

Dr Drauzio Primeiros Socorros

Agnaldo Fontinele

Primeiros Socorros - Acidentes Drauzio Varella, Este volume foi escrito para ajudar você a enfrentar situações de emergência provocadas por acidentes – engasgamento, fratura, queimadura, mordida de animais, entre outros. Você vai saber que medidas devem ou não ser tomadas tanto para salvar vidas e/ou evitar complicações, como para reconhecer situações que exigem assistência médica com urgência.

Primeiros Socorros - Doenças Drauzio Varella, Este volume mostra o que fazer e o que não fazer diante de emergências como crise hipertensiva, convulsão, infarto, parada cardiorrespiratória e derrame cerebral, entre outras. De forma clara e didática, você ficará sabendo o que são esses problemas (suas causas e sintomas), como reconhecê-los e que medidas tomar para salvar vidas e/ou evitar consequências graves.

Primeiros socorros Drauzio Varella, Carlos Jardim, 2011-06-21 É muito comum a ideia de que prestar os primeiros socorros é coisa de médico, mas isso só é verdade porque quase todos nós desconhecemos o que fazer quando alguém se acidenta ao nosso lado. Em geral, o pouco que sabemos vem de crenças populares e consiste, muitas das vezes, em informações incorretas. Na verdade, para socorrer alguém nem sempre são necessários procedimentos complicados: os primeiros socorros não passam de um conjunto de medidas práticas e simples, ditadas pelo bom senso, providências que podem e devem ser conhecidas por mulheres, homens e crianças, pois acidentes ocorrem de forma imprevista, esteja quem estiver por perto. Os médicos Drauzio Varella e Carlos Jardim resolveram escrever um guia prático, com os principais acidentes, o que fazer quando eles ocorrem, e também - já que prevenir é melhor do que remediar - com uma lista de cuidados a se tomar para que eles nem cheguem a acontecer. O livro é dividido em treze partes: pancadas na cabeça; cortes e machucados; queimaduras; insolação; choque elétrico; fraturas e entorses; distensões, torções e estiramentos;

mordidas de animais; intoxicações; convulsões; engasgamento; afogamento; e parada cardiorrespiratória. Em primeiro lugar, os autores ensinam a reconhecer o que aconteceu, a sua gravidade, e indicam tanto o que fazer como o que não fazer na hora do socorro, com descrições de curativos, manobras, remédios e procedimentos em geral. Ao final de cada parte, há ainda uma lista de cuidados preventivos relacionados ao acidentes descritos. Fechando o volume, há também uma lista de telefones úteis, como o do Samu, além de um glossário com os termos técnicos utilizados ao longo do livro.

O guia completo para prevenção de acidentes em casa
Agnaldo Fontinele, 2020-10-30 Este e-book aborda as mais variadas possibilidades de prevenção de acidentes de acordo com as inúmeras situações de risco que enfrentamos dia após dia em nossas casas. Este livro está dividido de forma a dar ampla cobertura às mais diversas situações que possam ocasionar danos físicos ou prejuízos materiais.

Lockdown Drauzio Varella, 2012-08-30 The Carandiru House of Detention, in the teeming city of São Paulo, was the largest and most crowded prison in Latin America. Known as the 'Old House', it was also highly unusual in the way it was governed. Closed to the outside world, and even largely to the wardens, it was run almost entirely by the inmates themselves, who created a unique society complete with politics, hierarchies and a system of justice. In 1989, at the height of the AIDS epidemic in Brazil, with only a handful of physicians attempting to treat an inmate population of over 7,000, the medical situation at Carandiru was dire. A city doctor, Drauzio Varella, volunteered his time at Carandiru over the course of thirteen years, in an effort to combat the rampant disease. As he gained the inmates' trust he was given access to their society, where he was overwhelmed by the profound humanity and freedom of spirit shown by these men, despite their terrible crimes and the inhuman conditions in which they lived. Lockdown is Varella's powerful depiction of life on the inside,

wherein he recounts the prisoners' colourful and surprising stories. The book ends with the massacre by the police of the prisoners that ultimately brought down the 'Old House'.

A Vitória Pessoal em 50 Maratonas em um Ano Marcos Mourão, 2021-05-12 50 maratonas em um ano para comemorar os 50 anos! A cada ano cresce o número de pessoas ao redor do mundo que completa uma maratona. Sem dúvida, correr essa grande distância de 42 quilômetros é uma experiência marcante. A disseminação das assessorias esportivas, das planilhas de treino e da mídia especializada em corridas favoreceu a realização desse sonho para aqueles que dedicam horas, dias e meses de preparação.

Transplant Nursing International Transplant Nurses Society, 2009 This specialty standard focuses on protecting, promoting, and optimizing the health and abilities of both the recipients and the living transplant donors of transplanted across the life span. It is also an essential document for other specialists in transplant care, healthcare providers, researchers, and scholars, along with those involved in funding, legal, policy, and regulatory activities.

Dengue World Health Organization, 2009 This publication is intended to contribute to prevention and control of the morbidity and mortality associated with dengue and to serve as an authoritative reference source for health workers and researchers. These guidelines are not intended to replace national guidelines but to assist in the development of national or regional guidelines. They are expected to remain valid for five years (until 2014), although developments in research could change their validity.--Publisher's description.

Medicine's 10 Greatest Discoveries Meyer Friedman, Gerald W. Friedland, 1998-01-01 In 1675, Antony van Leeuwenhoek, an unlearned haberdasher from Delft, placed a drop of rainwater under his microscope and detected thousands of tiny animals in it. Leeuwenhoek proceeded to examine the microscopic activity of his spittle, teeth plaque, and feces, and as the result of his findings the field of bacteriology was born. Some two hundred years later, Wilhelm Conrad Roentgen, a professor of theoretical physics at the University of Wurzburg, invited his wife to his laboratory, asked her to place her hand on an unexposed photographic plate, turned on an electric current, and showed this terrified woman a picture of the bones of her hand. And so came the discovery of the X-ray. This absorbing book is the first to describe these and eight other monumental medical discoveries throughout history, bringing to life the scientific pioneers responsible for them and the excitement, frustrations, and jealousies that surrounded the final achievements. Two

distinguished physicians, Meyer Friedman and Gerald W. Friedland, have drawn on their many years of experience as well as on that of world-renowned antiquarian book dealers, physician collectors of old and new medical publications, and medical school professors to single out these medical breakthroughs from thousands of candidates, and, in several cases, to provide information never before available. Their engrossing stories of the ten most significant discoveries will be read with enjoyment by anyone fascinated by the mysteries of medicine.

A Permanent Crisis Marc Chesney, 2018-10-12 This short book describes the role big banks played in the financial crisis of 2008 while denouncing the financial oligarchy's seizing of power and the dangers it represents for democracy today. There have been many books since the financial crisis that have considered historical events leading up to the crisis but few that consider a solution. Ten years after the great financial crash, this book synthesises the historical developments and introduces a proposal aimed at rebalancing the economy and society at large. The

author presents a novel solution that would change current tax systems in the developed world, in their entirety. This book will be of interest to students, practitioners and researchers, as well as the wider informed audience.

Orphans of Eldorado Milton Hatoum, 2010 A magical retelling of the myth of Eldorado, by Brazil's greatest writer. The Enchanted City has inhabited the fevered dreams of many European navigators and consquistadores, but all have been unable to find it on the map.

The Turning Point Fritjof Capra, 1984-08-01 A compelling vision of a new reality, a reconciliation of science and the human spirit for a future that will work The dynamics underlying the major problems of our time—cancer, crime, pollution, nuclear power, inflation, the energy shortage—are all the same. We have reached a time of dramatic and potentially dangerous change, a turning point for the planet as a whole. We need a new vision of reality, one that allows the forces transforming our world to flow together as a positive movement for social change. Now distinguished scientist Fritjof Capra gives us that vision, a holistic paradigm of science and spirit. "This splendid and thoughtful book is an essential guide for anyone inquiring about the place of science and metascience in our contemporary culture. Those who enjoyed Fritjof Capra's *Tao of Physics* should not expect a sequel; this is a much more ambitious book that attempts and succeeds in presenting a whole worldview from the viewpoint of a committed and experienced physicist who also writes from within the North American culture.... It is unusually detailed and thorough in its inclusion of the conventional and the alternative approaches to topics ranging from ecology through medicine and psychology to economics. It is at once scholarly and easy to read."—Jim Lovelock, *New Scientist*
