Early Friends Families of Upper Bucks, with Some Account of Their Descendants Clarence Vernon Roberts,Warren Smedley Ely,2009-06 Early Friends Families of Upper Bucks is a collection of genealogical and historical information pertaining to the first settlers of the upper part of Bucks County, Pennsylvania. Separate chapters are assigned to each family, and approximately 12,000 persons are named and identified. The genealogies commence with the first of the Bucks County line (usually during the period of the eighteenth century, but also earlier) and proceed, on average, through about eight generations.

Mermaid Construction Tasaku Tsunoda,2020-08-10 This volume provides detailed studies of the crosslinguistically unusual mermaid construction in seventeen languages of Asia, including Modern Standard Japanese, and one language of Africa. This construction appears to be absent in languages of Europe, Oceania and the Americas. The name - mermaid construction - alludes to its paradoxical make-up, where the structure closely resembling a verb-predicate clause ends with what may look like a noun-predicate clause. Superficially it looks biclausal; however, syntactically it is monoclausal. It has a compound predicate which contains an independent noun, a clitic or an affix derived from a noun, or a nominalizer. Its compound predicate has a modal, evidential, aspectual, temporal, stylistic or discourse-related meaning. The paradox is resolved from a diachronic perspective insofar as a biclausal structure is reanalyzed as a monoclausal one. This volume shows how a noun may be reanalyzed to become a constituent of a predicate. It constitutes an important contribution to research on grammaticalization and in particular, the grammaticalization of nouns and more generally, to the typology of syntactic reanalysis.
