Du document à l'utilisateur/from Document to User Mathias Auclair, Nicole Leclercq, Kristy Davis, Jan Van Goethem, Sylvie François, 2008 C'est un défi de taille, pour les archivistes, les bibliothécaires, les muséologues ou les documentalistes spécialisés, de conserver la mémoire et la trace du spectacle vivant, dans une société où les techniques évoluent sans cesse. Les techniques d'enregistrement audiovisuel et les supports pour conserver les images se sont modifiés. La mise en valeur de nouveaux médias est une gageure dans la conception des expositions. Enfin, les pratiques de recherche et l'essor conjoint des bases de données ont modifié la donne. Tels sont les nombreux sujets de réflexion qui se sont offerts aux membres de la SIBMAS (Société internationale des bibliothèques et musées des arts du spectacle) lors de son 25e Congrès, qui s'est tenu à Barcelone en 2004. En voici les Actes qui, par des approches diverses, tenteront d'éclairer ces interrogations. In a world where technologies are constantly evolving, it is a real challenge for archivists, librarians, museum curators and information professionals to keep track of and record living theatre. Audiovisual recording techniques are now cheap and accessible to many; electronic storage and dissemination of information and images has radically altered the relationship between the managers of collections and their potential users; new techniques have introduced new possibilities for interactivity in exhibitions and displays. These are just some of the issues addressed by the SIBMAS (International Association of Libraries and Museum of the Performing Arts) during its 25th Annual Conference, held in Barcelona in 2004.

A Guide to the Electronic Document Body of Knowledge Pat McGrew, Xplor International, 2014-09 The EDBOK explains industry processes and technologies using a standard vocabulary. How to Establish a Document Control System for Compliance with ISO 9001:2015, ISO 13485:2016, and FDA Requirements Stephanie L. Skipper, 2015-10-12 This book explains the requirements for compliance with FDA regulations and ISO standards (9001/13485) for documented information controls, and presents a methodology for compliance. The document control system (DCS), or documented information control system (DICS), is the foundation of a quality management system. It is the first quality system element that must be implemented because the establishment and control of documented processes and information in a quality-controlled environment is dependent on the ability to proactively manage access to documents and the movement of documents through the document life cycle. A well-developed document control system benefits business by: Improving knowledge retention and knowledge transfer within and across business units Improving access to knowledge-based information Improving employee performance by providing standardized processes and communicating clear expectations Improving customer communication and satisfaction by providing documented information from which common understanding can be achieved Providing traceability of activities and documentation throughout the organization Improving organization of and access to documents and data Sample documents are included in the appendixes of this book to help clarify explanations. This book provides a process-based approach that can be used for controlling all forms of documented information that are required to be managed under the quality management system.
