<u>Prague in Black</u> Chad Bryant,2009-09-30 In September 1938, the Munich Agreement delivered the Sudetenland to Germany. Six months later, HitlerÕs troops marched unopposed into Prague and established the Protectorate of Bohemia and MoraviaÑthe first non-German territory to be occupied by Nazi Germany. Although Czechs outnumbered Germans thirty to one, Nazi leaders were determined to make the region entirely German. Chad Bryant explores the origins and implementation of these plans as part of a wider history of Nazi rule and its consequences for the region. To make the Protectorate German, half the Czech population (and all Jews) would be expelled or killed, with the other half assimilated into a German national community with the correct racial and cultural composition. With the arrival of Reinhard Heydrich, Germanization measures accelerated. People faced mounting pressure from all sides. The Nazis required their subjects to act (and speak) German, while Czech patriots, and exiled leaders, pressed their countrymen to act as Ògood Czechs.Ó By destroying democratic institutions, harnessing the economy, redefining citizenship, murdering the Jews, and creating a climate of terror, the Nazi occupation set the stage for the postwar expulsion of CzechoslovakiaÕs three million Germans and for the CommunistsÕ rise to power in 1948. The region, Bryant shows, became entirely Czech, but not before Nazi rulers and their postwar successors had changed forever what it meant to be Czech, or German.

Google Docs for Seniors Scott La Counte,2019-08-29 Like hundreds of millions of people, you probably lived your whole life using one-word processing tool: Microsoft Word. It's great software! Powerful software! Resourceful software! And…expensive software! Google Docs is the Google equivalent of Microsoft Word, but it's free. Free as in ad-supported, right? One paragraph in and you have to watch a 30 second video of some emoji game you would

never play! Wrong! Free as in free. As in no ads. Nothing to pay later. Free! Who wouldn't want software like that? For the price of nothing you are getting something you used to pay for. And that nothing doesn't get you second-rate software that doesn't help you do the things you really want to do. It gets you cloud-based software that is on par with all the other word processing tools out there. In many ways, it's actually better than other tools. If you are interested in learning more about it, or you are ready to make the leap and become a free user, then this guide will show you the ropes and get you started as quick as possible. Let's get started! This book is not endorsed by Alphabet, Inc.

I-Docs Judith Aston,Sandra Gaudenzi,Mandy Rose,2017-02-28 The history of documentary has been one of adaptation and change, as docu-mentarists have harnessed the affordances of emerging technology. In the last decade interactive documentaries (i-docs) have become established as a new field of practice within non-fiction storytelling. Their various incarnations are now a focus at leading film festivals (IDFA DocLab, Tribeca Storyscapes, Sheffield DocFest), major international awards have been won, and they are increasingly the subject of academic study. This anthology looks at the creative practices, purposes and ethics that lie behind these emergent forms. Expert contributions, case studies and interviews with major figures in the field address the production processes that lie behind interactive documentary, as well as the political, cultural and geographic contexts in which they are emerging and the media ecology that supports them. Taking a broad view of interactive documentary as any work which engages with 'the real' by employing digital interactive technology, this volume addresses a range of platforms and environments, from web-docs and virtual reality to mobile media and live performance. It thus explores the challenges that face interactive documentary practitioners and scholars, and proposes new ways of producing and engaging with interactive factual content.
