and easy access to reports from the world's published scientific literature on drug-to-drug and drug-to-chemical interactions. In both previous volumes, the intensive retrospective search of the biomedical literature and the preparation of the standardized excerpts were performed under contract for the National Library of Medicine's Toxicology Information Program. Because of the interest aroused by the

series, this third and final volume has been negotiated under the auspices of the Food and Drug Administration and completes the primary literature references up to 1972. The final volume of the drug interaction series continues the cumulation, documentation, and correlation of drug interactions, containing 1316 excerpts and 100 annotated citations. We hope that this publication will provide a useful tool for the biomedical scientist and physician who must determine the safety and efficacy of medication under varying conditions. The Drug Interaction Series, by collecting and correlating data, has contributed to the planning and building of more effective, safer medical care of all patients.
