World-maps for Finding the Direction and Distance to Mecca David King,2021-09-06 Two remarkable Iranian world-maps were discovered in 1989 and 1995. Both are made of brass and date from 17th-century Iran. Mecca is at the centre and a highly sophisticated longitude and latitude grid enables the user to determine the direction and distance to Mecca for anywhere in the world between Andalusia and China. Prior to the discovery of these maps it was thought that such cartographic grids were conceived in Europe ca. 1910. This richly-illustrated book presents an overview of the ways in which Muslims over the centuries have determined the sacred direction towards Mecca (qibla) and then describes the two world-maps in detail. The author shows that the geographical data derives from a 15th-century Central Asian source and that the mathematics underlying the grid was developed in 9th-century Baghdad.

Choosing a World Map Arthur Howard Robinson,American Cartographic Association. Committee on Map Projections,1988

To the Ends of the Earth Jeremy Harwood,2012-01-03 This thought-provoking history of cartography focuses on 100 key maps that changed human understanding of the world around us, changed the course of map-making itself, or directly influenced the path of history. It reveals how different peoples have observed and represented their world through the ages, and explores the human fascination with maps. It addresses how maps have been used for navigation, exploration, wartime propaganda and planning, and to project national goals. A team of academic experts in the history of cartography provides a scholarly and revealing text that addresses the key questions of how, why—and, crucially, if—these maps have changed the world. One hundred of the world’s most beautiful and fascinating maps provide the illustrations. The result is a definitive, fact-packed, fresh and lively study that readers, no matter how much or how little they may know about the subject already, will find informative, insightful, and absorbing.

A History of the World in 12 Maps Jerry Brotton,2013-11-14 A New York Times Bestseller “Maps allow the armchair traveler to roam the world, the diplomat to argue his points, the ruler to administer his country, the warrior to plan his campaigns and the propagandist to boost his cause... rich and beautiful.” – Wall Street Journal Throughout history, maps have been fundamental in shaping our view of the world, and our place in it. But far from being purely scientific objects, maps of the world are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the world, they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps - from the almost mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly individual view of the world. Brotton shows how each of his maps both influenced and reflected contemporary events and how, by considering it in all its nuances and omissions, we can better understand the world that produced it. Although the way we map our surroundings is more precise than ever before, Brotton argues that maps today are no more definitive or objective than they have ever been. Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again. “A fascinating and panoramic new history of the cartographer’s art.” – The Guardian “The intellectual background to these images is conveyed with beguiling erudition.... There is nothing more subversive than a map.” – The Spectator “A mesmerizing and beautifully illustrated book.” —The Telegraph

It's About Time (ENHANCED eBook) Robynne Eagan,Tracey Ann Schofield,1997-03-01 Help children measure and tell time by the sun, the clock and the calendar; and learn why there are 24 hours in a day, 7 days in a week and 365 days in a year. Here's a cross-curriculum approach to time with learning activities that bring together history, science, language arts and math. A comprehensive look at time from the ancient civilizations who first tried to understand, arrange and measure it - to modern society where we organize our lives around the clock!

Protect Earth Today Starts With You Nam H Nguyen,2021-04-23 The goal is to fill your mind with a head start to knowing the birth of a planet Earth. The Earth grew from a cloud of dust and rocks surrounding the young Sun and the Moon probably formed soon after, when a planet-sized chunk of rock smashed into the Earth and threw up a huge cloud of debris. Then, the first human ancestors appeared on earth through the present day. We are facing several problems, and many of these seem to be worsening with time, bringing us into a time of a true environmental crisis. There is much evidence and facts that support our climate Change. We (humans) are causing life on Earth to vanish. As a result, humans have directly altered at least 75% of Earth's land, mainly for growing plants and keeping animals. The History of the Earth, The history of life on Earth Timeline, Earth, Earth Interior, Earth Quick Facts, Moon, Sun, Air, Clean Energy, Climate, Forests, Hazards, Land, Life, Pollution, Reusing or repurposing, Space, Water, Oceans and Ice., Wetland, eBooks in modern education and Environmentally friendlier, Why is E-government and E-services important during COVID-19?, The Environment and Culture are Inseparable, what can we do to pitch in and help save the Earth today?, and our present world.

Time in Maps Kären Wigen,Caroline Winterer,2020-11-20 Maps organize us in space, but they also organize us in time. Looking around the world for the last five hundred years, Time in Maps shows that today’s digital maps are only the latest effort to insert a sense of time into the spatial medium of maps. Historians Kären Wigen and Caroline Winterer have assembled leading scholars to consider how maps from all over the world have depicted time in ingenious and provocative ways. Focusing on maps created in Spanish America, Europe, the United States, and Asia, these essays take us from the Aztecs documenting the founding of Tenochtitlan, to early modern Japanese reconstructing nostalgic landscapes before Western encroachments, to nineteenth-century Americans grappling with the new concept of deep time. The book also features a defense of traditional paper

maps by digital mapmaker William Rankin. With more than one hundred color maps and illustrations, Time in Maps will draw the attention of anyone interested in cartographic history.

The Times Map of the World Times Atlases,2019-03-21 This folded world map has been fully revised and updated to include the latest political changes. The map contains politically coloured mapping which shows individual countries and their capital city, major roads, railways and cities and towns clearly. Local name forms are used for all towns and cities with the English or historical alternative shown in brackets e.g. Mumbai (Bombay), Sankt Peterburg (Leningrad) where space permits. This makes the map readily accessible to the general reader who needs an up-to-date map to follow reports of world events in newspapers, on radio and television. It is perfect for the home and office. INCLUDES: * All recent political changes carried out to mapping. * Changes to international dateline. AREA OF COVERAGE All of the world, centred on the Greenwich Meridian, and including maps of the North and South Pole regions. SCALE Scale 1:30 000 000; 1cm to 300 km; 1 inch to 474 miles. Size of world map unfolded 637 x 1016mm

A History of the World in Twelve Maps Jerry Brotton,2012-09-06 Jerry Brotton is the presenter of the acclaimed BBC4 series 'Maps: Power, Plunder and Possession'. Here he tells the story of our world through maps. Throughout history, maps have been fundamental in shaping our view of the world, and our place in it. But far from being purely scientific objects, world maps are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the world, they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps - from the mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly individual view of the world - whether the Jerusalem-centred Christian perspective of the 14th century Hereford Mappa Mundi or the Peters projection of the 1970s which aimed to give due weight to 'the third world'. Although the way we map our surroundings is once more changing dramatically, Brotton argues that maps today are no more definitive or objective than they have ever been - but that they continue to make arguments and propositions about the world, and to recreate, shape and mediate our view of it. Readers of this book will never look at a map in quite the same way again.

The World in Perspective Frank Canters,Hugo Declair,1989-11-24 Provides formulas for 68 different cartographic views of the world. The Directory proper is preceded by a theoretical introduction about map projections. The description of each projection system is accompanied by one or two maps illustrating the deformation characteristics, allowing quick evaluation of its merits and effective use of the map for a particular purpose. All maps shown have been produced and computed with the formulas given in the book.
