The Domino Effect Stephen M. Rosen,2007-09 How many times have you thought about introducing a new product into the marketplace, and as you thought about it, you realized that you have a great idea, but aren't sure how to make it a reality? Do you need to generate more revenue and more profit for your company but aren't sure the best way to move forward? Maybe you've introduced new products to the marketplace and it hasn't gone as well as you had hoped, maybe you've even failed? Maybe your competition is getting just a little too close to your market share or you want more of theirs? There are some basic strategies that can help you dominate. And they're all in this book.

z/OS Distributed File Service zSeries File System Implementation z/OS V1R13 Paul Rogers,Robert Hering,IBM Redbooks,2012-10-18 The z/OS® Distributed File Service zSeries® File System (zFS) is a z/OS UNIX® file system that can be used like the Hierarchical File System (HFS). zFS file systems contain files and directories, including Access Control Lists (ACLs), that can be accessed with the z/OS HFS application programming interfaces (APIs). zFS file systems can be mounted into the z/OS UNIX hierarchy along with other local or remote file system types (for example, HFS, TFS, AUTOMNT, NFS, and so on). zFS does not replace HFS, but it is the z/OS UNIX strategic file system and IBM® recommends migrating HFS file systems to zFS. Beginning with z/OS V1R7, there are no restrictions for file system structures that should be kept as HFS instead of zFS. This IBM Redbooks® publication helps you to install, tailor, and configure new zFS file systems. This information can be used by system administrators who work with the zFS component of the IBM z/OS Distributed File Service base element. The book provides a broad description of the new architecture of the zFS file system for all releases up to zFS V1R13. You can use it as a reference when converting HFS file systems to zFS file systems. It will help you to create a solution for migrating to zFS file systems, and to understand the performance differences between HFS file systems and zFS file systems.

The Domino's Story Marcia Layton Turner,2020-10-27 Imagine if you were there, taking notes, as a small pizza joint became one of the most successful restaurants in the world. The Domino's Story will help you understand and adopt the competitive strategies, workplace culture, and business practices that made the iconic pizza chain the innovative restaurant and e-commerce leader it is today. As one of the most technologically advanced fast-food chains in the market, Domino's has cemented their reputation for innovation, paved in industry-leading profits. In February 2018, according to Ad Age, Domino's unseated Pizza Hut to become the largest pizza seller worldwide in terms of sales. Rather than just tampering with a recipe that was working, they decided to think outside of the pizza box by creating digital tools that emphasized convenience and put the customer first. For the first time, the adaptable strategies behind the rise and dominance of Domino's are outlined in these pages. Through the story of the Domino's, you'll learn: How to create meaningful innovation without changing the core of the product that people already love. How to recognize and take advantage of unique opportunities to alleviate your customers' pain points. How to grow a company by taking a holistic approach to the business. And, the importance of delivering a quality experience that will keep customers calling for more.
