The second part deals with our society today, its perversions, and how they relate to our natural world. Both of these pieces were inspired by two different hikes to the top of two different mountains, which are described inside. The first was finding the lost teachings of Jesus - See Book Sample. Dolphin Communication and Cognition Denise L. Herzing,Christine M. Johnson,2023-10-31 Experts survey the latest research on dolphin communication and cognition, offering a comprehensive reference to findings in the laboratory and from the field. Dolphin researchers have collected an impressive amount of data over the last twenty years, thanks to advances in technology for monitoring, recording, and analyzing dolphin behavior as well as increasing interest in exploring and modeling dolphins' cognitive capacities. This volume offers a comprehensive reference to the latest research on dolphin communication and cognition, reporting on findings from both the laboratory and the field. The contributors review a wide range of topics, including vocalization, abstract reasoning abilities, imitation and learning, social cognition, echolocation, and ethical issues in working with cetaceans. The book begins by examining the dolphin brain and its evolution, the anatomy of its unique sound production and reception systems, and its sensory abilities. It next treats communication, reviewing the complexity of dolphins' vocalization, and then describes research on cognition, from both experimental and developmental perspectives. Finally, the book considers the future of dolphin research, including a series of provocative questions that remain unanswered, posed by the volume's expert contributors. Contributors Mats Amundin, Whitlow Au, Ted W. Cranford, Nicola Erdsack, John Ford, Wolf Hanke, Louis M. Herman, Denise L. Herzing, Christine M. The Dolphins of Pern Anne McCaffrey,2002-02-26 “[Anne] McCaffrey here adds yet another dimension to her colorful and vivid saga by focusing on the attractive dolphins and their highly believable society.”—Publishers Weekly When the first humans came to settle the planet Pern, they did not come alone: intelligence-enhanced dolphins also crossed the stars to colonize Pern’s oceans while their human partners settled the vast continents. But then disaster struck. The deadly silver spores called Thread fell like rain from the sky, and as the human colonists’ dreams of a new, idyllic life shattered into a desperate struggle for survival, the dolphins were forgotten. Now, centuries later, as the dragonriders of Pern prepare to complete the momentous task of ridding their world of Thread forever, T’lion, a young bronze rider, and his friend Readis, son of the Lord Holder of Paradise River Hold, make contact with the legendary “shipfish.” And as the dragonriders grapple with the end of an era, T’lion, Readis, and the dolphins face the start of a new one: reviving the bond between land- and ocean-dwellers—and resurrecting the dreams of the first colonists of Pern.

Green Dolphin Street Elizabeth Goudge,2022-05-03 When Marianne LePatourel meets William Ozanne in the 1830s on an island in the English Channel, she sets her heart on him. However, her sister Marguerite falls in love with him too. And so begins this sweeping novel that takes the characters on dramatic adventures from childhood through old age, on land and at sea, and from the Channel Islands to China to the New Zealand frontier. When William's naval career is cut short, he settles in New Zealand and writes to Mr. LePatourel to ask for Marguerite's hand in marriage—but in his nervousness he pens the wrong name. When Marianne arrives aboard the ship *The Green Dolphin*,

William makes the gallant decision not to reveal his mistake. His mistake sets in motion a marriage that is difficult, but teaches them both that steadfast love which is chosen is stronger than the passion of love at first sight.

Dolphin Confidential Maddalena Bearzi, 2012-03-05 A "compelling" up-close memoir of a career spent among marine mammals and a portrait of the daily lives of dolphins (Publishers Weekly). Working among charismatic and clever dolphins in the wild is a unique thrill—and this book invites us shore-bound dreamers to join Maddalena Bearzi as she travels alongside them. In a fascinating account, she takes us inside the world of a marine scientist and offers a firsthand understanding of marine mammal behavior, as well as the frustrations and delights that make up dolphin research. Bearzi recounts her experiences at sea, tracing her own evolution as a woman and a scientist from her earliest travails to her transformation into an advocate for conservation and dolphin protection. These compelling, in-depth descriptions of her fieldwork also present a captivating look into dolphin social behavior and intelligence. Drawing on her extensive experience with the metropolitan bottlenose dolphins of California in particular, she offers insights into the daily lives of these creatures—as well as the difficulties involved in collecting the data that transforms hunches into hypotheses and eventually scientific facts. The book closes by addressing the critical environmental and conservation problems facing these magnificent, socially complex, highly intelligent, and emotional beings. "Pairing vivid images of bottlenose dolphins swimming together and caring for one another with descriptions of the meticulous scientific work required to record their behavior, Maddalena Bearzi sheds light on the life of a field biologist...A beautifully written account."—Library Journal

Meeting Dolphins Kathleen Dudzinski, 2000 Who can resist dolphins? They're so smart, and they have that mysterious smile. But they're wild animals -- possibly friendly, potentially dangerous. And only a very few people get a chance to meet them in the wild. Kathleen Dudzinski is one of them. Dudzinski has studied dolphins all over the world. Everywhere she goes, she observes gestures, sounds, and behaviors to try to figure out how dolphins communicate. She has watched mother dolphins teach their babies how to hunt and swum with a pod of dolphins to figure out how they all know to turn at the same time. She's even built an underwater camera housing with microphones to record and study dolphin sounds in stereo. In *Meeting Dolphins*, Dr. Kathleen Dudzinski, marine biologist and subject of the large-format film *Dolphins*, tells her own story and the story of the dolphins she has come to know and love.

Dolphins Under My Bed Sandra Clayton, 2011-03-15 Proving that sailing is not just the husband's pursuit, this charming narrative of one couple's first long distance voyage is told from the wife's perspective. Writing in a lively, humorous way, Sandra Clayton gives an entertaining account of her and husband David's maiden cruise from the UK, down the Atlantic coast and into the warm waters of the Mediterranean. Conscious that old age or poor health could prevent them from sailing away for much longer, they left the world of work behind to chase their dream of adventure. Conditions are sometimes maddening, occasionally dangerous, but frequently magical. Marine creatures enchant their days while ships that pass in the night add a touch of romance. But the book is far more than just the story of the Claytons' 2000 mile trip. Somewhat unprepared for what faced them on the way, they had to learn from their own mistakes, finding themselves in places and situations where they never expected to be. The book has plenty to offer those who might consider embarking on a similar voyage of their own: learn how the Claytons did it, which route they took, the beautiful locations they visited, who they met along the way, and their good decisions as well as their bad. A great bunkside read, it may inspire others to make a similar break themselves.

Song of the Sound Adam Armstrong, 2002 For Libby, expert in whale and dolphin communication, the job in New Zealand seemed perfect. She could provide a settled home for her daughter Bree, while she studied the marine creatures she loved in one of the world's last unspoilt places. And when she met John-Cody Gibbs, who had an understanding of the wildlife of the place so profound that it was almost magical, it seemed as if she might at last have found the man she could share her life with. But John-Cody was still grieving the loss of Mahina, the woman he had loved for more than twenty years, and who had taught him all he knew. He had a dark secret in his past, and enemies who were more than ready to use it to destroy his earthly paradise. It took a dangerous voyage into the mountainous seas of the Southern Ocean and a mystical encounter with the whales to give him the freedom

Mahina had wanted for him. The story of new-found love in a setting of unforgettable majesty, and a visionary journey into the living heart of the natural world.
