Fast Processes in Large-Scale Atmospheric Models

Yangang Liu, Pavlos Kollias, 2023-12-27 Improving weather and climate prediction with better representation of fast processes in atmospheric models Many atmospheric processes that influence Earth's weather and climate occur at spatiotemporal scales that are too small to be resolved in large scale models. They must be parameterized, which means approximately representing them by variables that can be resolved by model grids. *Fast Processes in Large Scale Atmospheric Models: Progress, Challenges and Opportunities* explores ways to better investigate and represent multiple parameterized processes in models and thus improve their ability to make accurate climate and weather predictions. Volume highlights include: Historical development of the parameterization of fast processes in numerical models Different types of major sub-grid processes and their parameterizations Efforts to unify the treatment of individual processes and their interactions Top-down versus bottom-up approaches across multiple scales Measurement techniques, observational studies, and frameworks for model evaluation Emerging challenges, new opportunities, and future research directions The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity. Its publications disseminate scientific knowledge and

provide resources for researchers, students, and professionals.

How to Belong Belinda A. Stillion

Southard, 2018-10-31 In *How to Belong*, Belinda Stillion Southard examines how women leaders throughout the world have asserted their rhetorical agency in troubling economic, social, and political conditions. Rather than utilizing the concept of citizenship to bolster political influence, the women in the case studies presented here rely on the power of relationships to create a more habitable world. With the rise of global capitalism, many nation-states that have profited from invigorated flows of capital have also responded to the threat of increased human mobility by heightening national citizenship's exclusionary power. Through a series of case studies that include women grassroots protesters, a woman president, and a woman United Nations director, Stillion Southard analyzes several examples of women, all as embodied subjects in a particular transnational context, pushing back against this often violent rise in nationalist rhetoric. While scholars have typically used the concept of citizenship to explain what it means to belong, Stillion Southard instead shows how these women have reimagined belonging in ways that have enabled them to create national, regional, and global communities. As part of a broader conversation centered on exposing the violence of national citizenship and proposing ways of rejecting that violence, this book seeks to provide answers through the powerful rhetorical practices of resilient and inspiring women who have successfully negotiated what it means to

belong, to be included, and to enact change beyond the boundaries of citizenship.

Impact of Human Activity on the Geological Environment EUROCK 2005 Pavel Konecny, 2005-05-12
This work focuses on the impact of human activity on the geological environment and contains over 100 papers dealing with laboratory and field research investigations in geomechanics, geoengineering and mathematical modelling. Topics covered are grouped into eight main themes: response of the rock mass to human impact; slope stability; field research; laboratory research; stability of underground openings; mathematical modelling; stress measurements, and mineral and rock disintegration.

Satellite Measurements of Clouds and Precipitation Hirohiko Masunaga, 2022-04-26
This book provides a thorough introductory description of the physical principles underlying the satellite remote sensing of clouds and precipitation. A diverse collection of satellite sensors is covered, including imagers, radars, and sounders over a broad spectral range from visible to microwave radiation. The progress in satellite instrument technology during the past two decades as represented by the Tropical Rainfall Measuring Mission (TRMM), CloudSat, and Global Measurement Mission (GPM) satellites has drastically improved our capability of measuring clouds and precipitation across the globe. At the same time, such rapid progress makes it increasingly challenging for scientists without specialized skills in remote sensing to fully grasp how satellite measurements are being made. This book is designed to mitigate that challenge. The targeted readers are graduate students and professional scientists seeking an extended summary of the theoretical background behind observations from space, ranging from fundamental physics (the statistical mechanics and radiative

processes, for instance) to more practical levels of theory such as retrieval algorithm design.

Livestock and water interactions in mixed crop-livestock farming systems of Sub-Saharan Africa: interventions for improved productivity

Descheemaeker, Katrien, Amede, Tilahun, Hailelassie, A., 2009-06-25 Focusing on mixed crop-livestock farming systems of sub-Saharan Africa, this review brings together the available knowledge in the various components of the livestock and water sectors. Through an analysis of livestock-water interactions, promising strategies and interventions to improve Livestock Water Productivity are proposed. In the biophysical domain, the numerous interventions relate to feed, water and animal management. These are interlinked with interventions in the socio-political-economic domain. The paper identifies critical research and development gaps in terms of methodologies for quantifying water productivity and integrating different scales, and also in terms of institutions and policies.

Perl & LWP Sean M. Burke, 2002-06-20 Perl soared to popularity as a language for creating and managing web content, but with LWP (Library for WWW in Perl), Perl is equally adept at consuming information on the Web. LWP is a suite of modules for fetching and processing web pages. The Web is a vast data source that contains everything from stock prices to movie credits, and with LWP all that data is just a few lines of code away. Anything you do on the Web, whether it's buying or selling, reading or writing, uploading or downloading, news to e-commerce, can be controlled with Perl and LWP. You can automate Web-based purchase orders as easily as you can set up a program to download MP3 files from a web site. Perl & LWP covers: Understanding LWP and its design

Fetching and analyzing URLs Extracting information from HTML using regular expressions and tokens Working with the structure of HTML documents using trees Setting and inspecting HTTP headers and response codes Managing cookies Accessing information that requires authentication Extracting links Cooperating with proxy caches Writing web spiders (also known as robots) in a safe fashion Perl & LWP includes many step-by-step examples that show how to apply the various techniques. Programs to extract information from the web sites of BBC News, Altavista, ABEBooks.com, and the Weather Underground, to name just a few, are explained in detail, so that you understand how and why they work. Perl programmers who want to automate and mine the web can pick up this book and be immediately productive. Written by a contributor to LWP, and with a foreword by one of LWP's creators, Perl & LWP is the authoritative guide to this powerful and popular toolkit.
