**External Debt Management** Thomas Martin Klein,1994-01-01 World Bank Technical Paper 245. This document was designed primarily for staff of newly established debt management institutions within governments that are launching borrowing programs, and discusses the entire range of external debt management. Topics include the organizational procedures for negotiating foreign loans and credits, the control and coordination of borrowing decisions, risk management, the administration of new loans, and external debt accounting and statistics. Basic accounting principles are reviewed and the use of computers explored. The authors stress that the government unit with responsibility for meeting future debt service obligations should also play a major role in decisions regarding foreign borrowing. Reporting statistics on external debt is a crucial part of a country's relationship with the World Bank and other donors. The Bank has formal requirements for debt reporting by member nations and accurate accounting is a prerequisite to having loans considered by the Bank's Executive Board. This book is an essential reference for training and technical assistance programs in asset and liability management.

Medium-Term Debt Management Strategy Mr.Emre Balibek,Mr.Tobias Haque,Diego Rivetti,Ms.Miriam Tamene,2019-05-15 This report provides guidance on using the Analytical Tool of the Medium-Term Debt Management Strategy (MTDS). The MTDS framework consists of a methodology, published as the 'Guidance Note for Developing a Medium-Term Debt Management Strategy', and an associated analytical tool (AT) that can be used to assess the cost-risk trade-offs of alternative strategies to help identify the preferred strategy. The MTDS framework supported by the AT quantitative analysis helps to determine the financing strategy. The chosen debt management strategy sets out the financing composition path to meet the debt management objective(s). The profile of future interest payments and the amortizations of new debt are driven by the debt management strategy. The MTDS AT is based on annual cash flow. Although this assumption is enough for analyzing alternative debt management strategies, in some cases, particularly for countries that are heavily dependent on short-term securities with maturities of less than a year, it would be helpful to work with cash flows with higher frequency.
