Dogfight Michael Knight, 2007 Ten stories cut like gems from American family life . . . [with] a gracious patina and a drawl of violence. --Los Angeles Times A writer of the first rank. . . . [Knight] writes gently and with great gobs of empathy.--Esquire Wonderfully humane. --Playboy A Los Angeles Times Notable Book, Michael Knight's stunning debut delivers ten tales of ordinary people seized by extraordinary circumstances as their attempts at human connection result in frustrating false starts and ruinous misunderstandings. Knight expertly unveils fragile family ties, secret compulsions, and the nagging doggedness of love as he taps into our collective human experience to remind us, with unerring, piercing insight, of what it means to be alive. By turns unpredictable and wise, sorrowful and triumphant, *Dogfight and Other Stories* reveals the transformative power of life's small struggles.

Dogfight Alfred Price, 2016-09-14 *Dogfight* tells the story of some of the most incredible air battles of modern warfare. Alfred Price's action-packed accounts place you in the cockpit, offering a rare insight into what it was like to face the enemy thousands of feet above the frontline. From operations over the fields of France during the First World War, through to accounts of the indomitable spirit of the RAF during the Battle of Britain, to the horrifying loss of life inflicted by Hitler's Blitzkrieg offensive, when more than 300 aircraft fell in air-to air combat during a single day of fighting; this book details the battles and the men who fought in them. The jet age is

also heralded in by accounts of the air force's role in the Vietnam War and the Falkland. The role of reconnaissance aircraft in modern warfare is described alongside the precision of attacking pin-point targets during the Gulf War in Iraq. This book not only uncovers how the tactics of aerial warfare have changed through each major conflict of modern times, but also the dramatic narrative allows the reader to feel like they were there in the skies, flying alongside these incredible pilots.

Dog Fight Norman Franks, 2003-01-07 The history of WWI aviation is a rich and varied story marked by the evolution of aircraft from slow moving, fragile, and unreliable powered kites, into quick, agile, sturdy fighter craft. At the same time there emerged a new kind of 'soldier', the fighter pilots whose individual cunning and bravery became crucial in the fight for control of the air. Dog-fight traces this rapid technological development alongside the strategy and planning of commanders and front-line airmen as they adapted to the rapidly changing events around them and learned to get the best from their machines. Often, this involved discovering and employing tactics instinctively to stay alive. Based on the author's personal correspondence with a number of WWI fighter pilots and aces, and drawing on published contemporary memoirs, this is an authoritative and lively history that serves as a captivating tribute to the brave pilots of both sides.

Dogfight Tony Holmes, 2013-04-15 Written by Tony Holmes, an aerospace editor and leading expert on aviation history, Dogfight covers four air forces,

three theaters, and ten iconic fighters. This book is the complete story of head to head aerial combat in World War II. In the skies above a world at war, individual skill, technical edge, and superior tactics all determined which pilot would emerge victorious from an aerial duel. Matching up ten aerial rivals - including Spitfires, Messerschmitts, Mustangs and Zeros - with their greatest foes, this book analyzes the histories of the machines, their pilots and tactics, with thrilling accounts of true combat. Meticulously researched digital artwork recreates the cockpits, armament, and battles of each combatant.

Dogfight Adam Claasen, 2012-11-01 This book tells the story of Australians and New Zealanders in one of the Second World War's defining and most memorable campaigns. From July until October 1940, the German air force (the Luftwaffe) sought aerial supremacy in skies over England as a prerequisite for an invasion of Britain (Operation Sealion). The ensuing conflict of Luftwaffe and RAF aircraft in the long summer of 1940 became forever known as the Battle of Britain. Of the 574 overseas pilots in the campaign, the New Zealand contingent of 134 airmen was second in size only to the Polish contribution. The Australian involvement, though smaller, was a healthy 37. Thus a fifth of overseas pilots were Anzacs. Among these colonials were some of the Battle of Britain's widely admired aces. Of the top ten pilots with the greatest number of victories two were New Zealanders (C. F. Gray and B. Carbury) and one an Australian (P. Hughes). Australian and New Zealand

aircrew were also employed in attacking enemy Channel ports and airfields as part of Bomber and Coastal Command's attempts to thwart invasion preparations and blunt the Luftwaffe aerial onslaught. The Anzacs also had a fellow compatriot at the highest level in the Fighter Command system: the highly regarded New Zealander Air Vice-Marshal Sir Keith Park, who was instrumental in devising and implementing the integrated air defence of Britain around Spitfire and Hurricane aircraft, radio control and radar. In the spring of 1940, he was given the command of Group 11, which would face the brunt of the German aggression in south-east England. The success of Park's plans and operational initiatives, and the role played by Anzac pilots and aircrew, would all contribute to the conflict's eventual successful outcome.

Dogfight over Tokyo John Wukovits, 2019-08-27 From an expert in the Pacific theater of World War II comes the tragic story of the pilots who fought the last fight of the war during the first hour of peace When Billy Hobbs and his fellow Hellcat aviators from Air Group 88 lifted off from the venerable Navy carrier USS Yorktown early on the morning of August 15, 1945, they had no idea they were about to carry out the final air mission of World War II. Two hours later, Yorktown received word from Admiral Nimitz that the war had ended and that all offensive operations should cease. As they were turning back, twenty Japanese planes suddenly dove from the sky above them and began a ferocious attack. Four American pilots never returned—men who had lifted off from the carrier in wartime but were shot down during peacetime. Drawing

on participant letters, diaries, and interviews, newspaper and radio accounts, and previously untapped archival records, historian and prolific author of acclaimed Pacific theater books, including *Tin Can Titans* and *Hell from the Heavens*, John Wukovits tells the story of Air Group 88's pilots and crew through their eyes. *Dogfight over Tokyo* is written in the same riveting, edge-of-your-seat style that has made Wukovits's previous books so successful. This is a stirring, one-of-a-kind tale of naval encounters and the last dogfight of the war—a story that is both inspirational and tragic.

Dogfight Tony Holmes, 2012-05-14 Covering four air forces, three theaters, and ten iconic fighters, this book is the complete story of head to head aerial combat in World War II. Matching up ten aerial rivals - including Spitfires, Messerschmitts, Mustangs and Zeros - with their greatest foes, this book analyzes the histories of the machines, their pilots and tactics, with thrilling accounts of true combat. Air Combat Dmitriy Khazanov, Aleksander Medved, Edward M. Young, Tony Holmes, 2019-01-24 The battle for the skies in World War II fuelled a race between rival air forces to develop ever faster and more capable fighter aircraft – and the struggle for air superiority was never over until the war itself ended. This volume explores four clashes of some of the finest planes and pilots, in key theatres of the war: Spitfires duelling the formidable Bf

109 over the Channel, the Fw 190 battling the Soviet La 5 and 7 on the Eastern Front, the F4F Wildcat in a desperate clash with the legendary A6M Zero-sen, and the F4U Corsair in combat with the second-generation Japanese Ki-84 in the closing days of the war. Fully illustrated with contemporary photographs, maps and colour artwork, Air Combat conveys the full story behind these dramatic aviation duels.

Special Operations: Dogfight Craig Simpson, 2008-11-21 NORWAY, OCTOBER 1940 Norway, a country invaded by the Nazis. Finn Gunnersen and best friend, Loki Larson, are determined to fight back. Joining the Resistance, they risk arrest, torture and execution. They also don't know who to trust. When vital secrets fall into their hands and the enemy is in hot pursuit, they must escape. But to succeed they face their greatest deadly challenge - how to steal an enemy plane and fly it to freedom. Can two boys take on the might of the Nazi power?

Dogfight Robert Jackson, Jim Winchester, 2006 Coined in the pioneer years of military aviation during World War I, the term dogfight refers to an aerial battle between two opposing aircraft, with each pilot making the most of his machine's speed and agility to shoot down his opponent. A skilled pilot could exploit the particular merits of his aircraft to ensure victory over his enemy. Dogfight is a fascinating exploration of the world's finest military aircraft, compared and contrasted--from the German Fokker D.III of World War I, ranged against the Allied SPAD XIII, through famous World War II

adversaries such as the Hurricane and the Bf109, to modern aircraft which have met in combat such as the MiG-29 and the F-16. Aircraft that served in similar roles, such as the Lockheed Hudson and the Focke-Wulf Fw 200, are also compared, as are types such as trainers and transport aircraft which served on opposing sides. This book also evaluates rival aircraft which saw service on the same side, analyzing which fared best in combat against a common adversary. Each aircraft is illustrated with a spectacular three-quarter-view artwork, accompanied by detailed specifications and development history. The squadron history of the illustrated aircraft is also provided, while the main text features first-hand accounts of flying the aircraft -- and, where relevant, tales of actual air combat --- accompanied by color and black-and-white archive photography.

Dogfight, A Love Story Matt Burgess, 2011-09-06 What Jonathan Lethem did for Brooklyn, Matt Burgess does for Queens in this exuberant and brilliant debut novel about a young drug dealer having a very bad weekend. Alfredo Batista has some worries. Okay, a lot of worries. His older brother, Jose--sorry, Tariq--is returning from a stretch in prison after an unsuccessful robbery, a burglary that Alfredo was supposed to be part of. So now everyone thinks Alfredo snitched on his brother, which may have something to do with the fact that Alfredo is now dating Tariq's ex-girlfriend, Isabel, who is eight months pregnant. Tariq's violent streak is probably #1 worry on Alfredo's list. Also, he needs to steal a pit bull. For the homecoming dogfight. Burgess

brings to life the rich and vivid milieu of his hometown native Queens in all its glorious variety. Here is the real New York, a place where Pakistanis, Puerto Ricans, Haitians, Anglos, African Americans, and West Indians scrap and mingle and love. But the real star here is Burgess's incredible ear for language—the voices of his characters leap off the page in riotous, spot-on dialogue. The outer boroughs have their own language, where a polite greeting is fraught with menace, and an insult can be the expression of the most tender love. With a story as intricately plotted as a Shakespearean comedy—or revenge tragedy, for that matter—and an electrically colloquial prose style, *Dogfight*, a Love Story establishes Matt Burgess as an exuberant new voice in contemporary literature. The great Queens novel has arrived.

Dogfight Robert Jackson, Jim Winchester, 2019-03-07 An exploration of the world's finest combat aircraft, compared and contrasted with opposing types - from the German Fokker Triplane of World War I, ranged against the Allied SPAD XIII, through famous World War II adversaries such as the Hurricane and the Bf 109, to modern aircraft which have met in combat such as the MiG-29 and the F-16

Dogfight Chris Allan, 1989 Photographs show jet fighters engaged in training flights and are accompanied by brief discussions of combat tactics.

Dogfight David Owen, 2015-06-20 Innumerable books have been published on the two most famous fighter aircraft of all time, the Supermarine Spitfire and the Messerschmitt Bf109. But books setting out to tell the story of both aircraft are very much rarer - probably fewer than the fingers of one hand. Yet their joint story is one which bears retelling since both were essential to the air campaigns of World War Two. Incredibly, the men who designed them lacked any experience of designing a modern fighter. R J Mitchell had begun his career working on industrial steam locomotives, Willy Messerschmitt had cut his aeronautical teeth on light and fragile gliders and sporting planes. Yet both men not only managed to devise aircraft which could hold their own in a world where other designs went from state-of-the-art to obsolete in a staggeringly short time, but their fighters remained competitive over six years of front-line combat. Despite the different ways their creators approached their daunting tasks and the obstacles each faced in acceptance by the services for which they were designed, they proved to be so closely matched that neither side gained a decisive advantage in a titanic struggle. Had either of them not matched up to its opponent so well, then the air war would have been a one-sided catastrophe ending in a quick defeat for the Allies or the Axis powers, and the course of twentieth century history would have been changed beyond recognition.

From Dogfight to Diplomacy Donald MacDonell, 2006-03-19 MacDonell's service career began in the 1920s. Shortly before the war he became a Squadron Leader and worked at the Air Ministry during the Phoney War. When hostilities commenced he became CO of No 64 Squadron, carrying out convoy support operations and eventually fighting in the Battle of Britain. Awarded a DFC, he was given command of a squadron at Leconfield to train urgently required pilots. Eventually he was shot down over the English Channel and rescued by a U-boat, this resulted in a lengthy period as a PoW in camps throughout enemy occupied Europe and Germany. During this period he was involved with the famous 'Wooden Horse' escape and was eventually freed by advancing Russian troops. Upon his return to the UK he was promoted Wing Commander and worked on the Cabinet Office staff before moving to Headquarters Flying Training Command. He was then appointed Chief Flying Instructor at Cranwell before successfully applying for the post of British Air Attach in Moscow.
