Island of the Blue Dolphins Scott O'Dell,1960 Far off the coast of California looms a harsh rock known as the island of San Nicholas. Dolphins flash in the blue waters around it, sea otter play in the vast kep beds, and sea elephants loll on the stony beaches. Here, in the early 1800s, according to history, an Indian girl spent eighteen years alone, and this beautifully written novel is her story. It is a romantic adventure filled with drama and heartache, for not only was mere subsistence on so desolate a spot a near miracle, but Karana had to contend with the ferocious pack of wild dogs that had killed her younger brother, constantly guard against the Aleutian sea otter hunters, and maintain a precarious food supply. More than this, it is an adventure of the spirit that will haunt the reader long after the book has been put down. Karana's quiet courage, her Indian self-reliance and acceptance of fate, transform what to many would have been a devastating ordeal into an uplifting experience. From loneliness and terror come strength and serenity in this Newbery Medal-winning classic.

The Sonar of Dolphins Whitlow W.L. Au,2012-12-06 The extraordinary ability of dolphins to echolocate has fascinated scientists and the public since its discovery in the late 1950's. This is the first book to summarize modern research in this area, and presents a broad synthesis of this very interdisciplinary subject. The author is an internationally-recognized expert on dolphin sonar and is thus in a unique position to bring together research on the physiological, mathematical and engineering aspects of the subject. Of interest to auditory researchers, electrical engineers, acoustical physicists, and mammalian physiologists.

A History of Discoveries on Hearing Darlene R. Ketten,Allison B. Coffin,Richard R. Fay,Arthur N. Popper,2024-01-20 This volume focuses on the history of research on hearing from comparative approaches. Each chapters examines the most formative studies that led to current understanding of hearing across taxa and still influence hearing research in general. Much of the early work on hearing, which goes back to Aristotle, as well as the classic work of 16th to early 20th century scientists (e.g., Spellanzeni, Retzius, Ramón y Cajal, and Helmholtz) is not well known to modern investigators. Similarly, work in the first 75 years of the 20th century is also unknown or, in some cases, dismissed because it is “old.” Much of the earlier work describes research approaches and results fundamental to our understanding of hearing as well as the beauty of observation and synthesis. The pioneering work on hearing contains ideas and questions that are still germane today. Thus, the goal of this volume is to introduce, review, and put into perspective, older but exemplary, extraordinary studies by investigators that form the basis of our knowledge as well as questions being asked today. Each chapter includes the first significant observations and approaches to hearing in the taxa and/or hearing type that is the focus of the chapter with some of the most important earlier papers discussed in some detail, including the theories, formative experiments, results, and conclusions. Each chapter provides briefer notations and citations of additional important papers that are outgrowths of the founding research – or correlate and even reverse the original works. This volume is a departure from the classic approach established for the SHAR books in which the focus has been on a single topic, and on the most recent and exciting discoveries. One difference in this volume from past SHAR volumes is that we have a more coordinated approach for the chapters to ensure that this volume is, indeed, a documentation of hearing research history, not a review of the latest status of the topic. A second difference is that the focus of the volume is on the historical value of studies. In that sense, the volume maintains the tutorial value for which SHAR books are famous, but it explores the ancestry of modern research in order to help new researchers to gain perspective on important questions and on fundamental information they may not fully appreciate – to their loss. Our interest in doing this volume comes from phenomena familiar to most senior investigators - that younger investigators often have little or no sense of the history of their discipline, and they often do not know that their “hot” new idea was not only pursued, and often solved, but further that it was solved in an elegant way. We believe it is important to bring the methodologies and discoveries on hearing done before the advent of the internet to light, for the benefit and growth of new research. In deciding on the chapter divisions for this book, we considered a number of different organizational schemes, and particularly using as a focus methodological approaches (e.g., psychoacoustics, low to high frequency types, physiology, anatomy). However, we came to the conclusion that most investigators tend to be more focused on working within a particular taxonomic group, settling on particular taxa, in many cases driven by the special hearing abilities. We also concluded that that this approach is more naturally related to the evolution not only of hearing, but also to the evolution of ideas, as much of hearing science was part of the “natural philosopher” approach that was a core element of historical discoveries.

Dolphin Diaries Dr. Denise L. Herzing,2011-07-05 Dr. Denise Herzing began her research with a pod of spotted dolphins in the 1980s. Now, almost three decades later, she has forged strong ties with many of these individuals, has witnessed and recorded them feeding, playing, fighting, mating, giving birth and communicating. Dolphin Diaries is an account of Herzing's research and her surprising findings on wild dolphin behavior, interaction, and communication. Readers will be drawn into the highs and lows—the births and deaths, the discovery of unique and personalized behaviors, the threats dolphins face from environmental changes, and the many funny and wonderful encounters Denise painstakingly documented over many years. This is the perfect book for anyone who loves these incredibly versatile and intelligent creatures and wants to find out more than the dolphin show at the zoo can offer. Herzing is a true pioneer in her field and deserves a place in the pantheon of naturalists and scientists next to Dian Fossey and Jane Goodall.

The Trials of Radclyffe Hall Diana Souhami,2014-12-23 Diana Souhami’s Lambda Award-winning biography is a fascinating look at one of the twentieth century’s most intriguing lesbian literary figures. Born in 1880, Marguerite Radclyffe-Hall was a young unwanted child when her parents put an end to their tempestuous marriage by filing for divorce. She had already made tentative forays into lesbian love when her father died, leaving her an heiress at eighteen. Her income assured, Hall moved out of her mother’s house, renamed herself John in honor of her great-great-grandfather, and divided her time among hunting, traveling, and pursuing women. She began to write—songs, poetry, prose, and short stories—and achieved success as a novelist, but it was with the publication of *The Well of Loneliness* in 1928 that Radclyffe Hall became an internationally known figure. Dubbed the “bible of lesbianism,” the book caused a scandal on both sides of the Atlantic. Though moralistic in tone, because of its subject matter it was tried as obscene in America and in the United Kingdom, where it was censored under the Obscene Publications Act. *The Trials of Radclyffe Hall* is a fascinating, no-holds-barred account of the life of this controversial woman, including her torrid relationship with the married artist Una Troubridge, who was Hall’s devoted partner for twenty-eight years.

Dolphin Drone James Ottar Grundvig,2016-09-27 A taught, high-concept thriller that humanizes the men and women behind military espionage. James Grundvig’s Dolphin Drone takes us into the complex

underworld of global terrorism with razor-sharp plot twists, remarkable characters, and fascinating insight into the technological advancements of the US Navy. Using dolphin sonar-tracking technology, Ex-Navy SEAL Merk Toten stumbles of freshly laid Iranian sea mines while conducting surveillance on two US ships that were hijacked by Somali pirates on the Strait of Hormuz. This discovery occurs on the same day that a fake intelligence report draws three US drones away from the Persian Gulf. Toten investigates the parallel events to uncover a new super-terrorist group made up of a network of Somali warlords, Islamic assailants, Yemen-based terrorists, and ISIS sympathizers. When Merk Toten and the beautiful CIA Operative Jenny Myung King discover a plot by this new terrorist organization to bomb New York Harbor, the duo must race against the clock to stop the devastating attack. Dolphin Drone is a tense thriller that combines cutting-edge marine technology, high-stakes undercover operations, and complex and frightening political underpinnings. Skyhorse Publishing, as well as our Arcade, Yucca, and Good Books imprints, are proud to publish a broad range of books for readers interested in fiction—novels, novellas, political and medical thrillers, comedy, satire, historical fiction, romance, erotic and love stories, mystery, classic literature, folklore and mythology, literary classics including Shakespeare, Dumas, Wilde, Cather, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

A Dolphin Wish Natalie Grant,2016-01-26 Join twins Mia and Maddie and their sidekick little sister, LuLu, as they travel the country finding adventure, mystery, and sometimes mischief along the way. Together with their famous mother, singer Gloria Glimmer, and their slightly wacky nanny Miss Twist, the sisters learn lessons about being good friends, telling the truth, and a whole lot more. In A Dolphin Wish a three-night stop in the city of San Diego seems like it might be just the break the girls need—lovely weather and great sights to see. That is until they hear animal handlers at “Watery World” talking about the trouble they’ve been having keeping the animals in their habitats. Mia and her sisters cannot resist a challenge and they talk Miss Twist into another visit to the educational amusement park to search for clues as to what or who is helping the animals escape.

Echolocation in Bats and Dolphins Jeanette A. Thomas,Cynthia F. Moss,Marianne Vater,2004 Although bats and dolphins live in very different environments, are vastly different in size, and hunt different kinds of prey, both groups have evolved similar sonar systems, known as echolocation, to locate food and navigate the skies and seas. While much research has been conducted over the past thirty years on echolocation in bats and dolphins, this volume is the first to compare what is known about echolocation in each group, to point out what information is missing, and to identify future areas of research. Echolocation in Bats and Dolphins consists of six sections: mechanisms of echolocation signal production; the anatomy and physiology of signal reception and interpretation; performance and cognition; ecological and evolutionary aspects of echolocation mammals; theoretical and methodological topics; and possible echolocation capabilities in other mammals, including shrews, seals, and baleen whales. Animal behaviorists, ecologists, physiologists, and both scientists and engineers who work in the field of bioacoustics will benefit from this book.

The Farmer and the Dolphin William S. Walker,2018-06-28 At Garden City Beach, S.C., where no one seemed to hurry, the first indication of trouble was the staccato rumble of footsteps on the stairs. A sharp knock at the door came next. And when 86-year-old Betty Mincey opened up she faced law officers wearing guns. Three men, two from the South Carolina Department of Natural Resources and a federal agent from the National Oceanic and Atmospheric Administration, had come to investigate the report of a dead dolphin taken in a net set by her husband in front of the Mincey house that morning, Nov. 3, 2013. After questioning 86-year-old World War II Navy veteran C.P. Mincey, the officers told him he had violated the Marine Mammal Protection Act which cites the illegal taking of a dolphin as a federal offense. The accompanying S.C. DNR officer told him he had also broken state laws in setting and observing the net. Mincey’s explanation that he had made no attempt to take the dolphin found dead earlier that morning in his lightweight mesh net did not appear to matter to the officers. They charged the South Carolina farmer with killing a dolphin and his fine was eventually set at \$6500. The events at Garden City marked the opening stage of a 15-month-long battle between the Mincey family and the National Oceanic and Atmospheric Administration. Join South Carolina author William Walker for an in-depth, entertaining behind-the-scenes account of how Mincey, with the support of Latta S.C., attorneys LaFon LeGette and Alan Berry, won his case in a contentious federal hearing at Georgetown, S.C.
