Your Library Is the Answer Christina T. Russo,Cathy Swan,2015-01-22 Today's tech-savvy and digitally connected students present a new challenge for today's school librarians. This book offers the 21st-century tools and know-how necessary for educators to appeal to and challenge students to learn—and to want to learn. What are the best ways to motivate students to become engaged and develop a passion for learning? Can appealing to their desire for socialization and constant communication—attributes of their lives outside of education—via the integration of cutting-edge technologies and new media in the library or classroom serve to ignite creativity, curiosity, and critical thinking? This book shows how you can make use of non-traditional tools such as popular social networks, collaborative technologies, and cloud computing

to teach information and communications technologies integrated with the school curriculum to improve student learning—and demonstrates how these same technologies can help you measure skills and mastery learning. The book provides an easy-to-follow blueprint for using collaborative techniques, innovation, and teaching for creativity to achieve the new learning paradigm of self-directed learning, such as flipping the classroom or library. Readers of this book will find concrete, step-by-step examples of proven lesson plans, collaborative models, and time-saving strategies for the successful integration of American Association of School Librarians (AASL) standards. The authors—both award-winning teachers—explain the quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information and communications technologies instruction, showing that they both enhance student learning outcomes and provide data for measuring their impact on learning.

Growing Schools Debbie Abilock, Kristin Fontichiaro, Violet H. Harada, 2012-06-11 Presenting examples of school librarians leading professional learning in numerous contexts and for diverse learning goals with remarkable success, this book will inspire other practitioners to initiate and refine professional learning in their schools and districts. School administrators are recognizing that school librarians are ideal to lead professional development because they service the entire school network, from the students and faculty to families and the community. As a national downturn in educational funding is diminishing districts' ability to optimally staff libraries, investing energy in professional development is a sound strategy to bring information literacy skills to every student—especially in buildings with part-time librarians, or districts with

only a single librarian of record. *Growing Schools: Librarians as Professional Developers* stands apart from other works as the first book that directly addresses the potential role of the school librarian as a staff developer. Within the chapters, the authors relate their professional development journeys, collectively representing experience within K–12 public and private institutions, district and regional units, and universities across the United States and Canada. The work provides various approaches to professional development with a range of processes and techniques that have been proven effective in different contexts and in achieving diverse learning goals. Practitioners at the building and district levels as well as school principals, state and district personnel, and library educators will find this book insightful and instructive.
