Descartes' Error Antonio Damasio,2005-09-27 Since Descartes famously proclaimed, I think, therefore I am, science has often overlooked emotions as the source of a person's true being. Even modern neuroscience has tended, until recently, to concentrate on the cognitive aspects of brain function, disregarding emotions. This attitude began to change with the publication of Descartes' Error in 1995. Antonio Damasio—one of the world's leading neurologists (The New York Times)—challenged traditional ideas about the connection between emotions and rationality. In this wondrously engaging book, Damasio takes the reader on a journey of scientific discovery through a series of case studies, demonstrating what many of us have long suspected: emotions are not a luxury, they are essential to rational thinking and to normal social behavior.

Posters for the People Ennis Carter,2017-02-14 This lavishly illustrated volume amasses nearly 500 of the best and most striking posters designed by artists working in the 1930s and early 1940s for the government-sponsored Works Progress Administration, or WPA. Posters for the People presents these works for what they truly are: highly accomplished and powerful examples of American art. All are iconic and eye-catching, some are humorous and educational, and many combine modern art trends with commercial techniques of advertising. More than 100 posters have never been published or catalogued in federal records; they are included here to ensure their place in the history of American art and graphic design. The story of these posters is a fascinating journey, capturing the complex objectives of President Franklin Roosevelt's New Deal reform program. Through their distinct imagery and clear and simple messages, the WPA posters provide a snapshot of an important era when the U.S. government employed hundreds of artists to create millions of posters promoting positive social ideals and programs and a uniquely American way of life. The resulting artworks now form a significant historical record. More than a mere conveyor of government information, they stand as timeless images of beauty and artistic accomplishment.

Descartes's Theory of Mind Desmond M. Clarke,2005 Descartes is possibly the most famous of all writers on the mind, but his theory of mind has been almost universally misunderstood, because his philosophy has not been seen in the context of his scientific work. Desmond Clarke offers a radical and convincing rereading, undoing the received perception of Descartes as the chief defender of mind/body dualism. For Clarke, the key is to interpret his philosophical efforts as an attempt to reconcile his scientific pursuits with the theologically orthodox views of his time.

Filmmaker's Philosopher DeBlasio Alyssa DeBlasio,2019-09-27 Known as the 'Georgian Socrates' of Soviet philosophy, Merab Mamardashvili was a defining personality of the late-Soviet intelligentsia. In the 1970s and 1980s, he taught required courses in philosophy at Russia's two leading film schools, helping to educate a generation of internationally prolific directors. Exploring Mamardashvili's extensive philosophical output, as well as a range of recent Russian films, Alyssa DeBlasio reveals the intellectual affinities amongst directors of the Mamardashvili generation - including Alexander Sokurov, Andrey Zvyagintsev and Alexei Balabanov. This multidisciplinary study offers an innovative way to think about film, philosophy and the philosophical potential of the moving image.

Fluent Forever Gabriel Wyner,2014-08-05 NATIONAL BESTSELLER •For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At

thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
