Jordan Raynor

The Do'Zen Master Clive Alando Taylor,2016-05-04 The Dozen Master is about a Zen Buddhist set upon a journey and enduring task of enlightenment, whilst travelling upon a proverbial path of fulfillment and encounters, in both solving and realizing through his awakenings, that have been influenced by his teachers, and presented to him through the aspects and the embodiments of the precious stones of heaven, as the whole point of the story is to serve as a metaphor, which was always to save the people from the world, and more importantly, the world from the people.

Master of One Jordan Raynor,2020-01-21 What is your one thing? The entrepreneur, thought leader, and best-selling author of Called to Create offers a refreshing invitation: stop trying to do it all so you can thrive in your unique, God-given work. "A compelling case for embracing our vocational limits and choosing to do our one thing well."—Emily P. Freeman, Wall Street Journal best-selling author of The Next Right Thing Imagine how different your life would be if you spent your time doing the very thing that brings you the greatest joy. It's possible, but most people spend their days making incremental advances on numerous tasks, competent at many things but exceptional at none. That's because for too long we've believed the lie that more activity, more jobs, and more responsibility equals greater effectiveness. In short, we are becoming a society of "jacks-and-jills-of-all-trades and masters of none." But what if you could shift your focus from too many things to one? In this thought-provoking book, you'll discover the exponential power of pursuing a singular craft. Through practical principles, Jordan Raynor provides straightforward steps for finding and thriving in your calling. He also highlights more than a dozen real-life examples of high-impact individuals who have chosen to focus on and excel in their unique gifting, including: • Chronicles of Narnia author C. S. Lewis • Enron whistle-blower Sherron Watkins • TV legend Mister Rogers • Dallas Mavericks CEO Cynthia Marshall • Reality TV star Chip Gaines • NFL Hall of Fame coach Tony Dungy • Biblical figures, a teacher, a pilot, a banker, and world-class entrepreneurs Too many of us are overwhelmed, overcommitted, and overstressed. This book offers a better way—the path to becoming a master of one!

The First 20 Hours Josh Kaufman,2013-06-13 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In The First 20 Hours, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to

deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, The First 20 Hours will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Called to Create Jordan Raynor, 2017-11-07 We were created by an infinitely creative God to reflect his love and character to the world. One way we do that is by continuing his creative work. In this energizing book, serial entrepreneur and bestselling author Jordan Raynor helps artists, entrepreneurs, writers, and other creatives reimagine our work as service to God and others, addressing such penetrating questions as - Is my work as a creative really as God-honoring as that of a pastor or missionary? - What does it look like to create not to make a name for myself but to glorify God and serve others? - How can I use my work to fulfill Jesus's command to create disciples? - Will what I make today matter in eternity? To answer these questions, Raynor shares compelling stories from an eclectic group of 40+ Christian entrepreneurs, including the founders of TOMS Shoes, Charity: Water, Chick-fil-A, In-N-Out Burger, Guinness, HTC, and Sevenly, as well as nontraditional entrepreneurs such as C. S. Lewis, Johann Sebastian Bach, and J. R. R. Tolkien. Raynor's show rather than tell, story-driven style makes you feel as if you are sitting at the feet of some of the godliest and most successful entrepreneurs of all time. Perfectly poised to reach today's growing creative class, this unique work restores God's position as the first entrepreneur, helping readers see the eternal value in the work they do today.

Micromastery Robert Twigger, 2018-03-06 Want to be a lifelong learner? Think small. Forget spending 10,000 hours in the pursuit of perfecting just one thing. The true path to success and achievement lies in the pursuit of perfecting lots and lots of small things--for a big payoff. Combining positive psychology, neuroscience, self-help and more, this delightfully illuminating book encourages us to circumvent all the reasons we can't learn and grow (we're too busy, it's too complicated, we're not experts, we didn't start when we were young) -- by tackling small, satisfying skills. Wish you were a seasoned chef? Learn to make a perfect omelette. Dream of being a racecar driver? Perfect a handbrake turn. Wish you could draw? Make Zen circles your first challenge. These small, doable tasks offer a big payoff -- and motivate us to keep learning and growing, with payoffs that include a boost in optimism, confidence, memory, cognitive skills, and more. Filled with surprising insights and even a compendium of micromastery skills to try yourself, this engaging and inspiring guide reminds us of the simple joy of learning -- and opens the door to limitless, lifelong achievement, one small step at a time. Micromasteries presented in the book (with illustrations) include: Learn How to Climb a Rope, Surf Standing Up, Talk for Fifteen Minutes about Any Subject, Bake Artisan Bread, Juggle Four Balls, Learn to Read Japanese in Three Hours, and more.

(Re)Defining the Goal Kevin J. Fleming, Ph.D., Ph D Kevin J Fleming, 2016-07-02 How is it possible that both university graduates and unfilled job openings are both at record-breaking highs? Our world has changed. New and emerging occupations in every industry now require a combination of academic knowledge and technical ability. With rising education costs, mounting student debt, fierce competition for jobs, and the oversaturation of some academic majors in the workforce, we need to once again guide students towards personality-aligned careers and not just into college. Extensively researched, (Re)Defining the Goal deconstructs the prevalent one-size-fits-all education agenda. The author provides a fresh perspective, replicable strategies, and outlines six proven steps to

help students secure a competitive advantage in the new economy. Gain a new paradigm and the right resources to help students avoid the pitfalls of unemployment, or underemployment, after graduation.

Other Ways to Win Kenneth C. Gray, Edwin L. Herr, 2006-02-16 Now in its third edition, this bestseller offers new data, recommendations, and observations that explore the choices for success available to students in the academic middle.
