*Wonderland* Steven Johnson,2016-11-15 “A house of wonders itself. . . . Wonderland inspires grins and well-what-d'ya-knows” —The New York Times Book Review From the New York Times-bestselling author of *How We Got to Now* and *Extra Life*, a look at the world-changing innovations we made while keeping ourselves entertained. This lushly illustrated history of popular entertainment takes a long-zoom approach, contending that the pursuit of novelty and wonder is a powerful driver of world-shaping technological change. Steven Johnson argues that, throughout history, the cutting edge of innovation lies wherever people are working the hardest to keep themselves and others amused. Johnson's storytelling is just as delightful as the inventions he describes, full of surprising stops along the journey from simple concepts to complex modern systems. He introduces us to the colorful innovators of leisure: the explorers, proprietors, showmen, and artists who changed the trajectory of history with their luxurious wares, exotic meals, taverns, gambling tables, and magic shows. In *Wonderland*, Johnson compellingly argues that observers of technological and social trends should be looking for clues in novel amusements. You'll find the future wherever people are having the most fun.

**Into the Sky with Diamonds** Ronald P. Grelsamer,2010-09 One small step for a man. One giant leap for rock 'n roll. NASA's race with the Russians to land a man on the moon. The meteoric rise of the Beatles, considered by many to have revolutionized the music industry. In the postwar era, each stood as an unprecedented cultural watershed. Together they captured the heady zeitgeist of the 1960s, and ignited the imagination of - just about everyone on the planet. Into the Sky with Diamonds is an exhilarating account of these two global phenomena, as seen through the eyes of Dutch Richtman, a young, enterprising NASA engineer who manages to snag a front row seat to both. Dutch's memoir takes us on the turbulent ride of breathtaking successes and harrowing failures that marked the early years of space travel - beginning with Projects Mercury and Gemini leading up to the Apollo program. We discover the thrills and sacrifices, personalities and politics involved in navigating these early space missions. And through Dutch's fictional correspondence with buddy Mal Evans (a character true to the Beatles' real-life roadie of the same name), we are introduced to a rock band of four working class lads from Liverpool who just happen to turn the music industry on its head and become the unwitting leaders of a youth movement for change. We witness it all: the band's electrifying rise, their unforgettable debut on the Ed Sullivan show, the social, political, and religious controversies they generated, and their painful dissolution, as John's fierce attachment to Yoko Ono forever alters the trajectory of the Fab Four.
