Maneuver and Dock Your Sailboat Under Power Grant Headifen,2016-11-01 Let the experts at NauticEd teach you the smart way to handle your sailboat! If you skipper a sailboat, you know the inherent dangers of docking and maneuvering in a tight marina with high winds and current. Just one ding can cost hundreds of dollars and worse than that, major embarrassment. The experts at NauticEd offer a painless solution with this concise series of practice exercises using real maneuvering techniques—with clear explanations on how you can always be in full control of your boat in the marina. Once you master these exercises, you will confidently maneuver your sailboat in any marina in the world under whatever conditions are thrown at you. Grab this book, grab a friend, some (non-alcoholic) libations, and a sandwich and get out on the water for a fun enjoyable day of maneuvering practice. Here is what one of NauticEd's students had to say: "I've sailed for the last thirty-plus years and have a fifty-ton master's credential. I'm constantly learning something new or forgotten from NauticEd."

Boston Harbor Eric Wiberg,2020-03-25 Color photos of Boston Harbor, in Massachusetts, taken by a working captain on the water night and day. The book's strength is the immediacy and authenticity, as only seconds were permitted to capture passing vessels. Documents a working harbor and way of life that few know details. The author infuses captions with 30 years of maritime experience

26 North Latitude Karl Gloeckner,2019-06-14 Captain Kyle is a native Florida cracker with a natural talent for fishing. His high school job as a mate on a local charter drift fishing boat made him a familiar face on the docks. He gets his first shot at a captain's position on a sportfish boat through a friend's recommendation. Now he must prove his worth among the old salty captains and the crusty

old boat owner as they enter a billfish tournament in Bimini. Boating the first fish on the board has everyone wondering who the new kid on the block is. Just another day on the docks with colorful characters, line-dragging fishing adventures and dock smack talk.

Menus and Memoirs of a Yacht Chef Marianne J. Gardner, 2011 Thai prawn coconut soup served in a coconut shell, followed by steaming, aromatic osso buco on creamy potato celeriac and French beans almonidine, with Belgian flourless chocolate torte on cr me sabayon for dessert. This is just one of many menus I created for a yacht during my adventures at sea. Throughout my years working as a chef on private yachts, I have often been asked, What kinds of meals are served on these luxurious yachts? This cookbook answers that question, providing many of the recipes and menus that I have used on board yachts. Each of the ten chapters describes a yacht and its worldwide cruising destination-and the full-course menus and individual recipes that were created on the journey. The ingredients, dishes, and wines reflect the specialties that are enjoyed in each region of the world. Whether you prepare an entire meal or design your own menu using one of the many recipes in this book, you'll find the recipes clear and easy to follow. They are written in simple terms, using measurements, equipment, and ingredients that can be found in most kitchens. All of the courses have been wine-paired by a professional wine connoisseur from Total Wine and More . Suggestions for wine options cover a variety of price ranges, so you can have a great wine for a modest price or be decadent for a special meal. You don't have to leave your home to enjoy a travel-inspired gourmet meal. Cruise with me on the Mexican Sea of Cortez and enjoy grilled mahi mahi with cilantro and pumpkin seed pesto, experience green-lipped mussels in New Zealand's Bay of Islands, and savor the sweet tangy taste of an award-winning key lime pie in the Bahamas. Bon app tit! Experience the adventure of worldwide travel by creating delicious, gourmet meals in your own kitchen or galley.

Boat Docking Charles T. Low,1997 Docking and undocking a small craft in close quarters takes years of practice. There are a number of factors to consider when maneuvering a boat into a small docking area such as the effects of current, wind and propeller action. You may never reach boat docking and undocking perfection (very few do) but this book will steer you into the right direction. For example Chapter Two is about Docking Examples and in Chapter Six the author writes about the Human Factors and the part they play when boating. Boat Docking covers a number of situations boaters encounter when docking or undocking - and everyone can learn from this book.

The Mover John Gardner Wilder,2013-05-07 The Mover is fictional of history of Charles Wilkins, a young carpenter from the English Midlands, emigrating to the American Midwest in 1838. Securing passage on the merchant ship, Adam Fletcher, he is asked by the ships captain to take over the medical duties of the injured ship carpenter. Setting a broken leg of an injured sailor, Charles impresses fellow traveler Kate Hale, the captains niece, who is returning from a year with cousins were she has learned the etiquette and habits of an English lady. Their friendship becomes a voyage-long love affair. Fellow traveler, reverend Fishbourne, explores with Charles troubles facing lower English classes, especially alcoholism, while observing Fishbourne has a drinking a problem. The last of four passengers, Blanchard, a Wedgwood pottery salesman turns out to be someone other than what he represents, and a key figure in a crime affecting Kate, Charles and the ships captain. Atlantic winter storms, a knock down blow, dangerous ice, superstitious sailors, cold food and seasickness were encountered on the days at sea. Friendship of the first mate, Corey Bigelow allows Charles time at the helm. High above the deck in the crows nest, he learns ocean travel through the eyes of a

sailor, not just a paying passenger. Crossing the Allegheny Mountains in late winter, highway robbers, a wrecked stage, a frightening river crossing, and the voluptuous daughter of a U. S. senator were part of his travels to the American interior. The vision of this novel came from an 1831 family diary. My interest in history developed early, before I received a B.A. in history at the University of Virginia. As a youth, cash earned from a paper route, funded the purchase of my first sail boat at age 15. In my summer college years, I was dock and harbor master, and sailing instructor at a Long Island yacht club near New London, Connecticut. Later I owned a 32 sail boat, enjoying sailing beyond the sight of land. Recent trips to the English Cotswolds, Midlands and the coast of Ireland took me to areas covered in this book. I have traveled over the routes and visited the communities Charles saw in his travels from New York to the Midwest.

Graving Dock John Van Horn, 2018-05-19 I have for some time wanted to photograph a graving dock--or dry dock--up close and in operation. I want to thank the Savannah Yacht Center for allowing me to visit and photograph their facility. But what exactly is it that I photographed? Before my first visit, I spoke to an old boating friend to say I was photographing the graving dock at the Yacht Center, and he corrected me saying I was photographing a dry dock. When I arrived, I explained to one of the Yacht Center's supervisors that I was photographing their dry dock, and the reply was, Oh, you mean our graving dock. So a title for this series of photos was born!

How Not to Build a Boat Jill Dickin Schinas, 2013-03-01 When their old GRP yacht was devastated by a Southern Ocean storm, Jill Schinas and her husband, Nick, resolved to build something stronger. Gaily, - and without having researched the matter to the least degree -they threw themselves into the

work of designing and constructing the ultimate, ocean-proof, eco-friendly, dream cruising yacht. On their side they had a wealth of sailing experience, which provided a perfect knowledge of what was required, but their only other weapons were irrepressible enthusiasm and the mindset which enables a man to build a radio from a potato or a mast from a lamppost. Had this been a business enterprise no bank would ever have lent the capital, for ranged against the dreamers was a whole battery of forces any one of which would have deterred more realistic people. For a start, neither Jill or Nick had any experience with a welder - and yet they were proposing to build a steel boat. Secondly, they seemed only to have enough money to buy a couple of masts and the sails. Worst of all, they had two kids and a new baby in tow - and no one with a young family ought to attempt anything more ambitious than the washing up. Regardless of these drawbacks, Nick and Jill went ahead. It'll only take a year and a half, said he, confidently. Fifteen years down the line, Mollymawk is afloat and the family have cruised all over the Atlantic; but the boat is still not finished. This is the tale of what went wrong and what went right. Packed full of advice about such things as ocean-worthy design and sail plans, it will also tell you how to operate a cutting torch, how to avoid a leaky stern-gland, how to pour your own rigging sockets, how to handle a ferocious gander, how to sandblast, how to weld in mid-Atlantic, how to amuse three young children in a cabin space the size of a phone booth... and much, much more besides.
