THE INTELLECTUAL CAPITAL OF SCHOOLS ANTHONY KELLY,2007-05-08 A teacher may get good, even astounding, results from his pupils while he is teaching them and yet not be a good teacher; because it may be that, while his pupils are directly under his influence, he raises them to a height which is not natural to them, without fostering their own capacities for work at this level, so that they immediately decline again as soon as the teacher leaves the classroom. Ludwig Wittgenstein, 1889 – 1951. It is difficult to measure effectiveness in not-for-profit organisations like schools, colleges and universities. There is no ‘bottom-line’ against which to gauge performance, they have limited technical development and managers struggle to make meaningful comparisons between outcomes and targets. In education, well-publicised attempts have been made to establish – some would say impose – a set of criteria by which organisations judge success or failure. These have been largely subjective – the percentage of inspected classes regarded as good, the extent to which staff is involved in decision making, the appropriateness of the leadership shown by senior managers, and so on – if occasionally peppered with quantitative measures, like the percentage of students achieving certain grades in public examinations, to sustain the illusion of objectivity. This is not to fault the aspiration necessarily, though initially at least it created a surveillance culture in schools that did justice to neither the inspected nor the argument for inspection. Happily, this is changing.

MATHEMATICS MASTERCLASSES FOR YOUNG PEOPLE MICHAEL SEWELL,MICHAEL J. SEWELL,2017 This work consists of a series of ‘masterclasses’, short sessions of mathematics beyond the standard school syllabus, aimed at young mathematics who wish to stretch themselves. The book provides teachers with a source of novel and interesting topics to supplement their standard material, and as independent reading for pupils themselves. The masterclasses in this book cover a huge range of topics including algebra, geometry, prime numbers, fractions, Pythagoras, Fermat’s last theorem and Fibonacci. It serves as a fantastic gateway to the wonders of mathematics, and a fine starter for fledgling mathematical minds. Book jacket.
