Encyclopedia of Whales, Dolphins and Porpoises Erich Hoyt, 2023-09 In this updated edition, award-winning author and whale researcher Erich Hoyt takes readers into the field for an intimate encounter with 93 species of cetaceans that make their homes in the world's oceans, rivers and lakes. Drawing on decades of firsthand experience and a comprehensive familiarity with the current revolution in cetacean studies, Hoyt provides unique insights into the life histories of whales. This new edition features descriptions of three new whale and dolphin species, along with the latest discoveries about cetacean

biology and behavior, from the physical differences and adaptations among the baleen and toothed whales to their highly intelligent hunting and feeding methods. Uncovered in fascinating detail are the courtship and mating practices, family relationships and the lifelong bonds among some family members. The symphonic composer of the whale world is the humpback whale, whose complex 30-minute songs reverberate across the liquid universe of the ocean. Current research reveals that blue, fin, bowhead and other whales also sing, mostly in tones below human hearing. Using sound for navigation, some whales hunt in deep, high pressure waters while others negotiate migrations across entire ocean basins. Thoroughly updated to reflect the latest findings, this book is perfect for anyone curious about the cetacean world. Budding whale students will gain insights on how to research whales, dolphins and porpoises as well as how to save at-risk species and their increasingly damaged habitat. *Encyclopedia of Whales, Dolphins and Porpoises* includes: detailed profiles of 93 current species of cetaceans (3 more than in the previous edition) the story of the newly discovered Sato's beaked whale, a small black whale from the North Pacific related to the Baird's beaked whale fascinating sidebars that bring to life cetacean society and culture an enlightening discussion of the differences between dolphins and porpoises new information on the history and impact of whaling illustrations of each species by renowned artist Uko Gorter, including the three new species named in the past five years color photographs by world-famous marine photographer Brandon Cole, among others.

One White Dolphin Gill Lewis, 2012-06-26 When a baby albino dolphin caught in old fishing netting washes ashore, Paralympics sailing hopeful Felix and English school girl Kara work with veterinarians and specialists to save and reunite the dolphin with her mother, setting off a chain of events that might just

save the reef from the environmental effects of proposed dredging.

Shark or Dolphin? Melissa Stewart, 2011-01-01 Explains to young readers how to tell the difference between sharks and dolphins--Provided by publisher.

The Storm Whale in Winter Benji Davies, 2016-09-22 A follow-up to the best-selling *The Storm Whale*, winner of the 2014 inaugural Oscar's First Book Prize in association with the Evening Standard. It's winter time and Noi's island is covered in a blanket of snow. Even the sea is icing over. Noi is worried about the little whale he saved last summer: Can he survive the harsh conditions? Little does Noi know that it's the little whale's turn to save him. A magical and touching story about a lasting friendship. A truly beautiful work packing a real emotional punch. 'At the heart of this emotionally charged story is the joy of a lasting friendship, tender and true' Fiona Noble for *The Bookseller*, Children's Book of the Month

Dolphin Mysteries Kathleen M. Dudzinski, Toni Frohoff, 2008-10-14 Dolphins have fascinated humans for millennia, giving rise to an abundance of stories and myths about them, yet the actual details of their lives in the sea have remained elusive. In this enthralling book, Kathleen M. Dudzinski and Toni Frohoff take us into the dolphins' aquatic world to witness firsthand how they live their lives, communicate, and interact with one another and with other species, including people. Kathleen M. Dudzinski and Toni Frohoff are scientists who have collectively dedicated more than 40 years to studying dolphins beneath the ocean's surface, frequently through a close-up underwater lens. Drawing on their own experiences and on up-to-the-minute research, the authors show that dolphins are decidedly not just members of a group but distinct individuals, able to communicate with one another and with humans. Dudzinski and Frohoff

introduce a new way of looking at, and listening to, the vocabulary of dolphins in the sea, and they even provide an introductory dolphin dictionary, listing complex social signals that dolphins use to share information among themselves and with people. Unveiling an intimate and scientifically accurate portrait of dolphins, this book will appeal to everyone who has wanted a closer glimpse into the hearts and minds of these amazing creatures.

Island of the Blue Dolphins Scott O'Dell, 1960 Far off the coast of California looms a harsh rock known as the island of San Nicholas. Dolphins flash in the blue waters around it, sea otter play in the vast kelp beds, and sea elephants loll on the stony beaches. Here, in the early 1800s, according to history, an Indian girl spent eighteen years alone, and this beautifully written novel is her story. It is a romantic adventure filled with drama and heartache, for not only was mere subsistence on so desolate a spot a near miracle, but Karana had to contend with the ferocious pack of wild dogs that had killed her younger brother, constantly guard against the Aleutian sea otter hunters, and maintain a precarious food supply. More than this, it is an adventure of the spirit that will haunt the reader long after the book has been put down. Karana's quiet courage, her Indian self-reliance and acceptance of fate, transform what to many would have been a devastating ordeal into an uplifting experience. From loneliness and terror come strength and serenity in this Newbery Medal-winning classic.

The Mitten Jan Brett, 2009-10-05 When Nicki drops his white mitten in the snow, he goes on without realizing that it is missing. One by one, woodland animals find it and crawl in; first, a curious mole, then a rabbit, a badger and others, each one larger than the last. Finally, a big brown bear is followed in by a tiny

brown mouse and what happens next makes for a wonderfully funny climax. As the story of the animals in the mitten unfolds, the reader can see Nicki in the borders of each page, walking through the woods unaware of what is going on. Once again Jan Brett has created a dramatic and beautiful picture book in her distinctive style. She brings the animals to life with warmth and humor, and her illustrations are full of visual delights and details faithful to the Ukrainian tradition from which the story comes.

Dolphin Way Mark Caney, 2011 Dolphin culture evolved over millions of years so they could remain perfectly attuned with their world, the ocean. But the growing pressure of man's activities become intolerable and in frustration they seek an aggressive new path, making a shocking departure from the ancient philosophy that has guided them so well through the millennia.

5 Chairs 5 Choices Louise Evans, 2020-05-08 This book is a call to action. We spend about eighty percent of our day at work, the rest is at home. If we have a bad day at work we are likely to take that negativity home with us and vice versa. It is of paramount importance that we create healthy environments in the spaces that most affect our lives by giving of our best and receiving the like in return. The 5 Chairs is a powerful and systematic method which helps us master our own behaviours and manage the behaviours of others. To be a good leader is to contribute to the success and happiness of everyone, at work and at home, on a conscious level. The 5 Chairs offer 5 Choices. Which will you choose? One of the most practical books on emotional intelligence that I have ever read. Richard Barrett, Chairman and Founder of the Barrett Values Centre. Louise's work is for people with the intelligence and humility to believe that in life one can

always improve, one can try to understand before judging and one can listen to other people's convictions no matter how diverse. In an increasingly multicultural, globalised world where managing diversity is key to success, Louise's guidelines should be a moral obligation. Franco Moschetti CEO, Axel Global Business, previously CEO of Amplifon Ltd The 5 Chair experience is powerful. After reading the book you feel more equipped, excited even, to manage your daily behaviours and conversations in a completely new way, both at work and at home. It's a real game changer. David Trickey CEO at TCO International and Partner at Viral Change TM Louise's groundbreaking book is for anyone who is interested in bringing more empathy, emotional intelligence and consciousness into their career (and into their daily life). The examples in this insightful book are practical and easy to integrate, and it's a must-read for anyone who wants to be an inspiring and more effective Leader. Wet Goddess Malcolm Brenner, 2010-04-15 In the 1970's, a hippie college student falls in love with a female dolphin.

Dolphins! Laurence Pringle, 2019-02-05 Here is an accessible and comprehensive introduction to dolphin species from all over the world; this title is the latest installment in the popular Strange and Wonderful series and a terrific STEM choice. With fascinating facts and detailed, illuminating artwork, DOLPHINS! Strange and Wonderful introduces readers to dolphin species -- from the well-known bottlenose dolphin to several species of blackfish (including orcas) that most people believe are whales. Author Laurence Pringle's clear, informative text describes dolphins' habitats, physiology, communication, intelligence, parenting, what and how they eat, and much more. The book also discusses conservation and how dolphins

can be protected from hunting, pollution, and other threats. Accompanied by Meryl Henderson's beautiful and illuminating paintings, this book is a great STEM title that perfectly hits the mark for children interested in marine life. Includes a glossary, index, and further resources.
