This book covers everything you need to know about how you can lose weight and sustain it with ease. It includes all the information you need to know about using food points, how to calculate them, how to work out your optimal intake per day, how you can still lose weight while eating what you want, and most importantly, how you can integrate a healthy lifestyle into your routine so that once you lose weight, it stays off. Many people feel that dieting is restrictive, boring, and prevents them from eating their favorite foods. However, this is not what food points dieting is like at all. It doesn't restrict any kind of food and helps you to lose weight in a flexible way. That is because it derives from the proven concept of calories in vs. calories out. The method has been simplified further into a point based system where instead of counting calories, we are counting instead. Many people fail their diets simply because they are too restrictive or they demand a complete change in lifestyle overnight. We can all agree restrictive diets rarely work long-term. The food points diet outlined here does not force drastic changes and has a proven track record of success. . What Makes This Book Unique? This book is a collection of tried and tested dieting information and a guide to keep you positive whilst dieting. Big Fat Lies: How the diet industry is making you sick, fat & poor David Gillespie,2012-02-22 'Diets and exercise won't help us lose weight. Vitamins and minerals are a waste of money and sometimes downright dangerous. Sugar makes us fat and sick. And polyunsaturated fat gives us cancer and works with sugar to give us heart disease. This book exists because I desperately hope that with a little knowledge we can all vote with out feet and change the rules of the game before the game kills us.' For decades we've been told to eat less, exercise more, eat less saturated fat, eat more polyunsaturated oils, and take vitamin and omega-3 fatty acid supplements. For decades this is what we've done, but the rates of obesity, heart disease, type 2 diabetes, dementia and cancer have never been higher. The real culprits, David Gillespie tells us, are sugar and polyunsaturated oils. Analysing the latest scientific evidence, he shows us why the outlines a plan to avoid them both without missing out or 'dieting'. Gillespie exposes the powerful role the multibillion-dollar food, health and diet industries have played in promoting the health messages we follow - or feel guilty about not following. Discovering the truth about diets, exercise, supplements and processed food is your first step towards improved health, greater happiness and a longer life for you and your family. 'Gillespie is an informed and entertaining writer who makes his subject fascinating, and inspires with his passion and logic.' G MAGAZINE

World War II for Kids Richard Panchyk, 2005-11-01 Now more than ever, kids want to know about our country's great struggles during World War II. This book is packed with information that kids will find fascinating, from Hitler's rise to power in 1933 to the surrender of the Japanese in 1945. Much more than an ordinary history book, it is filled with excerpts from actual wartime letters written to and by American and German troops, personal anecdotes from people who lived through the war in the United States, Germany, Britain, Russia, Hungary, and Japan, and gripping stories from Holocaust survivors—all add a humanizing global perspective to the war. This collection of 21 activities shows kids how it felt to live through this monumental period in history. They will play a rationing game or try the butter extender recipe to understand the everyday sacrifices made by wartime families. They will try their hands at military strategy in coastal defense, break a code, and play a latitude and longitude tracking game. Whether growing a victory garden or staging an adventure radio program, kids will appreciate the hardships and joys experienced on the home front.

How to Feel Good Naked Sheila Bridge, 2012-07-18 The concept of the ideal sexy body still dominates fashion, advertising - and our thinking. Success, status and sex appeal are all interwoven. Sheila argues that this is dangerous to our well-being and contrary to the central Christian idea of our acceptance in Christ. She shows how we can break bad habits of body and mind, make the most of our corporeal selves and enjoy being the way God made us. As we learn to love our bodies we learn to love ourselves. Makeovers, she writes, are just not enough. 'I don't think you can just fix up the outside of a person. If you don't ever take a look on the inside and unpack all the self-loathing, and replace it with a deep down self-acceptance and a sense of being unconditionally loved, then no amount of surface rearrangement will ever be enough.'

Weight Watchers Smart Points Cookbook Dexter Jackson, 2017-02-15 Voted as the #1 Way to Lose Weight in 2017! See what all the hype is about! Get these 100 recipes with SmartPoints information and everything, and see how thousands of people are eating, and still losing weight! Weight Watchers is a weight loss program that relies on a point system for its recipes and foods, rather than enforcing a specific caloric restriction or other dietary restrictions, to help its followers achieve weight loss. When you follow the Weight Watchers program, you are allowed to eat a certain number of points each day. This book includes 100 Weight Watchers SmartPoints Recipes. This new SmartPoints system was introduced in December 2015 and was an upgrade to the old ProPoints system, and users since have achieved 2.6% more weight loss than people participating in any other diet. SmartPoints encourages you to make food choices that are healthier, more nutritious, and will leave you feeling better and with more energy. You can calculate how many SmartPoints you are allowed to eat per day, by using an online calculator on their website where you will need to include your weight, height, weight loss goals etc. This is your SmartPoints budget, and you can decide for yourself how you choose to spend your SmartPoints. Foods that are higher in saturated fat and sugar are given higher SmartPoint totals, while other foods that contain lean protein have lower SmartPoint values. SmartPoints are calculated on 4 components of each food and that is calories, saturated fat, sugar, and protein. So naturally, you are steered towards healthier foods choices on a daily basis. Every food/meal/recipe is assigned a SmartPoint value and this is what the weight loss program is based upon. Its incredibly simple, and that's part of the beauty of it. Simplicity yields results. These are the very basics of how the Weight Watchers SmartPoints program works, now let's get into some amazing recipes for you to take advantage of on your weight loss journey. Some of the Recipes inside include: Candy Corn Fruit Parfait Instant Pot Pineapple Pork Slow Cooker Sloppy Joes Strawberry Waffle Shortcake Cheesy Chicken and Rice Casserole Low Fat Cranberry Crumble Bars Crock Pot Meatball Soup And 93 more Recipes!
