**Examining Evolutionary Trends in Equus and its Close Relatives from Five Continents** Raymond Louis Bernor, Gina Marie Semprebon, Florent Rivals, Leonardo Santos Avilla, Eric Scott, 2020-03-12 Evolution of the horse has been an often-cited primary example of evolution, as well as one of the classic and important stories in paleontology for over a century and a half, due to their rich fossil record across 5 continents: North America, South America, Europe, Asia and Africa. The recent horse has served a profound role in human ancestry, including agriculture, commerce, sport, transport, warfare, and in prehistory, for the subsistence of humans. Many studies have examined the evolution of the Equidae and chronicled the striking changes in skulls, dentition, limbs, and body size which have long been perceived to be a response to environmental shifts through time. Most comprehensive studies heretofore have: (1) focused on the “Great Transformation” - changes that occurred in the early Miocene, (2) involved tracking long-term diversity or paleoecological trends on a single continent or within a geographical locality, or (3) concentrated on the 3-toed hipparions. The Plio-Pleistocene evolutionary stage of horse evolution is punctuated by the great climatic fluctuations of the Quaternary beginning 2.6 Ma which influenced Equus evolution, biogeographic dispersion and adaptation on a nearly global scale. The evolutionary biology of Equus evolution across its entire range remains relatively poorly understood and often highly controversial. Some of this lack of understanding is due to assumptions that have arisen because of the relatively derived craniodental and postcranial anatomy of Equus and its close

relatives which has seemed to imply that that these forms occupied relatively homogenous and narrow dietary and locomotor niches - notions that have not been adequately addressed and rigorously tested. Other challenges have revolved around teasing apart environmentally-driven adaptation versus phylogenetically defined morphological change. Geochronologic age control of localities, geographic provinces and continents has improved, but in no way is absolute and can be reexamined in our proposed volume. Temporal resolution for paleodietary, paleohabitat and paleoecological interpretations are also challenging for understanding the evolution of Equus. Our proposed volume attempts to assemble a group of experts who will address multiple dimensions of Equus' evolution in time and space.

*Recent Innovations in Artificial Intelligence and Smart Applications* Mostafa Al-Emran, Khaled Shaalan, 2022-10-01 This book tackles the recent research trends on the role of AI in advancing automotive manufacturing, augmented reality, sustainable development in smart cities, telemedicine, and robotics. It sheds light on the recent AI innovations in classical machine learning, deep learning, Internet of Things (IoT), Blockchain, knowledge representation, knowledge management, big data, and natural language processing (NLP). The edited book covers empirical and reviews studies that primarily concentrate on the aforementioned issues, which would assist scholars in pursuing future research in the domain and identifying the possible future developments of AI applications.

**Emerging Technologies in Virtual Learning Environments** Becnel, Kim, 2019-06-28 The emergent phenomena of virtual reality, augmented reality, and mixed reality is having an impact on ways people communicate with technology and with each other. Schools and higher education institutions are embracing these emerging technologies and implementing them at a rapid pace. The

challenge, however, is to identify well-defined problems where these innovative technologies can support successful solutions and subsequently determine the efficacy of effective virtual learning environments. *Emerging Technologies in Virtual Learning Environments* is an essential scholarly research publication that provides a deeper look into 3D virtual environments and how they can be developed and applied for the benefit of student learning and teacher training. This book features a wide range of topics in the areas of science, technology, engineering, arts, and math to ensure a blend of both science and humanities research. Therefore, it is ideal for curriculum developers, instructional designers, teachers, school administrators, higher education faculty, professionals, researchers, and students studying across all academic disciplines.

The Japanese Economy Victor Argy, Leslie Stein, 1996-11-04 The book offers a concise account of modern Japanese economic history and the essence of postwar macroeconomic issues and policy. The nature of the Japanese corporation, labour relations and technological innovations are discussed, with three chapters devoted to Japan's international economic relations and trade surplus, service sector (including distribution, health and education) and with Japan's quality of life (relating to matters such as pollution and urbanisation).

**Capturing Sound** Mark Katz, 2010-10-07 Fully revised and updated, this text adds coverage of mashups and auto-tune, explores recent developments in file sharing, and includes an expanded conclusion and bibliography.

*Quantitative Techniques for Competition and Antitrust Analysis* Peter Davis, Eliana Garcés, 2009-11-16 This book combines practical guidance and theoretical background for analysts using empirical techniques in competition and antitrust investigations. Peter Davis and Eliana Garcés show how to integrate empirical methods, economic theory, and broad evidence about

industry in order to provide high-quality, robust empirical work that is tailored to the nature and quality of data available and that can withstand expert and judicial scrutiny. Davis and Garcés describe the toolbox of empirical techniques currently available, explain how to establish the weight of pieces of empirical work, and make some new theoretical contributions. The book consistently evaluates empirical techniques in light of the challenge faced by competition analysts and academics--to provide evidence that can stand up to the review of experts and judges. The book's integrated approach will help analysts clarify the assumptions underlying pieces of empirical work, evaluate those assumptions in light of industry knowledge, and guide future work aimed at understanding whether the assumptions are valid. Throughout, Davis and Garcés work to expand the common ground between practitioners and academics.

International Joint Ventures: Economic and Organizational Perspectives Kalyan

Chatterjee, Barbara Gray, 2013-03-09 International Joint Ventures: Economic and Organizational Perspectives is the result of a symposium on International Joint Ventures and Strategic Alliances held by the Center for Research in Conflict and Negotiation at Pennsylvania State University. The book gives a cross-disciplinary treatment of the economic and managerial issues affecting joint venture formation, operation and performance, including subjects ranging from the impact of international trade policy to cross-cultural communication on joint venture operations. The volume enriches our understanding of each discipline from the vantage point of the other, building a more complete understanding of joint ventures as a mode of entry into domestic and international

markets. Two categories of question are analyzed: issues of importance to the joint potential and actual participants in a joint venture, and issues related to the social effects of joint ventures from the point of view of society as a whole or its agent, the regulator. The questions are addressed using simple theoretical models and conceptual discussions as well as empirical analyses. Audience: Executives, policy makers and scholars of economics, decision analysis, political science and management.

*Für Volk and Führer* Erwin Bartmann, 2013-10-19 Like many Germans, Berlin schoolboy Erwin Bartmann fell under the spell of the Zeitgeist cultivated by the Nazis. Convinced he was growing up in the best country in the world, he dreamt of joining the Leibstandarte, Hitler's elite Waffen SS unit. Tall, blond, blue-eyed, and just seventeen-years-old, Erwin fulfilled his dream on Mayday 1941, when he gave up his apprenticeship at the Glaser bakery in Memeler Strasse and walked into the Lichterfelde barracks in Berlin as a raw, volunteer recruit. On arrival at the Eastern Front in late summer 1941, Erwin was assigned to a frontline communications squad attached to 4. Kompanie and soon discovered that survival was a matter of luck - or the protection of a guardian angel. Good fortune finally deserted Erwin on 11 July 1943 when shrapnel sizzled through his lung during the epic Battle of Kursk-Prokhorovka. Following a period of recovery, and promotion to Unterscharführer, Erwin took up a post as machine-gun instructor with the Ausbildung und Ersatz Bataillon, a training unit based close to the eastern section of the Berliner Ring Autobahn. When the Red Army launched its massive assault on the Seelow Heights, Erwin's unit, now incorporated into Regiment Falke, was deployed to the southern flank of the Berlin-Frankfurt Autobahn, close to the River Oder. The German defenses soon crumbled and with the end of the Reich inevitable, Erwin was forced to choose between a struggle for personal survival and the fulfillment of his SS oath of

'loyalty unto death'. From the war on the southern sector of the Eastern Front to a bomb-shattered Berlin populated largely by old men and demoralized lonely women, this candid eyewitness account offers a unique and sometimes surprising perspective on the life of a young Leibstandarte SS Adolf Hitler volunteer.

**Groove Music** Mark Katz, 2012-04-01 It's all about the scratch in Groove Music, award-winning music historian Mark Katz's groundbreaking book about the figure that defined hip-hop: the DJ. Today hip-hop is a global phenomenon, and the sight and sound of DJs mixing and scratching is familiar in every corner of the world. But hip-hop was born in the streets of New York in the 1970s when a handful of teenagers started experimenting with spinning vinyl records on turntables in new ways. Although rapping has become the face of hip-hop, for nearly 40 years the DJ has proven the backbone of the culture. In Groove Music, Katz (an amateur DJ himself) delves into the fascinating world of the DJ, tracing the art of the turntable from its humble beginnings in the Bronx in the 1970s to its meteoric rise to global phenomenon today. Based on extensive interviews with practicing DJs, historical research, and his own personal experience, Katz presents a history of hip-hop from the point of view of the people who invented the genre. Here, DJs step up to discuss a wide range of topics, including the transformation of the turntable from a playback device to an instrument in its own right, the highly charged competitive DJ battles, the game-changing introduction of digital technology, and the complex politics of race and gender in the DJ scene. Exhaustively researched and written with all the verve and energy of hip-hop itself, Groove Music will delight experienced and aspiring DJs, hip-hop fans, and all students or scholars of popular music and culture.

**Private Power, Online Information Flows and EU Law** Angela Daly,2016-12-01 This monograph examines how European Union law and regulation address concentrations of private economic power which impede free information flows on the Internet to the detriment of Internet users' autonomy. In particular, competition law, sector specific regulation (if it exists), data protection and human rights law are considered and assessed to the extent they can tackle such concentrations of power for the benefit of users. Using a series of illustrative case studies, of Internet provision, search, mobile devices and app stores, and the cloud, the work demonstrates the gaps that currently exist in EU law and regulation. It is argued that these gaps exist due, in part, to current overarching trends guiding the regulation of economic power, namely neoliberalism, by which only the situation of market failure can invite ex ante rules, buoyed by the lobbying of regulators and legislators by those in possession of such economic power to achieve outcomes which favour their businesses. Given this systemic, and extra-legal, nature of the reasons as to why the gaps exist, solutions from outside the system are proposed at the end of each case study. This study will appeal to EU competition lawyers and media lawyers.

Appropriating Technology Ron Eglash,2004 From the vernacular engineering of Latino car design to environmental analysis among rural women to the production of indigenous herbal cures-groups outside the centers of scientific power persistently defy the notion that they are merely

passive recipients of technological products and scientific knowledge. This is the first study of how such outsiders reinvent consumer products-often in ways that embody critique, resistance, or outright revolt. Contributors: Richard M. Handbook on the Economics of Conflict Derek L. Braddon, Keith Hartley, 2011-01-01 The Handbook on the Economics of Conflict conveys how economics can contribute to the understanding of conflict in its various dimensions embracing world wars, regional conflicts, terrorism and the role of peacekeeping in conflict prevention. The economics of conflict is a relatively new branch of the discipline of economics. Conflict provides opportunities for applying game theory involving strategic behaviour, interactions and interdependence between adversaries. The Handbook demonstrates that conflict and its prevention is costly; it considers new dimensions such as ethnic cleansing, destructive power, terrorism, corruption, the impact of new technology, peacekeeping, the role of economists in defence ministries and the use of private contractors in conflict.

Can't Stop Won't Stop (Young Adult Edition) Jeff Chang, Dave 'Davey D' Cook, 2021-03-16 The American Book Award winner, now completely adapted for a young adult audience! From award-

winning author Jeff Chang, *Can't Stop Won't Stop* is the story of hip-hop, a generation-defining movement and the music that transformed American politics and culture forever. Hip hop is one of the most dominant and influential cultures in America, giving new voice to the younger generation. It defines a generation's worldview. Exploring hip hop's beginnings up to the present day, Jeff Chang and Dave Davey D Cook provide a provocative look into the new world that the hip hop generation has created. Based on original interviews with DJs, b-boys, rappers, activists, and gang members, with unforgettable portraits of many of hip hop's forebears, founders, mavericks, and present day icons, this book chronicles the epic events, ideas and the music that marked the hip hop generation's rise.

**The World of Protracted Conflicts** Michael Brecher, 2016-05-26 *The World of Protracted Conflicts* analyzes interstate protracted conflict, a widespread phenomenon in the global system and regional subsystems during the past century. It describes the content of a protracted conflict, explains the cause-effect linkages in this multi-dimensional phenomenon, and explores models to forecast protracted conflict.
