Meeting Dolphins Kathleen Dudzinski,2000 Who can resist dolphins? They're so smart, and they have that mysterious smile. But they're wild animals -- possibly friendly, potentially dangerous. And only a very few people get a chance to meet them in the wild. Kathleen Dudzinski is one of them. Dudzinski has studied dolphins all over the world. Everywhere she goes, she observes gestures, sounds, and behaviors to try to figure out how dolphins communicate. She has watched mother dolphins teach their babies how to hunt and swum with a pod of dolphins to figure out how they all know to turn at the same time. She's even built an underwater camera housing with microphones to record and study dolphin sounds in stereo. In Meeting Dolphins, Dr. Kathleen Dudzinski, marine biologist and subject of the large-format film Dolphins, tells her own story and the story of the dolphins she has come to know and love.

Already Whole Helena Hjalmarsson,2022-02-08 Many of us have made our lives so noisy, overwhelming, sensory craving and data driven that we have somehow missed the most fundamental part about ourselves and our lives. Learning how to work with every process, every situation, every relationship intuitively; learning to love what is, to let go, to have faith and find stillness; to foster one's intuition and become creative in our own lives is something we can all achieve. To illustrate these concepts, Hjalmarsson calls on her decades of experience and work as a psychotherapist. But most significantly, her life as an autism parent, accounted for in her previous books, Finding Lina 2013 and Beyond Autism 2019, which has taught her where to find that elusive freedom and harmony: inside herself. Hjalmarsson believes that the solution to life's chaos, this freedom and harmony—this love—is accessible to all. She writes, We don't earn freedom. We either realize who we are and how we can live free, connected, joyful and expansive lives or we don't. We can realize it some of the time and live a little bit connected and a little bit trapped. Or we can learn to realize it most of the time and spend most of our lives fully awake.

Music in Everyday Life Tia DeNora,2000-06-08 The power of music to influence mood, create scenes, routines and occasions is widely recognised and this is reflected in a strand of social theory from Plato to Adorno that portrays music as an influence on character, social structure and action. There have, however, been few attempts to specify this power empirically and to provide theoretically grounded accounts of music's structuring properties in everyday experience. Music in Everyday Life uses a series of ethnographic studies - an aerobics class, karaoke evenings, music therapy sessions and the use of background music in the retail sector - as well as in-depth interviews to show how music is a constitutive feature of human agency. Drawing together concepts from psychology, sociology and socio-linguistics it develops a theory of music's active role in the construction of personal and social life and highlights the aesthetic dimension of social order and organisation in late modern societies.
