Aging and Judging Trophy Whitetails James C. Kroll,1996

A Field Guide to Aging Whitetail Bucks Quality Deer Management Association,2005-02-01

Quality Whitetails Karl V. Miller,R. Larry Marchinton,1995 In *Quality Whitetails*, Drs. Karl V. Miller and R. Larry Marchinton have assembled the expertise of some of the most knowledgeable white-tailed deer biologists across North America. These authorities provide in-depth explanations of deer population biology and genetics and discuss various effective management methods, including harvest strategies, habitat maintenance, regional issues, and feeding and mineral supplementation for antler production. Designed to help both sportsmen and biologists preserve their natural resources, this guide offers direction for maintaining robust deer populations that are in balance with their environment. -- From product description.

Subsistence and Stone Tool Technology Bradley J. Vierra,1995

Deer and People Naomi Sykes,Karis Baker,Ruth Carden,Richard Madgwick,2014-09-30 Deer have been central to human cultures throughout time and space: whether as staples to hunter-gatherers, icons of Empire, or the focus of sport. Their social and economic importance has seen some species transported across continents, transforming landscape as they went with the establishment of menageries and park. The fortunes of other species have been less auspicious, some becoming extirpated, or being in threat of extinction, due to pressures of over-hunting and/or human-instigated environmental change. In spite of their diverse, deep-rooted and long standing relations with human societies, no multi-disciplinary volume of research on cervids has until now been produced. This volume draws together research on deer from wide-ranging disciplines and in so doing substantially advances our broader understanding of human-deer relationships in the past and the present. Themes include species dispersal, exploitation patterns, symbolic significance, material culture and art, effects on the landscape and management. The temporal span of research ranges from the Pleistocene to the modern day and covers Europe, North America and Asia. Papers derived from international conferences held at the University of Lincoln and in Paris.

Observing and Evaluating Whitetails Dave Richards,2003-01-01

The Teaberry Strangler Laura Childs,2011-03-01 Charleston is bustling with shoppers looking for antiques-and, of course, Theodosia Browning's delicious teas. But when the cobblestone alleys clear, Theodosia finds the map store owner strangled to death. Many wanted her shop-but enough to kill? Most alarming, however, is Detective Tidwell's theory: that the killer mistook her for Theodosia.
