Softimage Ingrid Hoelzl,Remi Marie,2015-09-01 With today's digital technology, the image is no longer a stable representation of the world, but a programmable view of a database that is updated in real time. It is not only part of a program, but it contains its own operating code: the image is a program in itself. Softimage aims to account for that new reality, taking readers on a journey that gradually undoes our unthinking reliance on the apparent solidity of the photographic image and building in its place an original and timely theorization of the digital image in all its complexity, one that promises to spark debate within the evolving fields of image studies and software studies.
