Double Down on Your Data Clive J. Pearson, 2012-09-25 Gambling has been with us since ancient times and it is unquestionably here to stay. Although Poseidon, Zeus and Hades may no longer be dividing the world up in a game of dice, flocks of tourist still flood through the gates of Las Vegas' Caesars, Atlantic City's Taj Mahal and Macau's oddly named casino Greek Mythology. In *Double Down On Your Data*, author Clive Pearson reveals that we have entered a brave new world of gambling and entertainment, a world where casino executives can cull through their casino's in-house patron data and discover who are their most profitable patrons. Armed with this information, these casino executives can then market to their most valuable patrons in a highly personal way, thereby creating a long and lasting — and usually highly profitable — relationship. *Double Down On Your Data* teaches casino executives how best to manage their customer relations as today they are faced with a gambler who is much more sophisticated than the ancient Roman soldier who tossed a coin in the air and called Heads or Ships.

Games Without Frontiers? Heather Wardle, 2021-07-16 This open access book focuses on how and why digital games and gambling are increasingly intertwined and asks “does this matter?” Looking at how “loot boxes” became the poster child for the convergence of gambling and gaming, Wardle traces how we got here. She argues that the intersection between gambling and gaming cultures has a long lineage, one that can be traced back throughout the 20th century but also incorporates more recent trends like the poker boom of the 1990s, the development of social media gambling products and the development of skin betting markets. Underpinned by changing technology, which facilitated new ways to bet, trade and play, the intersection between gaming and gambling cultures and products has accelerated within the last decade – and shows little signs of stopping. Wardle explores what this means for our understanding of risk, how gaming and gambling entities use each other for commercial advantage, and crucially explores what young people think of this, before making recommendations for action.

Double Down Frederick Barthelme, Steven Barthelme, 2001-05-21 "An exquisitely crafted memoir" by two brothers who lost their parents, lost their inheritance—and almost lost their freedom (The Wall Street Journal). Frederick Barthelme and his brother Steven were both accomplished, respected writers with stable adult lives when they lost both of their parents in rapid succession. They had already lost their other brother, just a few years earlier. Suddenly they were on their own, emotionally unmoored—and unprepared for what would happen next. Their late father had been a prominent architect, and the brothers were left with a healthy inheritance. Over the following several years, they would lose close to a quarter million dollars in the gambling boats off the Mississippi coast. Then, in a bizarre twist, they were charged with violating state gambling laws, fingerprinted, and thrown into the surreal world of felony prosecution. For two years these widely publicized charges hung over their heads, shadowing their every step. *Double Down* is the wry, often heartbreaking story of how Frederick and Steven Barthelme got into this predicament. It is also a reflection on the allure of casinos and the pull and power of illusions that can destroy our lives if we aren't careful. "One of the best firsthand accounts ever written about organized gambling. Like Goodman Brown, taking a walk with a hooded stranger into the darkness of the New England woods, the Barthelme brothers suddenly find themselves inside the maw of the monster. The compulsion to control, to intuit the future, to be painted by magic, could not be better or more accurately described." —James Lee Burke "Beautifully evoking the gamblers' addiction, their mesmerizing account is best read as a novel Camus might have imagined, with the writer/protagonists as their own lost characters. A work of high art; enthusiastically recommended." —Library Journal

Digital Gambling César Albarrán-Torres, 2018-03-28 This book develops the concept of gamble-play media, describing how some gambling and gambling-like practices are increasingly mediated by digital technologies. Digital gambling brings gambling closer to the practices and features of videogames, as audio-visual simulations structure users' experiences. By studying digital gambling from media studies, videogame and cultural studies approaches, this book offers a new critical perspective on the issues raised by computer-mediated gambling, while expanding our perspective on

what media and gambling are. In particular, it critically analyses terrestrial, mobile and online slot machines, online poker and stock trading apps through a selection of case studies.

The Loop Jacob Ward, 2022-01-25 This eye-opening narrative journey into the rapidly changing world of artificial intelligence reveals the dangerous ways AI is exploiting the unconscious habits of our minds, and the real threat it poses to humanity: The best book I have ever read about AI (New York Times bestselling author Roger McNamee). Artificial intelligence is going to change the world as we know it. But the real danger isn't some robot that's going to enslave us: It's our own brain. Our brains are constantly making decisions using shortcuts, biases, and hidden processes—and we're using those same techniques to create technology that makes choices for us. In *The Loop*, award-winning science journalist Jacob Ward reveals how we are poised to build all of our worst instincts into our AIs, creating a narrow loop where each generation has fewer, predetermined, and even dangerous choices. Taking us on a world tour of the ongoing, real-world experiment of artificial intelligence, *The Loop* illuminates the dangers of writing dangerous human habits into our machines. From a biometric surveillance state in India that tracks the movements of over a billion people, to a social media control system in China that punishes deviant friendships, to the risky multiple-choice simplicity of automated military action, Ward travels the world speaking with top experts confronting the perils of their research. Each stop reveals how the most obvious patterns in our behavior—patterns an algorithm will use to make decisions about what's best for us—are not the ones we want to perpetuate. Just as politics, marketing, and finance have all exploited the weaknesses of our human programming, artificial intelligence is poised to use the patterns of our lives to manipulate us. *The Loop* is call to look at ourselves more clearly—our most creative ideas, our most destructive impulses, the ways we help and hurt one another-so we can put only the best parts of ourselves into

the thinking machines we create.
