Language and Style in a Renaissance Epic H. F. Woodhouse,1982 This book reproduces, with slight alterations, the first half of a doctoral thesis presented to the University of Cambridge in 1978. What the book offers is a comprehensive, even if not actually exhaustive, account of the corrective principles which underlie Berni's rewriting of Boiardo's epic. It is therefore deliberately conceived as a study of the specific motives for Berni's intervention rather than of the aesthetic results that derive from it. The chapters comprise; Phonology, Morphology, Grammar, Syntax, Versification, Lexis, Cliche, Propriety, and The Mechanics of Reconstruction.

The Jews in Genoa Rossana Urbani,Guido Nathan Zazzu,1999 These volumes of the Documentary History of the Jews in Italy, illustrate the history of the Jews in Genoa and surroundings from Antiquity to the French Revolution. The earliest documentary evidence takes the form of letters from King Theodoric. For the Middle Ages the documentation is relatively fragmentary and sporadic. Later there is greater abundance of historical evidence, which portrays chiefly the destinies of the Jews in the Republic from the sixteenth century on, when the presence of the Jews became permanent and a regular community was established also in the capital. The historical records presented illustrate mainly the relationship between the government of the Genoese Republic and the Jews, the latter's economic activities and their communal and social life. Some of the detailed descriptions of the Jewish population in Genoa, their living conditions and occupations, allow for a close examination of the social conditions of this Northern Italian community. For a while Genoa became a haven of refuge for some of the exiles from Spain, including the historian Joseph Hacoen and members of the Abarbanel family. The volumes are provided with an extensive introduction, bibliography, glossary and indexes.

*Re-Reading Leonardo* Claire Farago,2017-07-05 For nearly three centuries Leonardo da Vinci's work was known primarily through the abridged version of his Treatise on Painting, first published in Paris in 1651 and soon translated into all the major European languages. Here for the first time is a study that examines the historical reception of this vastly influential text. This collection charts the varied interpretations of Leonardo's ideas in French, Italian, Spanish, English, German, Dutch, Flemish, Greek, and Polish speaking environments where the Trattato was an important resource for the academic instruction of artists, one of the key sources drawn upon by art theorists, and widely read by a diverse network of artists, architects, biographers, natural philosophers, translators, astronomers, publishers, engineers, theologians, aristocrats, lawyers, politicians, entrepreneurs, and collectors. The cross-cultural approach employed here demonstrates that Leonardo's Treatise on Painting is an ideal case study through which to chart the institutionalization of art in Europe and beyond for 400 years. The volume includes original essays by scholars studying a wide variety of national and institutional settings. The coherence of the volume is established by the shared subject matter and interpretative aim: to understand how Leonardo's ideas were used. With its focus on the active reception of an important text overlooked in studies of the artist's solitary genius, the collection takes Leonardo studies to a new level of historical inquiry. Leonardo da Vinci's most significant contribution to Western art was his interpretation of painting as a science grounded in geometry and direct observation of nature. One of the most important questions to emerge from this study is, what enabled the same text to produce so many different styles of painting?
