The Politics of Football in Yugoslavia Richard Mills, 2018-03-30 Winner of the Lord Aberdare Literary Prize for 2018 Even before Tito's Communist Party established control over the war-ravaged territories which became socialist Yugoslavia, his partisan forces were using football as a revolutionary tool. In 1944 a team representing the incipient state was dispatched to play matches around the liberated Mediterranean. This consummated a deep relationship between football and communism that endured until this complex multi-ethnic polity tore itself apart in the 1990s. Starting with an exploration of the game in the short-lived interwar Kingdom, this book traces that liaison for the first time. Based on extensive archival research and interviews, it ventures across the former Yugoslavia to illustrate the myriad ways football was harnessed by an array of political forces. Communists purposefully re-engineered Yugoslavia's most popular sport in the tumult of the 1940s, using it to integrate diverse territories and populations. Subsequently, the game advanced Tito's distinct brand of communism, with its Cold War-era policy of non-alignment and experimentation with self-management. Yet, even under tight control, football was racked by corruption, match-fixing and violence. Alternative political and national visions were expressed in the stadiums of both Yugoslavias, and clubs, players and supporters ultimately became perpetrators and victims in the countries' violent demise. In Richard Mills' hands, the former Yugoslavia's stadiums become vehicles to explore the relationship between sport and the state, society, nationalism, state-building, inter-ethnic tensions and war. The book is the first in-depth study of the Yugoslav game and offers a revealing new way to approach the complex history of Yugoslavia.

Safeguarding, Child Protection and Abuse in Sport Melanie Lang, Mike Hartill, 2014-07-11 The safeguarding of children and young people participating in sport has become an increasingly prominent concern in policy-making and research communities around the world. Major organisations such as the IOC and UNICEF now officially recognize that children in sport can be at risk of exploitation and abuse, and this concern has led to the emergence of new initiatives and policies aimed at protecting vulnerable young people and athletes. This book is the first to comprehensively review contemporary developments in child protection and safeguarding in sport on a global level. The book is divided into two parts. Part One critically analyses current child protection and safeguarding policy and practice in sport across a range of countries, including the US, Canada, the UK, Australia, China and Germany, providing a global context for current policy and practice. This represents the most comprehensive review to date of the landscape of child protection and safeguarding in sport and provides a starting point for critical international comparisons. Part Two explores a range of issues related to child protection and safeguarding in sport, including many not covered in previous books, such as emotional abuse, injury and over-training. While in many instances the impetus for policy in this area has arisen from concerns about sexual abuse, the second part of this book therefore opens up a broader, more holistic approach to child and athlete welfare. By bringing together many of the leading researchers working in child and athlete protection in sport from around the world, this book is important reading for all advanced students, researchers, policy-makers or practitioners working in youth sport, physical education, sports coaching, coach education or child protection.

Impacts and Implications for the Sports Industry in the Post-COVID-19 Era Faganel, Armand, Rižnar, Igor, Baruca, Arne, 2021-06-25 The sports industry had impressive global growth over the years, with factors from the introduction of e-sports and new streaming and viewing methods to sponsorships and digital media contributing to its rise. However, the COVID-19 pandemic brought upon a rapid change in this sector. Sports' seasons ended abruptly, people's escape from reality suddenly vanished, their spending attitudes changed, live games and commercial flights were suspended, hotels were impossible to book, and consumers practically turned into prisoners within their own homes. No live sports matches were to follow on any media either, so specialized sports channels were forced to play old recordings rather than broadcasting new events. Even athletes

themselves struggle to stay relevant and thus, try to utilize creative methods to enhance their brand value in these difficult times. With most of the sports leagues shut down during the pandemic, with a few exceptions which performed in empty venues, the restrictions diminished the sports experience compared to the pre-COVID-19 era and the impacts were widespread. Impacts and Implications for the Sports Industry in the Post-COVID-19 Era explores the changes that have been and will continue to be created by the unexpected disruptions that occurred as a result of the pandemic within the sports industry, fans consumption, and recreational habits. The chapters explore the status of sports after the pandemic, paths to recovery, and the future of sports, along with the many impacts and issues that have arisen due to changes in the industry necessitated by COVID-19. Covering important topics such as mental health, impacts on athletes and coaches, the market value for professional sports, consumer behavior during COVID-19, and the changes in marketing, tourism, and business, this book is ideally intended for sports managers, marketers, broadcasting agencies, media specialists, brand managers, fitness professionals, practitioners, stakeholders, researchers, academicians, and students interested in the impacts on the sports industry and the outlook for sports in the post-COVID-19 era.

Adapted Physical Activity Kyonosuke Yabe, Katsuhiko Kusano, Hideo Nakata, 2012-12-06 Studies on physical education and sports for persons with disabilities are an interdisciplinary domain in which theory and practice are closely intertwined. In fact, one of the primary objectives of professionals in this field is to eliminate the existing separation between the theoretical and practical aspects of their work. This volume, consisting of selected papers presented at the Ninth International Symposium on Adapted Physical Activity, was published with the aim of providing researchers and practitioners with insights into each other's work. The 39 contributions in this book deal with a wide range of themes including the health and fitness of people with disabilities, innovative sports teaching methods, biofeedback training and motor control, the medical aspects of rehabilitation, and physical activity programs for the elderly.

Physical Culture and Sport in Soviet Society Susan Grant, 2013 From its very inception the Soviet state valued the merits and benefits of physical culture, which included not only sport but also health, hygiene, education, labour and defence. Physical culture propaganda was directed at the Soviet population, and even more particularly at young people, women and peasants, with the aim of transforming them into ideal citizens. By using physical culture and sport to assess social, cultural and political developments within the Soviet Union, this book provides a new addition to the historiography of the 1920s and 1930s as well as to general sports history studies.

Geoffrey Swain Terry Cox, 2018-12-07 Acclaimed historian, and retired Alec Nove Chair in Russian and East European History at the University of Glasgow, Geoffrey Swain, has written extensively on the history of Russia and Eastern Europe during the twentieth century, in particular on Russia during the Civil War, Latvia during the first years of Soviet rule, and the career of Josip Broz Tito. Esteemed for his pursuit of historical enquiry which went against the grain of commonly accepted views of communism in power, significantly, Swain also explored the strength or coherence of some of the alternatives that emerged to the paths actually taken, themes which, in their own way, run through this collection of essays, featuring contributions predominantly from papers delivered at the 7th CRCEES Research Forum in July 2015. Honoring the critical tradition and at times contentious work of Geoffrey Swain, this volume comprises seven original articles offering alternative insights into the complexities of Russian, Yugoslav and Latvian history, which are complemented by three essays reviewing his work, its context and implications. This book was originally published as a special issue of Europe-Asia Studies.

Into Russian Nature Alan D. Roe, 2020-03-02 Since the early twentieth century, nations around the world have set aside protected areas for tourism, recreation, scenery, wildlife, and habitat conservation. In Russia, biologists and geographers had been intrigued with the idea of establishing national parks before the Revolution, but instead persuaded the government successfully to establish nature reserves (zapovedniki) for

scientific research during the USSR's first decades. However, as the state pushed scientists to make zapovedniki more useful during the 1930s, some of the system's staunchest defenders started supporting tourism in them. In *Into Russian Nature*, Alan D. Roe offers the first history of the Russian national park movement. In the decades after World War II, the USSR experienced a tourism boom and faced a chronic shortage of tourism facilities. During these years, Soviet scientists took active part in Western-dominated international environmental protection organizations and enthusiastically promoted parks for the USSR as a means to expand recreational opportunities and reconcile environmental protection and economic development goals. In turn, they hoped they would bring international respect to Soviet nature protection efforts and help instill in Russian/Soviet citizens a love for the country's nature and a desire to protect it. By the end of the millennium, Russia had established thirty-five parks to protect iconic landscapes in places such as Lake Baikal. Meanwhile, national park opponents presented them as an unaffordable luxury during a time of economic struggle, especially after the USSR's collapse. Despite unprecedented collaboration with international organizations, Russian national parks received little governmental support as they became mired in land-use conflicts with local populations. Exploring parks from European Russia to Siberia and the Far East, *Into Russian Nature* narrates efforts, often frustrated by the state, to protect Russia's vast and unique physical landscape.

Blueprints for No-man's Land Janet Stewart, Simon Ward, 2005 This volume brings together a collection of essays focusing on selected aspects of inter- and multidisciplinary in contemporary Austrian culture. These include the connections between literature and the media, literature and the visual arts, literature and travel, and the visual arts and public space. The individual contributions deal with central figures in the Austrian arts, including Thomas Bernhard, Franzobel, Elfriede Jelinek, Peter Handke, Peter Turrini and Doron Rabinovici, as well as collective ventures such as Walter Grond's *Odysseus* project and the museum in progress. They analyse the impact of connections between disciplines on the cultural landscape in contemporary Austria, as well as examining the limits of such interaction between disciplines.

Everyone to Skis! William D. Frank, 2013-10-31 Nowhere in the world was the sport of biathlon, a combination of cross-country skiing and rifle marksmanship, taken more seriously than in the Soviet Union, and no other nation garnered greater success at international venues. From the introduction of modern biathlon in 1958 to the USSR's demise in 1991, athletes representing the Soviet Union won almost half of all possible medals awarded in world championship and Olympic competition. Yet more than sheer technical skill created Soviet superiority in biathlon. The sport embodied the Soviet Union's culture, educational system and historical experience and provided the perfect ideological platform to promote the state's socialist viewpoint and military might, imbuing the sport with a Cold War sensibility that transcended the government's primary quest for post-war success at the Olympics. William D. Frank's book is the first comprehensive analysis of how the Soviet government interpreted the sport of skiing as a cultural, ideological, political and social tool throughout the course of seven decades. In the beginning, the Soviet Union owned biathlon, and so the stories of both the state and the event are inseparable. Through the author's unique perspective on biathlon as a former nationally-ranked competitor and current professor of Soviet history, *Everyone to Skis!* will appeal to students and scholars of Russian and Soviet history as well as to general readers with an interest in skiing and the development of twentieth-century sport.

A Community at the Heart of Europe Zaira Vidau, 2020-03-26 Nestled in the heart of the "Old Continent", along the border between Slovenia and the Italian region of Friuli Venezia Giulia, Slovenes in Italy form one of Europe's national minorities. This volume presents an up-to-date overview of their efforts to preserve their cultural and linguistic heritage and distinctiveness. The Slovene national community in Italy has been affected by profound and at times devastating events, including both World Wars, the fascist period and the lengthy process of defining the border between Italy and Yugoslavia. The collapse of the Berlin Wall, Slovenia's declaration of independence and the process of globalisation have provided the community

with new forms of protection, but also presented it with further challenges associated with adopting its development guidelines. This book is dedicated to researchers on ethnic studies, civil rights activists and politicians dealing with minority and human rights and diversity management, as well as tourists, teachers and students.
