Social Entrepreneurship Meng Zhao, Jiye Mao, 2021-01-19 This book incorporates theoretical framework and management cases in discussions on social enterprise in China. The authors look to address two fundamental questions about social enterprises in China that have been very controversial over the years. First, what is social enterprise? This book proposes a framework that defines Chinese social enterprises based on social enterpreneurship, and includes ten case studies for justification. Second, who are well-performed social enterprises with financial viability and proved social impact? The book describes in detail some of the leading social enterprises in China. It is aimed at a wide target audience. Practitioners will learn experience and lessons from the case studies. Academics can use the cases in different teaching contexts, and gain research inspirations from our framework and case studies. Policy makers, accreditation agencies, professional service providers, and institutional investors will learn to identify and evaluate promising social enterprises.

After the Coup Anthony Ware, Monique Skidmore, 2023-12-07 The coup in Myanmar on 1 February 2021 abruptly reversed a decade-long flirtation with economic and political freedoms. The country has since descended into civil war, the people have been plunged back into conflict and poverty, and the state is again characterised by fragility and human insecurity. As the Myanmar people oppose the regime and fight for their rights, the international community must find ways to act in solidarity. There is an urgent need for new policy settings and for practical engagement with local partners and recipient groups. The contributors to After the Coup offer timely insights into ways international actors can try to reduce the suffering of millions of citizens who are again being held hostage by a brutal and self-serving regime. Chapters analyse topics including coercive statecraft, international justice, Rakhine State (Rohingya) dynamics, pandemic weaponisation, higher education, non-state welfare and aid delivery, activism from exile, self-determination and power sharing in the National Unity Government's alternative constitution, and the roles of China and the Association of Southeast Asian Nations.

Appified Jeremy W Morris, Sarah Murray, 2018-10-23 Snapchat. WhatsApp. Ashley Madison. Fitbit. Tinder. Periscope. How do we make sense of how apps like these-and thousands of others-have embedded themselves into our daily routines, permeating the background of ordinary life and standing at-the-ready to be used on our smartphones and tablets? When we look at any single app, it's hard to imagine how such a small piece of software could be particularly notable. But if we look at a collection of them, we see a bigger picture that reveals how the quotidian activities apps encompass are far from banal: connecting with friends (and strangers and enemies), sharing memories (and personally identifying information), making art (and trash), navigating spaces (and reshaping places in the process). While the sheer number of apps is overwhelming, as are the range of activities they address, each one offers an opportunity for us to seek out meaning in the mundane. Appified is the first scholarly volume to examine individual apps within the wider historical and cultural context of media and cultural studies scholarship, attuned to issues of politics and power, identity and the everyday.

Anthropological Perspectives on the Religious Uses of Mobile Apps Jacqueline H. Fewkes, 2019-10-10 This edited volume deploys digital ethnography in varied contexts to explore the cultural roles of mobile apps that focus on religious practice and communities, as well as those used for religious purposes (whether or not they were originally developed for that purpose). Combining analyses of local contexts with insights and methods from the global subfield of digital anthropology, the contributors here recognize the complex ways that in-app and on-ground worlds interact in a wide range of communities and traditions. While some of the case studies emphasize the cultural significance of use in local contexts and relationships to pre-existing knowledge networks and/or non-digital relationships of power, others explore the globalizing and democratizing influences of mobile apps as communication technologies. From Catholic confession apps to Jewish Kaddish assistance apps and Muslim halal food apps, readers will see how religious-themed mobile apps create complex sites for potential new forms of religious expression, worship, discussion, and practices.

The Ethics of Medical Data Donation Jenny Krutzinna, Luciano Floridi, 2019-01-16 This open access book presents an ethical approach to utilizing personal medical data. It features essays that combine academic argument with practical application of ethical principles. The contributors are experts in ethics and law. They address the challenges in the re-use of medical data of the deceased on a voluntary basis. This pioneering study looks at the many factors involved when individuals and organizations wish to share information for research, policy-making, and humanitarian purposes. Today, it is easy to donate blood or even organs, but it is virtually impossible to donate one's own medical data. This is seen as ethically unacceptable. Yet, data donation can greatly benefit the welfare of our societies. This collection provides timely interdisciplinary research on biomedical big data. Topics include the ethics of data donation, the legal and regulatory challenges, and the current and future collaborations. Readers will learn about the ethical and regulatory challenges associated with medical data donations. They will also better understand the special nature of using deceased data for research purposes with regard to ethical principles of autonomy, beneficence, and justice. In addition, the contributors identify the key governance issues of such a scheme. The essays also look at what we can learn in terms of best practice from existing medical data schemes.

Emerging Ecosystem-Centric Business Models for Sustainable Value Creation Ziouvelou, Xenia,McGroarty, Frank,2021-08-06 A hyperconnected, constantly evolving world has emerged. A world where people (internet of people), things (internet of things), and data (internet of data) are linked together, shaping the global economy while demanding new, innovative approaches for value creation. The era of hyper-connectivity is no longer characterized by centralized firm-centric business structures and traditional intra-firm and inter-firm processes. Open, distributed ecosystemic formations have started to emerge, utilizing cutting edge technologies to harness the collective power, co-creation ability, and intelligence of the crowd, the data, and the environment in an open participatory value co-creation mode. However, the question has become whether the frameworks, models, and tools that organizations use to create value will remain the same in the new business environment and within the organizations themselves. Existing literature on ecosystems, business models, and business model innovation are starting to examine these aspects. Emerging Ecosystem-Centric Business Models for Sustainable Value Creation explores emerging technology-enabled ecosystems and ecosystems and practice, from a business and technological perspective, and in a range of industrial settings, aiming to contribute to the existing knowledge of innovative technology-advanced ecosystems and business models, facilitating their design, implementation, and sustainable value creation. It examines the dynamics of this technology-powered revolution and how it is influencing the foundations of value creation and business modeling in novel ecosystemic formations across the HMD triangle: human, machine, and data. The target audience of this book is researchers and professionals in the fields of innovation, business, and strategy as well as computer science and information technology, along with managers, executives, practitioners, researchers, academicians, and s
