FDR's First Fireside Chat Amos Kiewe, 2007-10-10 "I want to talk for a few minutes with the people of the United States." Thus began not only the first of Franklin Roosevelt's celebrated radio addresses, collectively called Fireside Chats, but also the birth of the media era of the rhetorical presidency. Humorist Will Rogers later said that the president took "such a dry subject as banking and made everyone understand it, even the bankers." Roosevelt also took a giant step toward restoring confidence in the nation's banks and, eventually, in its economy. Amos Kiewe tells the story of the First Fireside Chat, the context in which it was constructed, the events leading to the radio address, and the impact it had on the American people and the nation's economy. Roosevelt told America, "The success of our whole national program depends, of course, on the cooperation of the public—on its intelligent support and its use of a reliable system." Kiewe succinctly demonstrates how the rhetoric of the soon-to-be-famous First Fireside Chat laid the groundwork for that support and the recovery of American capitalism.

The Contest Over National Security Peter Roady, 2024 In The Contest over National Security Peter Roady shows how Franklin Roosevelt made the Democrats into the party of national security—and how the coalition between business leaders and social conservatives that made modern conservatism possible was cemented during the national security debates in the 1930s and 1940s, reshaping American politics for decades to come.--

Successfully Marketing Clinical Trial Results Dr Günter Umbach, 2012-09-28 In the US alone, pharmaceutical companies spend around \$7 billion a year on clinical trials for drugs; all this in a global market where increasing competition and pressure on healthcare financing are both impacting on margins and profitability. One solution for pharmaceutical companies lies within the clinical trials themselves. If only you can communicate the trial findings to the right people, in the right way, you can benefit from this huge investment and add significant value to your product range and your brand. Successfully Marketing Clinical Trials Results is a comprehensive guide for every marketing professional faced with the challenge of using marketing to convert scientific data into sales. The book offers you practical knowledge on how to use medical research data to maximise the revenue from your products. There are sections explaining how to: • identify your market and devise your strategy; • develop your content and translate data into a message that has impact; • use language, layout and illustrations to best effect; • communicate internally as well as externally; • make best use of the resources available; • align your sales force and the external agencies with whom you work; • lead the people in the project team; • co-operate with the medical researchers, external experts and the press. In this book are answers for everything from how to handle class-effect questions to developing a shared brand vocabulary. There are plenty of vivid examples and real-life applications to reinforce the ideas. Cases studies illustrate solutions to problems; checklists and tips will help to implement the suggestions and recommendations. Günter Umbach has distilled the essence both of 25 years' experience in the healthcare market and of his highly successful seminar series on marketing clinical trials into the professional advice given in this book. The text is accompanied by a CD ROM containing detailed Powerpoint slides supporting each of the (over 300) techniques that you can use in your marketing team meetings to develop great ideas of your own.

All We Have Is the Story James Kelman, 2024-04-23 Novelist, playwright, essayist, and master of the short story. Artist and engaged working-class intellectual; husband, father, and grandfather as well as committed revolutionary activist. From his first publication (a short story collection *An Old Pub Near the Angel* on a tiny American press)

through his latest novel (God's Teeth and other Phenomena) and work with Noam Chomsky (Between Thought and Expression Lies a Lifetime—both published on a slightly larger American press), All We Have Is the Story chronicles the life and work—to date—of “Probably the most influential novelist of the post-war period.” (The Times) Drawing deeply on a radical tradition that is simultaneously political, philosophical, cultural, and literary, James Kelman articulates the complexities and tensions of the craft of writing; the narrative voice and grammar; imperialism and language; art and value; solidarity and empathy; class and nation state; and, above all, that it begins and ends with the story. “One of the things the establishment always does is isolate voices of dissent and make them specific—unique if possible. It's easy to dispense with dissent if you can say there's him in prose and him in poetry. As soon as you say there's him, him, and her there, and that guy here and that woman over there, and there's all these other writers in Africa, and then you've got Ireland, the Caribbean—suddenly there's this kind of mass dissent going on, and that becomes something dangerous, something that the establishment won't want people to relate to and go Christ, you're doing the same as me. Suddenly there's a movement going on. It's fine when it's all these disparate voices; you can contain that. The first thing to do with dissent is say ‘You're on your own, you're a phenomenon.’ I'm not a phenomenon at all: I'm just a part of what's been happening in prose for a long, long while.” —James Kelman from a 1993 interview

The Thinking Crisis T. Ellen Hill, Shatzky, Joel, 2001 The objectives of The Thinking Crisis are: to examine the reasons for the decline in the quality of student writing by what is taught—and learned—in high school; to demonstrate the consequences of this decline by examining current student writing in college; to compare this writing with student writing of twenty years ago; to suggest ways in which this disconnection between what a teacher teaches and what a student needs to learn can be ameliorated. We believe that this book is unique in its approach to problems that we see in student writing today in that it neither advocates nor rejects the present pedagogy in the schools; but it argues that this pedagogy be properly implemented. While many of the ideas advanced today for improving writing are sound, they are often misinterpreted and poorly taught. We also argue that the lowering of the level of student reading by the general abandonment of classic texts in the curriculum has contributed to the decline in thinking, reading and writing.

Balzac's Shorter Fictions Tim Farrant, 2002-02-14 Balzac's reputation is as a novelist. But short stories make up over half La Comédie humaine, besides scores of other tales and articles. Short forms appear early in Balzac's output, and shape his work throughout his career. Balzac's Shorter Fictions looks at the whole of this corpus, at the nature of short fiction, and at how Balzac's novels developed from his stories – at the links between literary genesis and genre. It explores the roles of short fiction in Balzac's creation, its part in producing effects of virtuality and perspective, and reflects ultimately on the relationship between brevity and length in La Comédie humaine. This, the first complete English-language study of Balzac's work for over forty years, synthesizes recent research on Balzac's practice within the context of modern thought on the author. It is an indispensable book for students and scholars of Balzac, and for all those interested in prose fiction.
