Invisible Digital Aylish Wood, 2024-01-11 Invisible Digital helps us make sense of something we cannot see by presenting an innovative approach to digital images and digital culture. At its heart is a novel method for exploring software used in the creation of moving images as markers of converging cultural, organizational and technological influences. The three main case studies of Invisible Digital are the animated feature Moana (2016) and the computer games No Man's Sky (2016) and Everything (2017). All three were created using procedural techniques: simulation software for Moana, and procedural content generation for No Man's Sky and Everything. Production culture disclosures associated with procedural techniques often emphasize the influences of automated systems and their algorithms, making them ideal for a study that interrogates digital processes. The approach of Invisible Digital is informed by relational theories and the concept of entanglement based on materialist perspectives, combined with insights from work that more explicitly interrogates algorithms and algorithmic culture. Aylish Wood employs the notion of assemblages to introduce the concept of material-cultural narratives. Using this conceptual framework, she draws out material-cultural narratives for each case study to demonstrate what they reveal about software and digital culture. These analyses of software provide a widely applicable method through which moving image studies can contribute more fully to the wider and growing debates about algorithmic culture.

Thinking In Numbers Daniel Tammet,2013-07-30 The irresistibly engaging book that enlarges one's wonder at Tammet's mind and his all-embracing vision of the world as grounded in numbers (Oliver Sacks, MD). *Thinking in Numbers* is the book that Daniel Tammet, mathematical savant and bestselling author, was born to write. In Tammet's world, numbers are beautiful and mathematics illuminates our lives and minds. Using anecdotes, everyday examples, and ruminations on history, literature, and more, Tammet allows us to share his unique insights and delight in the way numbers, fractions, and equations underpin all our lives. Inspired variously by the complexity of snowflakes, Anne Boleyn's eleven fingers, and his many siblings, Tammet explores questions such as why time seems to speed up as we age, whether there is such a thing as an average person, and how we can make sense of those we love. His provocative and inspiring new book will change the way you think about math and fire your imagination to view the world with fresh eyes.

25 OFFBEAT CAREER OPTIONS Annapurna Murthy,2022-12-05 Education enables every human to live their best life and to handle different situations that life may present to them. Every individual has the right to get educated. Every person has special skills and abilities. One only needs to identify and tap into that potential. Some gifted, driven

students plan and join courses of their choice. Most students are confused with the number of courses available to them. They are not confident if they are making the right choices or whether they will do well in the course they choose. This book is an attempt to highlight course options for those students who do not take the formal education route like graduation, post-graduation, doctoral programmes or correspondence or open university courses. Such students still have many options open to them. One may have a good voice, love for animals, passion for cooking, an eye to capture the beauty of nature, ability to dance, skills in music, etc. They can all get trained and take up lucrative careers of their choice based on their aptitude. Self-confidence, perseverance, grit, motivation to achieve, and passion are absolutely needed for a student to be successful. Make your choices based on your aptitude and interest. Once you put in the effort from your side, success will follow.

Digital Narrative Spaces Daniel Punday, 2021-12-30 There is a broad consensus that digital narrative is spatial, but what this critical term means and how it is used varies greatly depending on the discipline from which it is approached. *Digital Narrative Spaces* brings together essays by prominent scholars in electronic literature and other forms of digital authorship to explore the relationship between story and space across these disciplines. This volume includes an introduction with Marie-Laure Ryan's typology of space, followed by thought-provoking individual chapters which explore innovative explorations of electronic literature, locative media, literary tourism, and the mapping of real-world literary spaces. The collection closes with an essay analyzing continuities and discontinuities in theory of space across the chapters. This volume will provide an important framework for establishing a dialogue across disciplines and future scholarship in these fields.

Aquafaba Sébastien Kardinal,Laura VeganPower,2018-06-25 From the Latin aqua (water) and faba (beans), aquafaba is the cooking liquid found in tinned beans and other legumes like chickpeas or the liquid left over from cooking your own. It can be used to replace egg whites in many sweet and savory recipes. Its unique mix of starches, proteins, fiber and sugars, which are left in the water after cooking, gives aquafaba a wide range of emulsifying, foaming, binding and thickening properties, making it the perfect ingredient in vegan cooking or recipes for those who have egg allergies. It's amazing to think that this precious liquid that we all threw down the sink could have such incredible properties? This is a real culinary revolution. The authors give all the secrets of aquafaba; how to make your own at home with just chickpeas and water and then how to use it in a dazzling array of recipes. Aquafaba beaten with a whisk produces a mountain of snowy white, giving volume to your muffins, and binding in your pasta. At last for vegans, lemon meringue pie, mousses, mayonnaise, macaroons and meringues are on the menu.

Sébastien and Laura have thought of everything. Having created your aquafaba there are even a collection of recipes at the end of the book which use those cooked chickpeas to make hummus, falafels and curries.
