Divvy Up Stephen Marlowe,2023-01-03 In a post-apocalyptic city, scavenger Hardesty schemes to steal valuables off a condemned man's corpse. When his partner jumps the gun, killing the man early, Hardesty stays behind to loot the body. But the man's vengeful widow catches him red-handed. After a bombing raid, he flees with his paltry gains, now hunted by the widow, his partner, the law, and fate itself. This gritty tale paints a chilling portrait of society reduced to its basest impulses. Yet glimmers of humanity persist -- even in the ruins...

Fostering Children's Mathematical Power Arthur J. Baroody,Ronald T. Coslick,1998-09-01 Teachers have the responsibility of helping all of their students construct the disposition and knowledge needed to live successfully in a complex and rapidly changing world. To meet the challenges of the 21st century, students will especially need mathematical power: a positive disposition toward mathematics (curiosity and self confidence), facility with the processes of mathematical inquiry (problem solving, reasoning and communicating), and well connected mathematical knowledge (an understanding of mathematical concepts, procedures and formulas). This guide seeks to help teachers achieve the capability to foster children's mathematical power - the ability to excite them about mathematics, help them see that it makes sense, and enable them to harness its might for solving everyday and extraordinary problems. The investigative approach attempts to foster mathematical power by making mathematics instruction process-based, understandable or relevant to the everyday life of students. Past efforts to reform mathematics instruction have focused on only one or two of these aims, whereas the investigative approach accomplishes all three. By teaching content in a purposeful context, an inquiry-based fashion, and a meaningful manner, this approach promotes children's mathematical learning in an interesting, thought-provoking and comprehensible way. This teaching guide is designed to help teachers appreciate the need for the investigative approach and to provide practical advice on how to make this approach happen in the classroom. It not only dispenses information, but also serves as a catalyst for exploring, conjecturing about, discussing and contemplating the teaching and learning of mathematics.

Waiting in the background is a psychopath planning to strike out against the outsiders invading his tranquil community recently transformed into a high tech Mecca. Industrial espionage contributes to the plot by Breitling from Electropulse AG, a major world class weapons manufacture who also wants those diamond lens secrets. Amidst it all is the discovery in Siberia of the world's largest diamond and Robert Polansky's attempt to acquire it. At Breitling's refuge on Great Albacore Cay in the Bahamas, submarine deployed Navy SEALs plan a strike. Who will be victorious? Does Jane find the love and security she craves. Who eventually ends up with all the wealth? How will it all end? Readers are kept on edge. Love, hate, adultery, revenge, international intrigue, robbery, and murder all contribute to the suspense.
