James Floyd Kelly

Hash Postcard - Button Up Doh, 1998-05-01

Makeology Kylie Peppler, Erica Rosenfeld Halverson, Yasmin B.

Kafai, 2016-05-20 Makeology introduces the emerging landscape of the Maker Movement and its connection to interest-driven learning. While the movement is fueled in part by new tools, technologies, and online communities available to today's makers, its simultaneous emphasis on engaging the world through design and sharing with others harkens back to early educational predecessors including Froebel, Dewey, Montessori, and Papert. Makers as Learners (Volume 2) highlights leading researchers and practitioners as they discuss and share current perspectives on the Maker movement and research on educational outcomes in makerspaces. Each chapter closes with a set of practical takeaways for educators, researchers, and parents.

Legal Aspects of Occupational Therapy Bridgit C. Dimond, 2008-04-15 Since publication of the first edition in 1996, this book has established itself as an essential text for occupational therapists. It offers an understanding of the law relating to their practice, but is written to be accessible for those who have no prior legal knowledge. The text provides valuable information for occupational therapists employed in health and social services, as well as the law relevant to private practitioners. The book includes chapters on all the main client groups and presents the relevant specialist law. Students and teachers of occupational therapy will find the chapters on professional registration, education, training and research of particular interest. The second edition also provides an introduction to the complex organisational and legal developments which impact the work of the occupational therapist, including: the Human Rights Act; the Health and

Social Care (Community Health and Standards) Act 2003; the concept of clinical governance and the role of the new Health Professions Council. It is a generous resource for the occupational therapy student, practitioner and service manager.

Smart Transport Networks Thomas Vanoutrive,2013-01-01 This very interesting book with peer-reviewed chapters written by leading researchers in the field discusses recent research in the areas of market structure, sustainability and decision-making. It includes several contemporary topics, such as changes in port competition, adaptation of transport to climate change, changing market structures, the importance of changing consumers preferences, errors in forecasting, and trends in international goods transport. Bert van Wee, Delft University of Technology, The Netherlands Transport is debated by many, and liberalization processes, transport policy, transport and climate change and increased competition between transport modes are the subject of heated discussion. *Smart Transport Networks* illustrates that whether concerning road, water, rail or air, knowledge on the structure of transport markets is crucial in order to tackle transport issues. The book therefore explores key factors concerning the structure of transport markets, their environmental impact, and questions why decision makers often fail to tackle transport-related problems. Three of the key factors that underpin the relationship between transport and society are analysed in detail from a variety of perspectives, each with an empirical focus: market structure and the allocation mechanisms at work; sustainability, encompassing the characteristics of the physical environment, the availability of natural resources and the effects of transport activities; and decision making, detailing transport policy and attempts to change transport systems. Practical guidelines on how to effectively deal with complex transport issues

are also presented. This book will prove an important resource read for academics, researchers, and students with an interest in economics particularly transport and public sector economics, geography and regional and urban studies. Policy makers and planners in the fields of transport, environment and regional planning will also find this book to be an invaluable reference tool.

Learning Disabilities Bob Gates, Helen Atherton, 2007-01-01 This title is directed primarily towards health care professionals outside of the United States. It is the authoritative textbook for students of learning disabilities covering a wide variety of topics. It is relevant not only for nursing courses, but also for care workers, OTs, and other professional and non-professional carers. The new edition has been completely updated and includes the latest evidence for practice. There are new chapters which means the book provides comprehensive coverage of learning disabilities throughout a person's life. There are also new contributors, including people with learning disabilities. Each chapter is supported by information on further reading and other resources.

Paramedics: From Street To Emergency Department Case Book Fellows , Sarah, Fellows , Bob, 2012-03-01 This accessible book is designed to help both practising and student paramedics prepare to deal with 25 of the most commonly seen pre-hospital care scenarios, as well as to revise for practical exams.

A Dog Called Hope Jason Morgan, Damien Lewis, 2017-05-16 A decade ago, Special Forces warrior Jason Morgan parachuted into the Central American jungle on an anti-narcotics raid. Months later, he regained consciousness in a US military hospital, with no memory of how he'd gotten there-- and a prognosis that he would never walk again. After multiple surgeries and numerous setbacks, Morgan was a single father confined to a wheelchair and tortured by his pain. Light came in the form of Napal, the black Labrador who would change his life forever. This is the story of how one very special dog gave a man;s life true meaning.
