The Domino's Story Marcia Layton Turner,2020-10-27 Imagine if you were there, taking notes, as a small pizza joint became one of the most successful restaurants in the world. The Domino's Story will help you understand and adopt the competitive strategies, workplace culture, and business practices that made the iconic pizza chain the innovative restaurant and e-commerce leader it is today. As one of the most technologically advanced fast-food chains in the market, Domino's has cemented their reputation for innovation, paved in industry-leading profits. In February 2018, according to Ad Age, Domino's unseated Pizza Hut to become the largest pizza seller worldwide in terms of sales. Rather than just tampering with a recipe that was working, they decided to think outside of the pizza box by creating digital tools that emphasized convenience and put the customer first. For the first time, the adaptable strategies behind the rise and dominance of Domino's are outlined in these pages. Through the story of the Domino's, you'll learn: How to create meaningful innovation without changing the core of the product that people already love. How to recognize and take advantage of unique opportunities to alleviate your customers' pain points. How to grow a company by taking a holistic approach to the business. And, the importance of delivering a quality experience that will keep customers calling for more.

Dominos Donna M. Calhoun,2007-09 It's impossible to know when and how the dominos of someone's life will start to fall. When Katie Race, a working Alabama foster mom with a passion for hunting deer, gets a summons for jury duty, she has no idea how far she would actually go to see justice served. At the trial, she learns about the despicable transgressions of Larry Cunningham, a forty-two-year-old unmarried youth minister from Loxley Lutheran Church, just down the street from where she lives. Cunningham was once adored by the female parishioners at his church, but he had a rule: He never dated the mothers of the children. Of course, that didn't stop young women from swooning over him-and it didn't stop Larry from molesting their young boys. The grand jury on which Katie serves promptly indicts Cunningham, who is arrested and brought to court. But before a trial can ever really begin, the charges are dropped because of a technicality. Katie can't tolerate the idea of the authorities doing nothing as a known child molester endangers the community, so she decides to put her hunting skills to the test to track down Cunningham. Dominos tells the riveting story of a community betrayed and one woman's decision to do what she thinks is right, no matter the consequences.

Mexican Train Dominoes are played with a standard set of Double Twelve dominoes. Each game has 91 dominoes, and we recommend that dominoes with colored spots are used because otherwise, it becomes difficult to match dominoes at a glance. To begin, the dominoes are shuffled face down in circles with the flat of the hand - producing an attractive sound that has been well-known for centuries. Depending on the number of players, each player draws a set number of dominoes. Up to 4 players take 15 dominoes each, 5 or 6 take 12 each, 7 or 8 take 10 each. In friendly games, players usually just place their dominoes on edge in a row facing them. The remaining dominoes are termed sleeping tiles or the boneyard. The hub is placed in the middle of the table and each player selects a slot on the outer edge that is facing them to be the starting point for their train. One additional slot is chosen to be the starting point for the 'Mexican Train,' and the Mexican Train marker is placed in this slot to denote it as such. The player with the highest double puts it in the center of the Mexican Train Hub. The player to the left of the player who put down the highest double starts and players then take turns in a clockwise direction. The first turn made by each player at Mexican Train Dominoes is different from subsequent turns and can require some thought to give the best advantage. The player starts their 'train' by putting their first domino into their chosen slot on the hub. The end pointing towards the middle must match the central hub domino. They then continue to extend this 'train' by adding more dominoes from their hand until they can't put down any more. The aim is to be the first player to get rid of all the dominoes in their hand. As soon as this happens, even if the last tile is a Double, the game ends. The winning player scores zero; the other players score the total of the number of spots on the dominoes still left in their hands. Usually, a series of games are played, and whoever has the least points at the end of the round wins the match.
