**Chinnovation** Yinglan Tan,2011-05-04 It is widely-believed that China's entrepreneur class has grown and their businesses are succeeding primarily due to their knowledge of the domestic market, quick adaptation to market changes, and their resourcefulness. But innovation? Forget about it. Well, not quite. Drawing on a wealth of on-the-ground stories and thorough research, Chinnovation: How Chinese Innovators Are Changing the World shows how Chinese companies of every stripe have dispelled this myth and overcome the barriers to successful, profitable innovation. How did Neil Shen, co-founder of CTRIP Capital China, see the opportunity for a Chinese travel site? How did Ray Zhang, CEO of Ehi, scale up one of the most innovative hybrid car-rental companies in China? How did Zhang Tao, CEO of Dianping, start a ZAGAT-inspired user-review site for restaurants and establish a continuous process of innovation? Yinglan Tan has spent more than five years learning the secrets of Chinese innovators, a fast-growing subculture playing key roles in China's transformative transition from Made in China to Innovated in China. Learn: What is the path that an innovative Chinese private-owned enterprise take? How blue-chip innovators remix business models successfully in China? What are the capabilities that these innovative companies acquire? How they harness the necessary resources and navigate around legal restrictions? How do they attract, train and retain talent? How do these companies experiment with innovative approaches and also manage the risk of innovation? What are the lessons learnt and how would these entrepreneurial innovators advise others who are embarking on the same journey? China's rapid economic growth has made it a crucial market but multinational corporations are now competing with China's own homegrown businesses. Chinnovation: How Chinese Innovators Are Changing The World uncovers the common threads amongst Chinese entrepreneurs as they reach into a wider world.

*Marketing Strategy In The Digital Age: Applying Kotler's Strategies To Digital Marketing* Milton Kotler,Tiger Cao,Sam Wang,Colllen Qiao,2020-08-26 The market changes faster than marketing. In essence, marketing strategy has undergone only two eras, the entity era and the bit era, also known as the industrial age and the digital age. In the age of digital society, all CEOs, CMOs and senior marketing executives must consider how to change their strategies, improve the role of marketing and adopt emerging technological and data tools to integrate with the Internet. The goal of digital marketing strategy is not to disrupt existing marketing strategies, but to complement, integrate and develop the two at the same time. In this book, the authors provide detailed discussion and practical analysis on the relationship between marketing and digital technologies and propose a marketing implementation framework for digital strategy platforms. Standing for Recognize, Reach, Relationship and Return, the 4R system is a powerful strategic trading tool for digital implementation, especially for CEOs and CMOs. All other tools, such as data platforms, content marketing, DSP digital advertising and digital marketing ROI design essentially serve the 4R system. As such, the authors advocate for firms to restructure their digital marketing strategy around the 4R system.

Japanese food is often perceived as pure, natural, healthy and timeless, and these words not only fuel a hype surrounding Japanese food and lifestyle worldwide, but also a domestic retro-movement that finds health and authenticity in ‘traditional’ ingredients, dishes and foodways. The authors in this volume bring together research from the fields of history, cultural and religious studies, food studies as well as political science and international relations, and aim to shed light on relevant aspects of culinary nationalism in Japan while unearthing the underlying patterns and processes in the construction of food identities.
